1906 ANNUAL SEED AND IMPLEMENT CATALOGUE
It is Impossible to Stand Still.

You must advance or go down. The successful seed dealer must be in position to supply his customers what they want or they will buy where they can find the goods for which they are looking.

We have realized for the past three years that on account of the increasing demand for our goods we must have greater facilities and more capital to take care of this increased trade. We have, therefore, since we mailed you our last catalogue, incorporated under the name of Ross Bros. Co., and with the addition of two more floors, making now eleven in all, and greatly increased capital, we are in a much better position than ever to handle the business which we confidently expect will come to us during the next year.

It has been our aim in the past to have the best Agricultural Tool and Seed House in New England and we continue to strive for that end. And to those who have an opportunity to inspect our establishment we extend an invitation to call and look us over. The management of the firm remains in the same hands in which it has been for the past eighteen years and everyone can depend upon receiving the same fair and honorable dealing and prompt attention to all orders and inquiries that they have in the past.

We want to call your attention to our several departments as follows:

**FARM SEEDS.** For the past twenty years our firm has made a specialty of securing seeds for the farm, such as ensilage corn, oats, barley, millets, grains and grass seed. We handle these goods not only by the car load, but almost by the train load, and we aim to have all of the reliable varieties. Careful inspection will show you what we have and what our prices are.

**SEED FOR THE MARKET GARDENER.** We have strains of seeds grown especially for us and are constantly improving them. Market gardeners should write us regarding the large lots, for we are in a position to furnish such as low as any one.

**SEED POTATOES.** Our stock of seed potatoes is all grown in Aroostook County, Maine. They are carefully housed in frost-proof buildings until weather will permit safe shipments in the spring. The stock is grown especially for seed. We do not deal in cooking stock of potatoes except that grown for the same as the price.

**FLOWER SEEDS.** With few exceptions we import all of our stock of flower seeds from the most reliable growers across the water. We offer several specialties this season which are worthy of a trial.

**FERTILIZERS AND FERTILIZING MATERIALS.** We handle these goods in any quantity from a single bag to a car load, and handle annually several hundred tons. In car load lots we can shade our printed price, and to large buyers we will be pleased to quote net price.

**AGRICULTURAL TOOLS.** This is one of our largest departments and requires nearly one-half acre of floor space to store and exhibit them. Our assortment is the largest of any house East of the Mississippi River and our prices are always reasonable.

**POULTRY SUPPLIES.** We devote seven pages of this catalogue to description and price on these goods. We are sole manufacturers of the celebrated Wyantlott Chicken Food and Every Day Scratch Food, two most popular brands of feed on the market.

Our business is the selling at both wholesale and retail. We always consider it a favor for our customers to call our attention to anything that is not right rather than to let it go unnoticed. We want to know that our customers are satisfied, and we will refund the money on any purchase that is not as represented.

The advantages for purchasing goods by mail are increasing each year, and with our catalogue for reference no distance is too great for trying our seeds. Our facilities for the prompt shipment of goods are unsurpassed by any other seed house. We make no charge for boxing or crating, only in extreme cases where the profit is so small it is absolutely necessary.

To all of our old customers we wish to extend our sincere thanks for their past favors, and to all who have never tested our seeds or our ways of doing business we ask you to do us a trial. We are confident that we shall be friends ever after.

With best wishes for a prosperous season, we remain,

Very respectfully,

ROSS BROS. CO.,
96 & 92 Front St., Worcester, Mass.

February 15, 1906.

A Few Things of Importance that We Wish Our Customers to Read.

**WE WARRANT OUR SEEDS.** Just as far as it is possible for us to do so. What we guarantee. That all seeds sold by us shall be as represented, should they prove otherwise, we will refund the order, but we cannot guarantee the crop further, as there are so many causes over which we have no control, that seeds be ever so fresh, weather and circumstances may cause a total failure, and while we use the greatest care to have all seeds pure and reliable, we do not give any warrant, expressed or implied. If the purchaser does not accept the seed on these terms they must be returned at once, and the money paid for them will be refunded.

In view of the recent publication of the Department of Agriculture of Washington concerning the adulteration of grass seed, and the publication of the firm names of many prominent seedsmen including ourselves, we feel bound, in justice to ourselves and our customers to meet this question fairly and state our position and our intentions for the future. We have always endeavored to have the best seed that money would buy, but we have to go into the world’s markets and buy our supply. We have not intentionally either bought or sold any seed of any kind which we did not believe was pure. All seedsmen have found it absolutely necessary to issue a non-warranty with all sales, consequently, if market gardners should write us, we will inform them how and where seed should be purchased, and we will issue a non-warranty, but we have always tried to be honest, our stock being selected from the best the results over which they have no control. An honest man will bear the charge of a little sawdust or a little extra weight, to prevent the charge of dishonesty, therefore we wish to state as emphatically as possible that we have not in a single instance adulterated any seed of any kind, and for our own protection as well as for the protection of our customers, samples from each lot purchased this season will be sent to Washington for examination.

**C. O. D. ORDERS.** Parties ordering goods to be sent C. O. D. must enclose with the order one-third of the amount, as a guarantee that they will accept the goods upon arrival; and all C. O. D. goods must be by express, as railroad companies will not do any collecting.

**EXTRA PARTS.** Parties sending us broken castings for patterns on repair orders must pay for express charges, as we cannot afford to pay express on old castings, unless otherwise noted, 10 cents, which may be returned, provided they are in good condition and return express charges prepaid. Returned bags must always have the name of the sender on the label. When customers fail to include pay for bags we deduct enough seed to cover the amount. We have been compelled to do this as many customers forget that the cost of the bag is often times the profit on the goods.

**BAGS USED IN SHIPPING SEED.** Two bushel bags, 50 cents; all other sizes, unless otherwise noted, 10 cents, which may be returned, provided they are in good condition and return express charges prepaid. Returned bags must always have the name of the sender on the label. When customers fail to include pay for bags we deduct enough seed to cover the amount. We have been compelled to do this as many customers forget that the cost of the bag is often times the profit on the goods.

**HOW TO ORDER.** Give your name, town, state and county, and do not forget the post-office, as that is the most important of all.

**TERMS.** As there are no means of ascertaining the financial standing of farmers at a distance, we must have cash with the order or some satisfactory bank reference, but the liberal discount we offer for cash will more than pay the customer for sending the money when they order the goods.

**HOW TO SEND MONEY.** There is a number of safe ways to send money to us. Either by express or Post Office Money Order. We are not particular how it comes, as long as we receive it. Stamps are always acceptable, and very handy to send on small orders. Wrap them in oiled paper or in the original wrapping.\n
**ORDER EARLY.** You may think it is because we are in a hurry to get your money that we advise ordering early. Not so! But early orders always get the best of attention, and the best of everything. As a great many varieties of vegetable seed are short on account of the wet weather this past season, let us understand that it is late to order but left, for the reason that there is not enough 40° seed to supply the demand.

**MARKET GARDENERS.** Parties wanting ten or more dollars worth of bulk seed will do well to write us for market gardeners’ prices for each order, if received early, we can make lower prices than are quoted.

Printed by THE DAVIS PRESS, WORCESTER, MASS.
NOVELTIES AND SPECIALTIES
IN VEGETABLE SEEDS FOR 1906

A New Strain of Horticultural Pole Bean.

Excels in Earliness, Quality, Handsome Appearance and Productiveness.

This new bean, a strain of the well known Worcester Mammoth, equals the latter in size of both beans and pod, is from a week to ten days earlier and is fully as productive. When ready for use or market as shell beans, the pods are of golden yellow with splashes of vivid carmine giving them a strikingly handsome appearance. The large beans closely resemble the other Horticultural varieties and are equal in quality to any. It is also desirable as a string or snap bean the large pods being, at the proper stage of growth, brittle, tender, and stringless, of a beautiful waxy yellow and the yield far in excess of the dwarf wax sorts. The several good qualities of this variety should induce a large planting both for market and home use.

½ pt. 10c., pt. 20c., qt. 35c., 2 qts. 60c., ½ pk. $1.00, pk. $1.75. By mail postpaid, ½ pt. 15c., pt. 30c., qt. 50c.

THE HODSON WAX BEAN.

A New and Entirely Distinct Variety.

The introducers say of this: “The Hodson Wax Bean has been grown for us several years, and we now have a sufficient stock to enable us to offer it to the trade for the first time. The photograph of the plant here shown is of an average bush, which measures about 29 inches in height and 26 inches across. This variety is a remarkably rank grower, sturdy and productive, thus far has been entirely free from rust and blight. The plants are well loaded with long, straight, handsome pods which somewhat resemble the pods of the Davis Wax and Wardwell’s Kidney Wax, but are plumper, straighter and longer, averaging about seven inches in length, while the color is a clean, light yellow, making them very attractive.”

“The pods are brittle and tender, of fine texture and pleasant flavor. They are free from fibre, and if picked when they should be, are stringless.”

“This variety will be a boon to the market gardener and trucker on account of its vigor and productiveness and its freedom from blight and rust, while the fine table quality of the long handsome pods will render it of special value to the private gardener.”

“Among the many varieties of beans in the trial grounds, this sort was easily distinguished on account of its rank growth, its vigor and its productiveness.”

½ pt. 15c., pt. 30c., qt. 50c., 2 qts. 85c., ½ pk. $1.30, pk. $2.75. By mail, postpaid, ½ pt. 20c., pt. 40c., qt. 65c.
THE VOLGA CABBAGE.

A NEW VARIETY OF GREAT MERIT.

This New Cabbage was introduced to the trade last season by the veteran seed grower, Mr. C. L. Allen of Long Island, whose claims for it are as follows:

1st. Uniformity. In one field of three acres there was not a single plant that showed, in any respect, any variation from a true and valuable type.

2d. Uniformity and solidity of head. In this respect it is a vegetable wonder, as the heads are of about equal size and shape, weighing from 12 to 15 pounds each.

3d. Quality. Unlike most types, the heads are perfectly solid, and the stem does not run up into the head nearly so far as in all other types and the flesh is exceedingly firm, tender and white, making it a most desirable form for all purposes for which cabbage is used.

4th. Hardiness. In this respect we have never seen a type which would favorably compare. Last winter, the most severe ever known in this section, did not inflict the slightest injury to the Volga. While all other kinds suffered terribly, not a head of this was lost. We think this point of hardness of great importance to the shipper.

5th. This type is remarkable for its quick growing habit, as are all vegetables that come from cold countries, We have noticed particularly this type, and find that it will mature its heads fully two weeks earlier than any of our late growing kinds. Let us be fully understood in this matter. If we sow the seeds of any of our winter Cabbages on the 1st of July, and the Volga on the 15th, the latter will perfect its heads first.

Pkt. 10c., ¼ oz. 20c., oz. 35c., 2 oz. 60c., ½ lb. $1.00, 1 lb. $3.50.

CROSBY'S EGYPTIAN BEET--THE COOK STRAIN.

A GREAT IMPROVEMENT ON THE ORDINARY STRAINS.

While we have in past seasons and offer now in our general list a strain of this variety which has compared very favorably with all that we have seen, we are always looking for the best. Mr. Cook of Shrewsbury, Mass., well known in this vicinity in former years as a successful market-gardener and fruit grower and now a grower of cabbages, has for years a reputation for bringing to this market exceptionally fine beets of this variety. During these years he grew seed in limited quantities and constantly endeavored to improve the strain. We secured seed of Mr. Cook four years ago and have, after careful selection, succeeded in growing a sufficient stock of seed to now offer it.

We made our selection of roots in the field as we pulled them and paid particular attention to the tops, that they should be small and of a uniform dark color as well as to uniformity of color and shape of roots. Those who are familiar with the Crosby's Egyptian know how difficult it is to eliminate both light colored tops and roots, in fact how difficult it is in many ways to keep true. The crop of roots from which we made our last selection was more nearly free from objectionable specimens than any we ever grew, but determined to make this strain a superior one, only a small part of the crop was taken for seed. In considering price it should be borne in mind that even a slight improvement in a strain makes it well worth double the unimproved and while as we have said, we offer another strain which is by no means inferior to those generally offered, we believe this well worth the difference in price. Stock limited. Pkt. 5c., oz. 12c., 2 oz. 20c., ½ lb. 35c., 1 lb. $1.00.

New Red Cabbage, "Othello"

This new cabbage is from an old and reliable grower in Germany. We quote his description of it:

"This new Red Cabbage, which I introduce this year for the first time, is calculated to put into the shade every variety known in the trade, as it surpasses every one of them by far in size, productiveness, solidity and keeping quality.

It has all the superior qualities of the true variety of the largest Flat White Brunswick Cabbage, being of the same great size as the latter, which exceeds by far all known varieties of Red Cabbage. It has also the same shape, forming a smooth, flat, slightly arched head, is exceedingly firm, deep glossy black-red and is the best keeper during the winter.

These qualities mark the Cabbage "Othello" as the largest, most productive, and best keeping dark red variety in the trade." Pkt. 20c., 3 for 50c.
Extra Early Red Cory Corn--The Original Strain

It being called to our attention by the complaint of a market gardener in this vicinity that he had not had of us nor was he able to find elsewhere Early Cory corn that was as early as that he once had, it occurred to us that if this statement were correct we ought to endeavor to secure stock that was right in this respect. Being well acquainted with the grower who grew the first crop of seed of this variety and feeling sure that if any one had such a strain it would be he, we wrote him stating the nature of the complaint that had been made. In his reply he said that the complaint was entirely reasonable and that he was aware that the stocks of most seedsmen were later in maturing than that which he introduced and was yet growing and that if we wished he would send us one or two bushels of seed so that we might prove to our satisfaction that it was earlier. We have experimented with this strain for two seasons, planting it on our own grounds and furnishing a few gardeners with seed. These all agree with us that it is at least a week earlier than the strains generally offered. Whether this earliness is due to a better selection of stock seed or to the section in which this has for a long time been grown, we are not now able to determine, but of this we are certain, that it is earlier than any strain of Red Cory we have had and also earlier than the strain of First of All we now have. A few days earlier means profit. Try it. ½ pt. 12c., pt. 18c., qt. 30c., 2 qts. 50c., ⅛ pk. 85c., pk. $1.50, bush. $5.00.

THE DAVIS PERFECT CUCUMBER

This new cucumber now offered for the first time originated with Mr. Eugene Davis who was the originator of the Davis Kindey Wax Bean. He says of this:

“For several years I have been experimenting and trying to get a better strain of cucumber for forcing under glass as well as a good cucumber for growing out of doors, and after repeated failures I have at last succeeded in fixing a perfect type, combining quality, shape, color and productiveness. Am very sorry we did not get a picture of the crop. Everyone who saw the crop this year say they never saw anything to equal it. In color, a dark glossy green; shape, slim and symmetrical, with an average length of ten to twelve inches. They never grow pussy and hold their color until nearly ripe. It is fine as the seeds are very soft when the cucumber is fit when they turn white without a sign of a yellow streak on them. The quality for table use, is very tender and brittle and of exceptionally good flavor.

Another strong point of merit is its splendid shipping qualities. It seems to hold its color and brittleness long after being cut.

On account of its being such a strong grower it is able to resist the cucumber disease which works destruction among so many of the best Forcing varieties.

I shipped out-of-door stock this season to Chicago which brought me $1.00 a bushel, when ordinary out-of-door grown stock was only bringing 40c a bushel at the same time. They sold for hothouse cucumbers, even experts could not tell the difference. I shall plant all I can next year for Chicago, Cleveland and Detroit markets, where they brought the highest market price this season.

It is as early as the earliest strain of White Spine and it out-yields by far anything I have ever tried. This New Cucumber certainly has the fitting qualities to make it very popular when known. I might add that it is no experiment with me as I have been growing the cucumber for profit for the last two years and it has proved all I claim for it.”

Pkt. 20c., 3 pkts. 50c. Special offer of seeds in packets, page 17, does not apply to this. 4 ⅞.

THE Good Times Potato.

A fine new late variety which we offered for the first time last season. Tubers are very attractive, of fine uniform shape and excellent quality, in color somewhat lighter than the Rose. With other good features it has one of especial merit, that is regardless of how large the tubers grow they are never proyng or ill-shaped. The vine is of vigorous growth, heavier than the Great Mountain and has so far proved rot and rust proof. The Good Times is an extremely productive variety, on our own grounds out-yielding all others. It ripens about with the Green Mountain. We believe it is destined to be a popular variety.

Pk. 55c., bush. $1.75, bbl. $1.50.
THE EUREKA ENSiLAGE CORN.

THE LARGEST, LEAFIEST, MOST PRODUCTIVE

From a photograph of the Eureka when ready for cutting, sent us by Neal and Angervine of Coldwater, Michigan. See their letter following.

The Eureka was originated in Virginia and is the result of continued selection for many years of seed from the largest plants and those bearing the most leaves. Much more attention is, or was at least at that time, given there to growing leafy strains of corn, than in the north, as the leaves only were used (to a large extent in place of hay) and in fact were the only dry fodder that most farmers in that section had, as grass was then but little grown there. We made the claim at its introduction and have continued to make it yearly since, that the Eureka was the largest, leafiest and therefore the most productive variety, superior for ensilage, to any other. It has now been grown in nearly all sections where ensilage corn is used, from the Atlantic to the Pacific coast and, notwithstanding the reports of some experiment stations that it does mature ears sufficiently to make as rich ensilage as some of the smaller varieties, our sales have, from very small ones for a few years after its introduction, increased since rapidly, until the past season they considerably exceeded in number of bushels those of the Lenning, previously much the most popular variety for ensilage. We have no hesitancy in saying, despite an occasional unfavorable opinion (largely from the source previously indicated) that the consensus of opinion of those who have used the Eureka is, that it is the most profitable variety in cultivation.

We have in previous Catalogues called attention to the remarkable germination of seed of the Eureka and offer this season the same high grade of seed (shelled), but such is the growing demand for seed of this variety on the ear, that we offer it in this way this season. Ears will be shipped in strong crates holding 70 pounds (the standard equivalent for a bushel of shelled corn). The cost of the crate and other additional expense necessitates a slight increase in price.

Price, shelled, Pk. 60c., bushel, $2.00; three bushels, $5.00; bags included. Crates of 70 lbs., on ear, $2.50. Not less than a crate shipped on ear.

N. B. Bags used for Eureka this season will be much heavier and stronger than those we have formerly used and equal in all respects and for all purposes to the ordinary cotton bag.

was considerably more mature than your corn and I suspect that the chemical analysis which we shall make later will show rather more food value per acre from the latter variety.

Yours truly,
C. G. Williams,
Agriculturalist.

Commenting on the letter preceding and the one following we should say that the yield obtained by the Ohio Agricultural Experiment Station was very light, not much over half what many claim to get, and considerably less than the average, while the opinion of Mr. Ashton indicates that he had a yield far above the average. Note that the address of both is plainly given and we venture to say that doubtless either would be pleased to furnish information concerning their respective yields.

BRASSER FALLS, N. Y., Oct. 31, 1904.

Gentlemen,—Referring to your inquiry asking about the Eureka seed corn which I purchased of you this season, I will say that I think it beats anything I have ever seen for ensilage corn.

I planted this season 15 acres, mostly Eureka seed corn and another variety which I have usually planted, and the result was, that Sept. I offered to bet $10.00 or more that I could cut 100 tons of Eureka Green corn from one acre of ground and even after advertising my offer I could find no takers.

When I filled my Silo, I cut 17 big loads of more than 2 tons each load from 57 rods of ground or less than 3 3/4 of an acre which would be a yield of more than what I claimed.

I shall plant Eureka seed next year using less seed per acre as I find that nearly every kernel germinated, while much of the other kinds the farmers had to plant here was poor seed and they had to use more seed than we wanted to insure a good stand.

Yours truly,
W. H. Ashton.
PEAS

THREE GIANT PODED VARIETIES

THE GRADUS PEA

During the last quarter-century many large podded late varieties of peas have been introduced so that for several years a new variety of this type has not excited the same degree of wonder and admiration that the earlier introductions did. But when a variety was introduced having pods and peas as large as the largest late variety and was nearly as early as the earliest it at once became the wonder of all, and nothing in the vegetable line introduced for years has been more generally appreciated by all who have grown it than the Gradus Pea. That it and the following variety will eventually be the leaders and to a great extent displace all others of the extra early sorts is beyond a doubt unless perchance a new variety should appear of greater merit of which it would be difficult to conceive. While the pods of the Gradus are about equal in size to those of the Telephone the vine is only about ½ feet in height, a desirable feature to many. The pods are much better filled than those of the Telephone while the peas are fully as large and are equal in quality. These are ready for the table or market so soon after those of the Early Alaska that the difference in time is hardly worth noting, and considering what we have already said regarding the quality it is almost unnecessary to say that in-flavor, tenderness and sweetness a comparison is hardly possible, so greatly in these respects does the Gradus surpass the Alaska. Those who have grown the Gradus will, we are sure, continue to do so, while those who have not should by all means. The pea offered as Prosperity is simply the Gradus—a name for an English variety for a continuation of which there seems to be no good reason. | pt. 15c., pt. 30c., qt. 50c., 2 qts. 90c., | pk. $1.50, pk. $2.75, bush $10.00.

Thomas Laxton Pea

So superior in its combination of good qualities, to all other early varieties has the Gradus proved that it is somewhat difficult to conceive of a variety of the origin that would surpass it or indeed equal it. But the originators of the Thomas Laxton, who were also the originators of the Gradus, claim for it superiority and having given us so good a variety as the Gradus their claim for this their later production is certainly entitled to consideration.

The Thomas Laxton was originated by Messrs. Laxton Bros., of Bedford, England, who have been the originators of many good varieties, and was the result of crossing the Gradus with some other early variety. In a circular introducing it to the trade in this country the following claims were made: "The finest and most remarkable early pea yet introduced. As early as the first earlies. Pod double the size of ‘Nepi Ultra.’ A true marrowfat. Earlier than our ‘Gradus.’"

In earliness, size of pod and peas and quality it perhaps equals but does not surpass the Gradus, but it is generally conceded by those who have grown both to be considerably more productive, which is our main reason for offering among our novelties a variety so nearly similar in other respects. The vine grows a little taller than that of the Gradus about 3 feet in height under ordinary cultivation. Both foliage and pods are of a darker green which will be considered by many a desirable feature. So nearly identical with the Gradus is it in other respects that it is hardly necessary to say more of it except to again call attention to its evident greater productiveness. One of the two at least should be in every garden. | pt. 15c., pt. 30c., qt. 50c., 2 qts. 90c., | pk. $1.50, pk. $2.75, bush $10.00.

The Admiral Dewey Pea

A Late Variety -- The Largest Podded Ever Offered

Our observation of this pea entirely accords with the description and claims of the introducers who are among the oldest and most reliable growers of peas in this country. They say of it as follows:—“During the season of 1894, while watching the growth of a small sample of a new and most desirable pea sent us from Carlisle, England, we found a few vines entirely different from the main crop, and entirely distinct from any pea we had ever seen. These few vines were carefully removed, and succeeding crops have shown them to be remarkably uniform and distinct. This is without exception the largest podded pea of which we have any knowledge, and when to this is added the heavy cropping and highest quality, it can readily be seen that it stands at the head of its class. Height three and one-half feet; foliage, vine and pod rich, dark green, remarkably healthy and vigorous, producing in abundance pods of largest size, frequently six inches in length, beautifully shaped, well filled with peas of largest size, tender and first-class flavor; seed green, wrinkled. Undoubtedly the best of all the class of long vine, large podded peas.” | pt. 10c., pt. 20c., qt. 35c., 2 qts. 60c., ½ pk. $1.00, pk. $1.75, bush $6.75.
Early Surprise Pea

This is the very earliest of the wrinkled varieties. Compared with the extra early smooth sorts it will be found as early as the earliest, and decidedly earlier than some. The vines grow about 2 feet high and need no bushing. The pods are well filled, containing six or seven peas, not as large as those of the American Wonder, but are produced in much greater abundance. In quality it compares favorably with other wrinkled varieties, which as all know are much superior in flavor to the smooth peas. Its extreme earliness for a wrinkled variety, great productiveness and fine quality, have already made it a popular variety, and had it not been that the Gradus with its wonderful size for an early pea was introduced about the same time, this would undoubtedly have attained a greater popularity. As it is, it with the Gradus has displaced too considerable extent the early smooth sorts. ½ pt. 15c., pt. 25c., qt. 35c., 2 qts. 45c., ½ pk. 80c., pk. $1.05, bush. $6.00.

PRIDE OF THE MARKET PEA

AN IMPROVED STRAIN.

While not equal in quality to many other late peas, its hardiness, great productiveness, very dwarf habit for a late pea, and large, handsome pods, make it popular with some, and as its tendency to sport has to a considerable extent been overcome, we are induced to again offer this variety. The vines grow only about 20 inches high, and do not therefore require bushing, while it produces in great abundance large, handsome pods, equal in size to those of the Stratagem, deeper green in color, and more attractive. As its dwarf habit allows of close planting, it will be found to produce nearly as large a crop as the tall sorts which require brushing. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 80c., pk. $1.50, bush. $5.00.

New Dwarf Pea Sutton's Excelsior

This new dwarf pea is from Sutton & Sons of Reading, England, who are famous the world over and who have originated many of our finest vegetables and flowers. It has not yet to our knowledge been generally catalogued, but is without doubt worthy of attention. Messrs. Sutton & Sons say of it that it is "Similar in character to Sutton's Harbinger, (a superior quite dwarf variety) but is taller, and matures two days later. It has the advantage, however, of much larger pods, which are borne in great profusion. Ready for picking with American Wonder. In flavor Sutton's Excelsior is quite equal to many of the favorite late peas."

The growers in this country with whom we contracted for growing our supply of seed have an abundant opportunity to judge of the respective merits of the many new varieties offered, as all are tested by them, both of English and native origin. Their description of this is as follows: "In earliness, ripening with Nott's Excelsior, resembling it in habit and shape of vine, only more vigorous, growing to a height of 18 inches, we have a longer, broader pod filled with larger peas of most delicious flavor. Seed large, pale green, wrinkled. This is a pea of real merit and well deserves to head the list of dwarf wrinkled early peas." ½ pt. 15c., pt. 20c., qt. 30c., 2 qts. 45c., ½ pk. $1.00, pk. $1.75, bush. $5.00.

New Early Lettuce "May King" A Novelty From Germany

This new lettuce from Germany is very highly recommended by prominent seedsmen there, and we believe will be found a decided acquisition. We quote entire the description found in the novelty list of a German grower.

The great value of this Lettuce, which has actually been cultivated in quantities for the markets of Berlin and other large places, with the greatest pecuniary success, and of which the most favorable reports have been received from all parts, is its surprisingly rapid development, its size, weight, tenderness, hardness, and the fact that it not only grows well in moderate heat, but develops its large crop of magnificent heads in the open ground about 10 days sooner than any other sort.

"May King" Lettuce is not fastidious in the choice of the soil; it has stood well a frost of 5° Cels., and even the earliest sowings have never been attacked by mildew. In March 1907 the razer planted 1½ acres in an open field and in spite of much unfavorable weather the whole of the crop was cleared away between the 12th and 31st May. The heads yielding an average weight of about 1½ lbs., many weighing 1½ lbs. and more, and standing from 10 to 14 days after attaining maturity without running to seed.

The head is of globular shape, hard and well closed: the leaves are light green, with delicate ribs and finely waved: the interior is of a clear yellow, very tender and of fine flavor. Pkt. 10c., ½ oz. 25c., oz. 40c.

Crisp-as-Ice Lettuce

This is not a new variety, but is one which cannot be too highly recommended. Of all the midsummer cabbage varieties which we have eaten, this surpasses all in fine, delicate flavor, crispness and tenderness, and has no equal for the home garden. The heads are solid, very large when well grown, and so brittle and tender that it well deserves the name Crisp-as-Ice. The leaves are thick, glossy, crimped and curled, outside they are variegated, dark bronze and green, while the heads when cut open show a rich creamy-yellow heart. Its extreme brittleness and color both prevent it being a popular market variety, but as we have said, for the home garden it has no equal. Pkt. 5c., ½ oz. 10c., oz. 15c., lb. 60c.
New Radish, Crimson Giant Forcing.

This new Radish, combining both earliness and great size, while well suited for forcing, is equally adapted for out-door cultivation. While it grows much larger than other forcing varieties, it does not become pithy under glass nor out doors, even when twice as large and a week older. When full grown it has a circumference of five to six inches and weighs from 1½ to 2 ounces. Color a beautiful crimson carmine. The roots vary somewhat in shape some being round while others inline to oval. Its earliness, size and quality will, without doubt, make this a popular variety. Pkt. 5c., oz. 1 c. 2 oz. 15c., ½ lb. 25c., lb. 75c.

New Squash, The Delicious.

This new Squash is the product of the work of years in careful selection, crossing and isolating. In form it ranges between the two examples shown in the illustration. It is almost uniformly of a green shade, with occasionally a blue specimen, it being just about as pure in this respect as was the original Hubbard. In size it also closely follows the original Hubbard, which weighed between five and ten pounds. In thickness of flesh it surpasses nearly every variety, the color being a dark orange. For table use no squash compares with it in its remarkable combination of firmness, and compactness of grain, dryness, sweetness and exceeding richness of flavor. It is a fall and winter squash, being excellent at all seasons, but like the old Hubbard, though at any time excellent, does not acquire its best quality until winter. When but half grown it will be found to surpass in quality most varieties when fully ripe. Pkt. 5c., oz. 12c., 2 oz. 20c., ½ lb. 35c., lb. 75c.

New Tomato Livingstone's Globe

This is another new variety originating with the Livingsons, of Tomato fame. This fact of itself should warrant any one in giving it a trial. The originators describe it as follows:

"In shape it is notably distinct from all others, being a beautiful globe, with quite a goodly percentage of elongated (stem to blossom) fruits. See illustration which gives a fairly good idea of its shape. This peculiarity permits of a much larger number of slices to be taken than is possible with the flat varieties. It is among the first to ripen; fruit of large size, and a good marketable size is maintained throughout the season; always smooth, firm fleshed, and has few seeds, especially in the early fruits; ripens evenly through and through; a fine glossy rose in color, tinged with purple; very productive, the plant is always loaded with fruit, as it has joints at frequent intervals and each joint produces large clusters of from 3 to 7 fruits. A remarkably good keeper, especially adapted to slicing or eating from the hand as the flavor is very delicate and agreeable. A good general cropper and will be found well fitted to greenhouse growing or for early crop on stakes or trellis. The type is well established, any important variation being difficult to detect. Every grower of Livingstone's New Globe will find it in strictly a new variety and one of great practical value. Those who grow tomatoes to sell will be pleased, as the beautiful and attractive globe-shaped glossy red fruits will sell readily at the top price."

Pkt. 10c., ½ oz. 50c., oz. 50c., ½ lb. $1.50.

New Tomato--June Pink.

The introducers of Spark's Earlana, one of the most popular early red varieties ever offered say in an introductory circular to the trade, that knowing that certain markets demand a pink tomato they now offer the June Pink confident that it will be as popular as their previous introduction. We quote entire their description:

"The 'June Pink Tomato' in habit of growth is similar to the Earlana. The plant is neat and compact, branching freely, with fruit hanging in clusters of six to ten fruits, both in the crown and at the forks of the branches. Under exactly the same conditions as given Spark's Earlana and Chalk's Jewel, the 'JUNE PINK' yielded as much fruit as either, and the vine after the crop had been harvested were greener and brighter, and showed no tendency to blight. It ripens fully as early as Spark's Earlana and quite ten days to two weeks ahead of Chalk's Early Jewel.

The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or any green core. The fruit will average 2½ to 3 inches in diameter, and from 2 to 2½ inches in depth. The skin is reasonably tough so that it is excellent for shipping purposes.

In color, it is a bright, pleasing pink, and in markets where a pink tomato is desired will bring 25 per cent. more in price than any red variety. It has the further quality, making it especially desirable for private use, of continuing to bear and ripen fruit up until frost.

In offering the 'JUNE PINK TOMATO,' we do so with every confidence that it will at once take the unique position in pink varieties which the Earlana now holds over the whole country in the red sorts.'

Pkt. of 40 seeds, 20c.; 3 pkts. 50c.; 7 pkts. $1.00. Our discount on packets, page 17, does not apply to this.

Tomato--Chalk's Early Jewel.

This variety is claimed by the introducers to be the 'largest, smoothest and finest flavored extra-early Tomato in cultivation.' It was offered to the public after seventeen years of selection to establish hardiness and earliness. The plant is of compact growth and very productive, probably surpassing in this respect the Earlana. The fruits do not ripen as early but are larger, very solid, ripen to the stem without cracks or core, and are of fine flavor. Pkt. 5c.; ½ oz. 15c.; oz. 25c.; 2 oz. 45c.; ½ lb. 75c.
ANNUAL

Such fine foliage, whether in the background or in the open, this incomparably beautiful plant is charming. There is no plant that is easier to grow.

While comparatively new, this has been tried for several years and has proved to be all that the originator claimed. It was developed from the common field daisy of the East by Mr. Luther Burbank of Santa Rosa, Cal., who on account of his many wonderful creations has been termed the Wizard of Horticulture. Its first qualification is hardness, Mr. Burbank claiming that it can be grown out of doors by every body, where it is not cold enough to kill oak trees. It is perennial, blooming better and more abundantly each season. It can be multiplied rapidly by simple division, and is not at all particular as to soil. It blooms for several months, in California nearly all the year. The flowers are of the purest glistening white, extremely large and graceful, averaging four inches in diameter, and have often a greater. They have three or four rows of petals, and are borne on stiff, wiry stems, nearly two feet in length. They are among our best flowers for cutting, remaining fresh and in good condition for two weeks or more after being cut. But few flowers possess as many good qualities. Perennials are now more popular than ever. This should be in every collection of such plants. Originator's stock. Pkt. 15c.
A Beautiful Hardy Perennial
EASILY GROWN FROM SEED
Stokesia Cyanea
...or...
(CORN FLOWER ASTER)

THIS beautiful hardy perennial, while a native of this country, is not as well-known as it should be, and like some other plants is better appreciated away from home being much more generally grown in Europe than here. As a single specimen or group in the border its place can hardly be filled by any other hardy plant, while for massing it ranks with such hardy perennials as the Phlox, Peony and Iris. It is of the easiest culture, succeeds in any sunny location, and blooms the first year from seed. It grows from 1 to 2 feet high and bears freely from July until frost beautiful lavender blue Centaurea-like flowers averaging more than four inches in diameter. These are valuable for cutting, supplying a shade of color not especially plentiful at any time. Pkt. 10c.

New Large-Flowering Sweet Sultan. (Centaurea Imperialis)
So much superior is this new strain to the old well-known type of Sweet Sultan that we are induced to place it among our novelties. This class is by far the best of all the Sweet Sultans for cut flower purposes. The large flowers are borne on long stiff stems, are of very graceful and artistic form, deliciously fragrant and keep well in water, lasting a week or more if cut just as they are about to open. The colors are varied from a pure glistening white to purple through shades of pink, rose, crimson, lavender, lilac and violet. The plant is of much stronger growth than any other Sweet Sultan, and of easy culture, thriving in nearly all situations but preferring a cool one. Finest mixed. Our own mixture of the separate colors. Pkt. 10c.

CALLIOPSIS. Hybrid Superba.
A new variety of that ever popular annual, the Calliopsis, which for freedom of bloom surpasses most others of this free-flowering family. The plant is of dense bushy form as shown by the illustration, grows about 16 inches high and is covered throughout the season with beautiful flowers in all shades of yellow and orange to the deepest velvety brown. Effective in groups or borders and very desirable as cut flowers. Of the easiest culture. Pkt. 5c.

Double Dwarf Erfurt Clove Pink.
(Dianthus plumarius nanus fl. pl.)
This new strain of hardy perennial garden Pink is a great improvement on the old Clove Pink, flowering fully two weeks earlier, is of dwarf habit, not over 12 inches high and of much more compact form. It possesses the same spicy fragrance of the old and has a much richer variety of coloring. The Clove Pink should be in every collection of perennials, in fact in every flower garden if possible. Pkt. 20c., 3 for 50c.

Single varieties may be found in our general list under the head of Hardy Carnations. Unlike most seedsmen we list this class (Dianthus plumarius) under the head of Carnation (Dianthus caryophyllus) on account of the similar color of its foliage and fragrance of the flowers and to make the class distinctive from that of the common China or Indian Pink (Dianthus chinensis) and its many varieties found in our general list under the head of Pink.
**Two New Dwarf Nasturtiums**

*Queen of Tom Thumbs with Silvery Variegated Foliage*

This new and entirely distinct Dwarf Nasturtium is one of the most charming novelties, strikingly beautiful, and is destined to be one of the most popular ever introduced. The flowers are a rich bright crimson, forming a striking and pleasing contrast to the silvery variegated foliage. Were there no flowers, the plant would still be worthy of cultivation, because of its unique foliage. The plant blooms as freely as other varieties of Nasturtiums, and, unlike most other variegated plants, comes true from seed; producing 90 per cent, with true variegated foliage. It is very dwarf and compact, making it a great acquisition as a bedding plant. Pkt. 10c.

A pleasing contrast of foliage could be secured by planting a bed with the Queen of Tom Thumbs, Snow Queen, Empress of India, King Theodore and Cloth of Gold. (See general list for descriptions of the last three.) One packet each of the five varieties, 25c.

---

**Nasturtium, Snow Queen**

This new Dwarf Nasturtium is a selection from the Lilliput, and is introduced as the first real white Nasturtium. The flowers, however, when first opened, are of a yellowish tinge, soon turning white at the edges, and on the second day the whole flower becomes pure paper-white. The plant is of compact bushy form with light green foliage, and produces freely its attractive flowers well above it. Notwithstanding the already large list of varieties, this will be found a pleasing variation. Pkt. 10c.

---

**New Climbing Nasturtium, Black Prince**

This new variety is claimed by the introducer to be the darkest colored of all climbing Nasturtiums and much darker than the well-known King of the Blacks. When buds are unfolding the color is a deep blackish-purple, which changes to a velvety black when flowers are fully expanded. Another striking and very desirable feature is the color of the foliage, which is, like that of the Dwarf Nasturtium “Empress of India,” a beautiful purplish green, having a bronzy, metallic effect. The plant is a strong, vigorous growth, and blooms freely. Planted with the Golden Leaved Scarlet, Pearl and Salmon Queen, a striking and effective display could be secured. Pkt. 10c.

---

**Dwarf Shirley Poppy**

This dwarf strain is identical in every way with the regular strain, except in height, and we think has even a greater range of colors and shades than that. It will be found more suitable for bedding in some places than the taller growing strain. It should be remembered that poppy seed should be sown where the plants are to remain, as they seldom live when transplanted, and also that best results are secured by sowing seed as early as possible. Pkt. 5c.

---

**Dwarf Shirley Poppy, Snow White**

No distinct colors have as yet been offered of the very popular Shirley Poppies. This is a selection from the dwarf strain made by a noted German grower, who considers it of great merit. A large proportion of the plants produce pure white flowers, but if, as sometimes happens, some have a slight rose tinge toward the tips of the petals, it is no great objection, and perhaps adds to their attractiveness. Pkt. 10c.
New Aster, Giant-Comet "Ruby"

The large, loosely but gracefully built flowers of the Comet Aster are perhaps the most admired of any form of this popular annual. In the Giant Comet Ruby we have a gem of this class. As the illustration shows, the flowers are finely and beautifully curled. In size they are from 3 to 5 inches in diameter; of a lovely bright scarlet when first open, changing later to a deeper shade, and are borne on long stems. The following, quoted from a paper published in Germany, shows the distinctive character of this variety: "This Aster was exhibited on September 24th in Berlin; few of those present recognized at first sight the flowers as Asters; they were taken for Dahlias or Chrysanthemums, until a closer inspection revealed their identity, which proves how this Aster differs in character from others." We believe it will be found a decided acquisition, of great value for cutting, and suitable for all decorative purposes. Pkt. 25c.

New Annual Ever-Blooming Hollyhock

One of the Most Remarkable Novelties Ever Introduced

The stately, beautiful flower, termed by the poet "Queen Hollyhock," has ever been a favorite, but many admirers of it have been deterred from cultivating it, because it can seldom be had in bloom the first year from seed, and perhaps as many others have become discouraged in their attempts to grow it, because of the liability of the young plants to winter-kill, unless given especial winter care. So that while the hollyhock has probably been more largely grown the past ten years than for sometime before, its cultivation has yet been comparatively limited. In this new annual strain we have one with which all can as easily succeed as with any other of the common annuals. Seed sown in the house in March or April, and transplanted to the open ground in May, will commence to bloom in July, and continue until cut down by frost. The range of color is fully equal to that of the best of the old or common type, and in peculiar and charming blending it perhaps surpasses any other strain. The flowers are also of diversified form; there are double, semi-double, and single flowers; in some the petals are smooth edged, while others are fringed, and both types have many other diverse features. All are beautiful. The plant is of strong, vigorous growth, attaining a height of from 8 to 10 feet, and is of branching habit. The latter feature may be augmented, if a more bushy form of plant is desired, by pinching the main shoot, which would encourage the growth of side shoots, increasing the blooming capacity of the plant, which is naturally great. The flower buds, borne in clusters, vary in maturity from those just opening to the fully expanded flower, and it is owing to this feature that the plant has such a long period of bloom. The ease with which it can be grown, its remarkably free blooming quality, the peculiar diversity of the flowers in both color and form, and the exceptionally long period of bloom, will all serve to make this an extremely popular plant. Pkt. 15c.

Australian Star Flower Cephalipterum Drummondi

A half hardy annual lately discovered in West Central Australia, and never before offered. This surpassingly unique and beautiful plant grows readily from seed in any ordinary garden soil. The fragrant flowers, of a peculiarly pleasing rosy crimson shade, sometimes approaching pure white, are produced in graceful clusters which when cut will retain their form and color permanently, no other flower in any way equaling it in grace and keeping qualities. Full grown plants are about one foot high and the same across. Sow early in the open ground, or may be started early in the house and transplanted. Pkt. 15c.

New Forget-Me-Not (Mysotis) The Sylph

A distinct variety, of very dwarf and compact habit, and having peculiarly broad leaves. These are of a dark shining green and spreading low over the soil, they form a striking and effective setting for the silvery white blossoms, which are borne on strong, stiff stems, rising boldly above the foliage. A productive and charming variety, suitable for either bedding or pot culture. Pkt. 20c.
Howard's New Star Petunia.

The originators say of this: — "For a period of over twenty years we have made it a study to improve the single flowered, medium sized, multi-flora type of Petunia. By a long course of selection, cross-fertilization and breeding, covering these many years, our efforts have been successful in developing a strain of Petunia that for richness of color, beautiful markings, pleasing form of the flowers that cover the plants in wonderful profusion have won the distinction from expert judges of being, 'the most beautiful Petunia in the world,' a new creation,' and 'a revelation to the flower grower.'"

The flower is about two and one-fourth inches in diameter. The ground color is a dark, crimson maroon, with a rich, velvety texture, justly pronounced equal to that of the Pansies. Showing through the ground color are violet veining. From the center start the points of a five rayed star, which broaden half way up, narrowing to a point at the margin of the flower. This star is a very light, blush pink, some almost white, which deepens in color as it reaches the margin and finally blends with the maroon ground color. Over eighty per cent of the plants from seed will produce the star markings. Others with veined and feathery markings on dark or light ground are not less surprisingly beautiful. The plants are free growers, branching freely and attaining an average height of 18 inches. They are remarkably prolific bloomers, single plants often having one hundred or more fully expanded flowers at a time." Pkt. 10c.

New Dwarf Large-Flowered SCHIZANTHUS

The Schizanthus is of the easiest culture, and the beautiful and unique flowers considerably resemble those of some of the orchids, it has therefore been not inappropriately termed the "poor man's orchid." This new dwarf type forms compact pyramidal plants about a foot high, bearing in great profusion beautiful orchid-like flowers of a remarkably wide range of color. Seed may be sown in the spring out-doors where designed to remain, or started early inside and transplanted when weather is suitable. If sown in August-September, and 3 plants put in a 5 inch pot, it will bloom abundantly through the winter. A decided acquisition to the list of easily grown winter blooming plants, and a charming, and effective novelty for door culture. Pkt. 15c.

WILD CUCUMBER.

This is the most rapid grower of all annual climbers, and blooms early in the season and continuously until fall. Of the easiest culture growing wild in the west from sellsown seed. One of the most desirable plants for covering any unsightly object; growing thirty feet, and covered with small white fragrant flowers, followed by an abundance of prickly but ornamental seed pods, it at all times presents a striking and effective appearance. Seed may be sown either in the fall or spring. Pkt. 5c., ½ oz. 15c., oz. 25c.

MIXED CLIMBERS. This mixture is composed of many different climbers, all annuals. It includes all forms of Ipomea listed in this catalogue under that head, and those forms more commonly known as Morning Glory, (both the common strain and the Japanese,) and Cypress Vine. Also Balloon Vine, Canary Bird Flower, Nasturtium etc., etc. In fact nearly all the climbers, which we offer enter this mixture and a few which have not, yet appeared in our list. We believe no more pleasing results can be had from any seeds offered, than from this mixture. If a little pains is taken that the rank growing varieties do not smother or crowd out those of weaker growth, like Cypress Vine, etc, nothing of greater diversity or of more striking effect can be had for anything like the small outlay required for this. The culture is of the easiest, only requiring to be planted in soil of average richness beside a building, (but not where the plants would get the dripping of the eaves,) or beside any tall support, and given the ordinary care required for any common annual. Pkt. 5c., ½ oz. 15c., oz. 25c.

NEW ZINNIA. Double Fringed. A beautiful new type of this very popular annual, the double flowers having the entirely new feature of deeply cut or fringed petals. The flowers are of good size and of perfect form. We offer a mixture of three distinct colors, Pure White, Bright Rose and Deep Carmine. Pkt. 10c.
A Few of the Best, including Both Old and New Varieties

Many of the new varieties have not proved as satisfactory to us as we were led to expect by the glowing descriptions of the introducers, while many of the older ones become greater favorites of ours as we grow them year after year. For these reasons we offer on this page such varieties as A. D. Livoni, Countess of Lonsdale and Dr. Kirkland, and while we shall continue to offer new varieties as they are introduced it will be our aim to retain in our list, and make special mention of them, such varieties as appear to us especially desirable, regardless of how long they have been offered.

Giant Flowered Decorative Dahlia
Mrs. ROOSEVELT

The flowers of this grand variety are of enormous size, generally over six inches in diameter, sometimes eight, always perfectly double and very seldom have other than perfect center; color a delicate blush-pink, shading to clear soft pink. That which makes this variety especially desirable is the combination of largest size and a great production of perfect flowers, equaling, if not surpassing in freedom of bloom many of the smaller flowered varieties noted for their free blooming qualities. The flowers also have extra long, stiff stems making them of great value for cutting. The plant is of strong vigorous growth, taller than most other varieties, and being always in bloom is very effective planted either singly or in groups. 30c.

Dr. Kirkland
A Giant Show Dahlia

While not a new variety this is so greatly superior to any of its class and color and indeed to nearly all others of any class that too prominent a place or mention cannot be made of it. A giant among other large flowers, it is of the finest form, beautiful in color and unlike many other extra large varieties the plant blooms freely. In addition to these features it is that of a very free grower for larger vases. The color is a rich crimson-red. It should be in the possession of every grower of dahlias. 20c., 3 for 50c.

KRIEMHILDE
New Cactus Dahlia

The introducer claims that this variety "has more good qualities than any other cactus dahlia." Whether or not this is true it certainly is a very distinct and lovely variety. Flowers are of medium size and excellent form, color a fresh, delicate pink shading to white in the center. The flower stems are strong and flowers are claimed to surpass all other cactus varieties in keeping qualities which if true make them especially desirable for cutting. The plant is a strong, vigorous grower of upright habit, medium height and blooms profusely. We believe it worthy of trial by all dahlia growers. 20c.

Countess of Lonsdale.

Were we limited to but two dahlias would be this and A. D. Livoni. This surpasses all other cactus varieties in freedom of bloom, and flowers are of the finest form, very seldom imperfect; have fine long stems and are of distinct and pleasing color, a blending of salmon-pink and amber being perhaps as nearly correct as any description possible of its perfect color. The plant blooms early and continuously until frost; and is of open and graceful habit. 20c.

A. D. Livoni

Our admiration for this old variety is such that we have no hesitation in saying that it should head the list of all collections of show dahlias. To those who admire only large flowers this may appear strange as flowers of this are not over medium size, perhaps slightly under. They are, however, of exquisite color, a clear shell-pink, of finest form, never imperfect, have long stiff stems, keep well and are very freely produced. The plant is of medium height, not bushy but always healthy and strong and always in bloom. One of the easiest to grow, first to bloom and excellent for bedding. 10c., doz. $1.00.

For other varieties see pages following flower seeds.
ANNUAL CATALOGUE OF ROSS BROS. CO

GLADIOLUS.

In diversity, beauty and magnificence, no other flower which can be so easily grown and with which success is so nearly certain, can at all compare with the Gladiolus. The range of colorings and markings is practically unlimited, and especially since the introduction of the thousands of new seedlings, may the claim be made that the varieties are numberless.

As a cut flower for vases, within the scope of the amateur no other flower equals the Gladiolus in striking and effective appearance. And in lasting quality but few, if any, compare. If the spikes are cut when only the lower flowers are open they will last for a week, the upper buds opening when kept in fresh water as well or better than when left to open out doors.

CULTURE.—Plant in full exposure to the sun. A light, moist soil one year from sod is the most desirable, but the Gladiolus thrives well in nearly all soils, the exception being a stiff, clayey one. While soil should be well enriched, avoid using fresh manure; use only that which is well rotted. Much the better way is to use land that was well manured the previous year, using none at the time of planting, but giving afterward one or two applications of commercial fertilizer. If possible, avoid planting in the same place for three years. If space is limited, bulbs may be planted in double rows, four inches between the rows and two inches apart in the row; they are, however, more generally planted in single rows about one foot apart, two, three or four inches deep, according to size. The first planting may be made by the middle of April, and successive ones till the first of June, but for late planting the largest bulbs should be reserved.

Before the ground freezes dig up the bulbs, cut off the stalks closely and store in a cool, dry place. The old bulbs may be removed a few weeks later when convenient.

The Gladiolus bulbs which we offer are largely grown by us. All are first class and all first size except our Popular Mixture, which contains some second sized bulbs. Bear in mind, however, that by the term "first size" we do not mean that all are of equal size, as many of the choice varieties never produce large bulbs.

Dozen and one hundred prices include postage. Six sent at dozen rate; 50 at 100 rate; 250 at 1000 rate.

If desired to be sent with other articles by express, 5c. per dozen or 35c. per 100 may be deducted from prices quoted.

THE LEMOINE HYBRIDS, Spotted or Butterfly Gladioli.

This race, although often designated in catalogues as new, was introduced some twenty years ago by M. Victor Lemoine, of Nancy, France, with whom it originated. At its introduction it surpassed all other strains in gorgeous coloring and peculiar marking. Unfortunately a large proportion of the varieties had slender crooked flower spikes with small flowers; but many of these varieties have been discarded and from time to time better ones have been added, until now the class contains some of our most beautiful varieties.

Lemoine Hybrids, Mixed. Doz. 25c.; 100, $1.75; 1000, $13.00. Extra Fine Mixed Lemoine. Contains only improved and named varieties. Doz. 40c.; 100, $2.75; 1000, $22.00.

THE CHILDSI, or Max Leichtlin Hybrids. Giant Gladioli.

This class originated in Baden Baden, Germany, and was the work of the noted bulb grower Max Leichtlin. At the time of its introduction it surpassed all other strains both in size of spike and flower and was of strong, vigorous habit. The range of colors was not great, but there were many new shades of the slaty or smoky-blue type. There has been considerable improvement since its introduction, the work of the introducer in this country, and some of the new seedlings are very fine and all are very large flowered, but there is yet a lack of good white and light varieties. This should by no means prevent any from giving this strain the place it deserves nor from planting it, and we only mention the fact to prevent disappointment to those who, ignorant of it, might plant expecting the usual proportion of such colors.

Choice Mixed Childsli. Contains many new seedlings as well as the best of the earlier introductions. Doz. 40c.; 100, $2.75; 1000, $22.00.

Gladioli and Dahlias should, if possible, have a place in every garden. As indicated by the space we devote to both, we make a specialty of these flowers.
GLADIOLUS — Continued

Groff's Hybrid Seedlings

This new strain was originated by Mr. H. H. Groff, of Simcoe, Canada, and although it comprises only his first introductions it surpasses the work of all other originators in great vigor of plant and equals, if not excels, all others in diversity of colors and markings, except the World’s Best or Gold Medal strain and possibly the latest work of M. Lemoine. It contains colors hitherto unknown to commerce, including shades of Lilac, Lavender and Clematis, not found in any other class except the World’s Best. The only fault which might be found with it is that with all its great diversity there is a dearth of light shades, especially those in which a white ground predominates. (This, however, is remedied in the later work of Mr. Groff—the World’s Best strain following—section 2 containing many white and light shades of wonderful beauty and excellence, far surpassing most of the best old-named varieties.) The great diversity of dark colors and the peculiar and novel shades approaching blue, make these Seedlings well worthy a place among the best Gladioli. The low price at which we now offer them makes it possible for many to have these seedlings who hitherto did not feel that they could afford them, and with the addition of some of the light shades of the following class the mixture would afford a very pleasing diversity.

Groff’s Hybrid Seedlings, Mixed. Doz. 40c.; 100, $2.75; 1000, $22.00.

Groff’s “World’s Best” New Hybrid Seedlings

OR GOLD MEDAL STRAIN.

The World’s Best strain represents some of the later work of the famous hybridizer and far surpasses any other of the world’s commercial strains in diversity and in novel and peculiar beauty. In section 3, especially, are shades never before known to commerce, and the three sections combined afford an unequalled collection of the most desirable varieties yet offered to the public. With the exception of the Gold Medal Collection and Groff’s Special Selections, not yet generally offered, the World’s Best is the latest of Mr. Groff’s introductions, and is without doubt the best strain in commerce.

1. Newest Reds,Scarlets, and Crimsons. Doz. 50c.; 100, $4.00.

2. New White, Light and Yellow. All shades of white, cream and yellow in many combinations, relieved by stains and blotches of rich colors in most pleasing contrasts. Doz. 70c.; 100, $5.00.

3. Rare Blues, in Clematis, Lilac, and Heliotrope Shades. New Hybrids of Papilio Major, practically unknown. Not to be found in any other strain. Doz. 70c.; 100, $5.00.

A NEW RACE — NANCEIANUS

This new race comprises the latest work of M. Lemoine. It differs from the Lemoine Hybrid’s class in having much larger and well expanded flowers with more pointed petals and spikes also are taller and of stronger growth; both flowers and spikes more closely resembling those of the Childsi. It fully equals, if not excels, the Lemoine Hybrids in diverse beautiful and unique markings and greatly surpasses the Childsi in this respect and in size and form of flower and in size of spike and habit of growth to which we have referred, is greatly superior to the Lemoine Hybrids and at least approaches the Childsi, if not equal to it, in these desirable features. The class is destined to occupy a prominent place in this large family of beautiful flowers.

Choicest mixture, of named varieties only: Doz. 70c.; 100, $5.00.

MIXTURES OF GLADIOLI

OUR WORCESTER MIXED.

This mixture, prepared by us, comprises many named varieties, selections from all the various classes—Lemoine, Childsi, Groff’s Hybrids, Extra White and Light, etc., and also selections from the strains known as Burbank’s California Select and Gray’s Ingleside Hybrids. It is our aim to offer a mixture at a reasonable price which shall contain the most desirable varieties possible as well as one of the greatest possible diversity, not only of color but also of form or type. In its preparation many of the best old named varieties are used and also selections from the many new hybrids and seedlings. It will, we are sure, afford very satisfactory results, and we advise its use in preference to any other mixture here offered. Doz. 50c.; 100, $3.50; 1000, $30.00.

Bear in mind that our price per hundred for Gladiolus Bulbs is Post-paid. If desired to be sent by express with other goods, 35 cents may be deducted from price quoted.

OUR CHOICE MIXED.

This is composed largely of the older type (Gandavensis) but also includes some new seedlings differing more or less from that type. The range of colors is good, the bulbs are all first-class and first size, and our aim has been to discard all inferior varieties. It has always given satisfaction. Doz. 30c.; 100, $2.00; 1000, $15.00.

OUR POPULAR MIXTURE.

Bulbs all blooming size but not all first size. This mixture contains a proportion of varieties which increase rapidly, on which account as well as the size of some of the bulbs, we are enabled to offer it at such a low price. The range of color is good, and although it is of course not equal in some respects to the preceding, it has since we first offered it been a popular mixture. Doz. 20c.; 100, $1.25; 1000, $9.00.
MIXED GLADIOLI IN SEPARATE COLORS.

White and Light Shades, Mixed. Choice Mixed. Doz. 35c.; 100, $2.25; 1000, $18.00.

NEW GLADIOLUS! KLONDKYE.

If the introducers are not greatly prejudiced in its favor this will certainly prove an acquisition to the very limited list of clear or nearly clear yellow varieties. The following is their description:

"This is believed to be the best light yellow Gladiolus yet introduced, and to possess a greater combination of desirable qualities than almost any other variety of any color.

ITS HABIT of growth is strong, stocky, and vigorous, with healthy broad foliage and stands firmly erect without staking even in severe weather, never trailing, or throwing a crooked spike.

IT BLOOMS early and holds out late, making its blooming season much longer than that of most varieties and furnishing a much greater number of cut spikes. The spike is long, erect and straight with from four to six individual flowers open at once. With high culture it often produces semi-double flowers, as many as thirty-four petals having been observed in one instance, instead of six, the usual number. Side spikes follow the first and continue to bloom.

THE FLOWER itself is of medium size, three to four inches in diameter, round, well opened, much more so than is usual, with large round petals, of great substance which stand sun and wind exceedingly well.

THE COLOR is a clear yellow, not orange, perfectly free from marking or trace of color except a blotch of vivid crimson maroon in the throat, usually on the three lower petals. This does not seem to detract from, but rather to intensify: the general color effect.

LUTHER BURBANK, the well known originator of the celebrated California Strain of Gladioli, says:

"It is the nearest approach to pure yellow that I have yet seen in Gladioli. It is, besides, an early and abundant bloomer. I am very much pleased with it."

PROF. HUNN, of Cornell University, referring to the exhaustive test made on the University grounds, of several thousand varieties of Gladioli, the best sorts obtainable, says:

"Taking texture and marking of flower, profusion of bloom and stiffness of spike, it is one of the best in the entire collection. Large Bulbs, each 25c.; 5 for 50c.

PRINCEPS

This wonderful variety under even ordinary cultivation grows 3½ to 4 feet high and is of exceptionally strong growth. The flowers are of immense size, well expanded and of the desired circular form. Color rich red with intense shadings in the throat and white blotches across the lower petals. The spike is stiff, always straight and notwithstanding, that like all large flowered varieties there seldom are four flowers open at one, owing to its unusual height and habit of all buds opening even to the smallest, it produces a large number of flowers. The buds open well in water, and for effective display in large vases few varieties equal it.

Max Leichtlin, of Germany, the originator of the famous Childi Gladioli, says of this: "It is the finest Gladiolus in existence." Mr. Luther Burbank, of California, known as the "Wizard of Horticulture," says: "By all means the most magnificent of any I have ever seen."

Large Bulbs, each 25c.; 5 for $1.00.

THE NEW GREAT AMARYLLIS-FLOWERED GLADIOLUS.

Extra White and Light, Mixed. Choice selections of this class, including Shakespeare, White Sanderson, and many named varieties. Doz. 50c; 100, $3.50; 1000, $30.00.

Pink Shades, Mixed. Doz. 30c.; 100, $2.00; 1000, $16.00.

Extra Yellow and Orange, Mixed. Doz. 75c.; 100, $5.00.

Scarlet and Crimson, Mixed. Doz. 25c.; 100, $1.75; 1000, $13.00.

Krondyke Gladiolus.

1900. A striking flower above the medium size, rich red with prominent white spots on three lower petals. Each, 6c.; doz. 50c. One each of these ten varieties, 75c.
GENERAL LIST OF VEGETABLE SEEDS

Seeds by Mail. All Seeds by the Packet, Ounce and Quarter-Pound, are sent post-paid at prices quoted, but all Seeds sold by weight above a quarter-pound require an additional remittance for postage at the rate of 8 cents per pound, and those sold by measure—Beans, Peas and Corn, except in some instances noted as post-paid, require additional amounts as follows: Beans and Peas—Quart, 15 cents; Pint, 8 cents; Half Pint, 4 cents. Corn—Quart, 10 cents; Pint, 5 cents; Half-Pint, 3 cents.

N. B. Customers should bear in mind that we are one of the few seed firms who offer Beans, Peas and Corn by the Half-Pint instead of Packet. The latter term when applied to these seeds must always be an indefinite one to the buyer and is probably often a cause of disappointment to him.

Special Offer to Purchasers of Seeds in Packets.

PURCHASERS OF SEEDS IN PACKETS ONLY, MAY SELECT ADDITIONAL SEEDS IN PACKETS, as follows:

For 50 cents, seeds in packets may be selected amounting to 65 cents.
For $1.00 " " " " " $1.35
For $2.00 " " " " " $3.00

DO NOT ORDER SEEDS IN BULK EXPECTING THIS OFFER WILL APPLY.

ROSS BROS. CO.'S SEEDS ARE NOT ONLY PROCURABLE AT OUR STORE BUT ARE SOLD IN BULK AND PACKAGES BY MANY COUNTRY MERCHANTS AND OUR PACKETS OF THE VARIETIES MOST USED, BOTH OF VEGETABLES AND FLOWER SEEDS MAY BE FOUND IN NEARLY EVERY TOWN IN NEW ENGLAND. THE SAME RELIANCE MAY BE PLACED ON THEM AS THOUGH PURCHASED DIRECTLY FROM US. THEY WILL BE OFFERED FOR SALE IN THE ROSS PATENTED DISPLAY CASE WHICH, AS IT IS PATENTED, CANNOT BE USED FOR THE DISPLAY OF THE SEEDS OF ANY OTHER FIRM WITHOUT INFRINGING ON THE PATENT.

Asparagus

Barr's Mammoth. Originated in Philadelphia and very popular in that market. Claimed to grow twice as large and to be more productive than Conover's Colossal.

Columbian Mammoth White. A distinct and valuable variety. Stocks are very large and clear white until three or four inches high.

Conover's Colossal. An old standard variety, largely grown.

Donald's Elmira. A new and popular sort; originated in Elmira, N. Y., by Mr. Donald. Claimed by some to be the largest and of the best quality of all varieties.

The Palmetto. Claimed by the introducers to be much earlier and a better yielder than the Colossal, and more even and regular in growth.

Each variety—Pkt. 5c., oz. 10c., 2 ozs. 15c., ½-lb. 25c., lb. 75c.

Asparagus Roots.

All varieties, by mail or express prepaid, per 50, 65 cents. By express or freight not prepaid, per 100, 80 cents; per 1000, $5.50.

Before Ordering Asparagus Roots, kindly read the following:

As it sometimes happens that the crop of some varieties of Asparagus Roots is very short, but which we are not always able to determine at the time of writing our catalogue, and also that toward the last of the season our stock of some is liable to be exhausted, we reserve the right to make substitutions of varieties without further notice. Customers, therefore, desiring that their orders shall be filled only as ordered will please so state distinctly in their orders, and we suggest that it would be well, especially when the season is considerably advanced, for customers to indicate what their preference would be in case our stock of the variety ordered should be exhausted.

Before ordering, if you will carefully read what we say above regarding our Special Offer and Postage, it may save you a disappointment or delay.
BEANS

DWARF or BUSH

Green Podded Varieties

Early Red Valentine. An old well-known, extra-early variety, deserving its popularity as a snap or string bean. Pods round, meaty and tender, and of the finest texture and quality. Very productive. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.00.

Tammoth Green Pod, Stringless. A valuable addition to the list of green-podded string beans. The vine is of vigorous habit, healthy and productive. Pods are considerably larger than those of the Valentine. Not quite as fine in texture, fully as meaty, and remain tender and crisp longer. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 50c., ½ pk. 80c., pk. $1.50.

Early Long Yellow Six Weeks. An old standard variety, used both as a string and shell sort. ½ pt. 5c., pt. 12c., qt. 20c., 2 qts. 40c., ½ pk. 70c., pk. $1.25.

Early China Red Eye. Also an old and well-known variety. ½ pt. 8c., pt. 12c., qt. 20c., 2 qts. 40c., ½ pk. 70c., pk. $1.25.

Low’s Champion. One of the best varieties for shelling. Beans when ready for use in their green state bright red, becoming darker when dry. Plant vigorous in its growth, less liable to blight or mildew than most other varieties; very productive. Several years ago we catalogued this variety, but the trade in New England demanding the colored or striped podded Horticultural type, the call for this was so limited we were obliged to drop it from our list, which we greatly regretted, as we believed it to be, and still think it is, one of the best. If not the best, variety for the private garden for shelling. As the public has, in a measure, learned its value and the demand has considerably increased, we have again placed it on our list. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.00.

Dwarf Horticultural or Speckled Cranberry. The standard green shell throughout New England. Beans oval, large, yellowish brown, considerably splashed with red and of excellent quality. Pods yellowish green splashed with carmine, and, when free from rust and blight, very showy. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 80c., pk. $1.50.

Best of All. An early variety of the Horticultural type. Beans kidney-shaped and similar in color to the Dwarf Horticultural. Pods long, straight and more slender than that of variety; they are, when fit for use as a string bean of a peculiar deep green, becoming lighter, with splashes of red, when at the stage suitable for shelling. Although the coloring on the pods is not as bright and distinct as on those of the Dwarf Horticultural, the pods are yet very attractive, and the earliness, hardiness, vigor and productiveness of the vine make this variety valuable both for the market and home garden, either as a string bean or for shelling. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.40.

Godward or Boston Favorite. Beans large and long, similar in color to all Horticultural varieties. Pods long, yellowish green, splashed with crimson. Very attractive and equal in size to those of many pole beans. Vine less productive, as strong branching habit, inclined to run, and very productive. Later than preceding varieties. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 80c., pk. $1.50.

Improved Godward. Has all the desirable qualities of the regular strain. But it is entirely free from runners. Since its introduction the Godward has always been a popular second-early sort, its hardiness, vigor, large, beans, and long, straight, handsome, bright-colored pods making it so; but it has always had the vexing habit of running badly, a trait which prevented its use by some. In the Improved Godward we have a variety in which this tendency has been overcome, making it a great improvement on the old. It also is a few days earlier, and has better colored pods. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 90c., pk. $1.65.

DWARF WAX OR BUTTER BEANS.

Black or German Wax. One of the oldest wax sorts. Pods round, meaty, tender and of finest flavor; small. More liable to rust than other good varieties, but when free from rust and blight few equal it in quality.

Carrie’s Rust Proof Black Wax. Beans brownish black; pods flat, of good texture, showy and of fine quality. Well merits the name of rust-proof.

Davis’ White Kidney Wax. Claimed by the introducers to be “hardier, harder, more handsome and a better seller than any of all the wax varieties,” a claim which the opinion of many who have grown it, to a considerable extent, verifies.

Detroit Wax. An excellent variety. Plant hardy and productive; pods straight, flat, but broader than the Golden Wax of beautiful wax color, when grown to a size suitable for use; keep crisp and bright a long time after picking; very seldom rust, and are of good quality. Beans white, with a patch of brown about the eye, similar in shape to the White Marrow, and equally as good for baking.

Golden Wax. For a long time the standard wax bean and still a great favorite. Pods large, attractive, flat, golden yellow with short green points, stringless, heavy and tender. Beans medium sized, oval, ground white, covered more or less with purplish red, different crops varying considerably in appearance, owing probably to soil or location in which they were grown. Plant vigorous and productive.

Golden-Eyed Wax. One of the best wax beans for the market-gardener. Although not equal in quality to some others, its hardiness, entire freedom from rust, earliness and productiveness make it a profitable variety.

Wardwell’s Kidney Wax. Although not quite as early as some of the preceding varieties, it is one of the best. The vine is of very strong, vigorous growth, healthy and productive. Its pods are large, nearly straight, very white, wax-like and attractive. They are also of especially good quality. This variety has in recent years been growing in popularity with market-gardeners.

All of the preceding Wax varieties at uniform prices. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.00.

If desired by mail add to prices of ½ pt. 25c., pt. 35c., qt. 50c., 2 qts. 75c., ½ pk. $1.10, pk. $1.25.

JONES STRINGLESS WAX. A very early dwarf variety, the result of crossing a white seeded variety on the Yosemitie. The plant is hardy and productive and not often affected by blight. The pods are round, of medium size, meaty and tender; waxy-white but, being curved are not as attractive as those of the Round Pod Kidney Wax. It, however, being a white-seeded variety and of excellent quality has become popular for home gardens.

½ pt. 10c.; pt. 20c.; qt. 35c.; 2 qts. 65c.; ½ pk. $1.20.

HOODSON WAX. A new and distinct variety. See page 1 for description. ½ pt. 15c.; pt. 30c.; qt. 50c.; 2 qts. 85c.; ½ pk. $1.50; pk. $2.75.

Round Pod Kidney Wax. A very desirable, new variety, a selection from the Wardwell Kidney Wax. The plant is of dwarf, spreading but vigorous growth and very productive. The pods are exceptionally attractive, white and wax-like; round, nearly straight and uniformly perfect in shape. They are also of the finest quality, stringless, meaty and brittle. We believe it is one of the best round-podded wax beans ever offered.

½ pt. 15c.; pt. 25c.; qt. 35c.; 2 qts. 65c.; ½ pk. $1.25; pk. $2.25; bush $8.00.

WARDWELL’S KIDNEY-WAX BEAN.
Henderson's Bush Lima. This variety is especially valuable on account of its earliness; a bush form of the Early Steva Lima and has the small beans of that variety. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 50c., ½ pk. 90c., pk. $1.65.

Burpee's Bush Lima. A bush form of the large Lima. Grows uniformly dwarf. Beans are equal in size and quality to the large Lima. By far the most popular of this class. ½ pt. 10c., pt. 20c., qt. 35c., 2 qts. 60c., + pk. $1.00, pk. $1.85.

Dreer's Bush Lima. A bush form of the Dreer's Improved Pole Lima, which is considered by many as the best of all the Limas. ½ pt. 10c., pt. 20c., qt. 35c., 2 qts. 60c., + pk. $2.00, pk. $2.35.

LIMA BEANS & Pole or Running.

The Seibert's Lima was developed by a market gardener who selected the largest green beans from the thinnest and most easily opened pods. The vine is very productive and exceptionally hardy and vigorous; it produces pods very early and the beans are of fine quality. The green shelled beans are of immense size, but so tender and succulent that they shrink in drying to about the size of the Large White Lima. In earliness, ease of shelling, size, beauty and quality of the green beans, this new variety is in advance of all other sorts.

King of the Garden Lima. Vine vigorous and productive. Pods very large and well filled with large, white beans, succulent and fine flavored. On account of its large pods a general favorite with market gardeners.

Large White Lima. The old standard sort, yet largely grown, but being to a considerable extent displaced by the newer varieties.

Challenger, or Dreer's Improved Lima. A distinct variety; both pods and beans are shorter but much thicker than other sorts. The pods are borne in clusters, rarely have over four beans, often but three, in a pod, but are always well filled, so that a quantity of them will usually produce more beans than an equal quantity of any other variety. The beans are easily shelled, are of excellent flavor, slightly more mealy than other thinner sorts. The vine is of vigorous growth and very productive, does not produce pods quite as early as the flat pod sorts, but does not differ greatly in this respect from the preceding two varieties. A decided favorite with those who are acquainted with it.

All varieties at uniform prices. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 55c., + pk. $1.00, pk. $1.75.

Worcester Mammoth Pole Horticultural.

This variety, while similar in general character to the Horticultural Pole, is much superior in several ways. The beans though closely resembling those of the common strain are so much larger that, if that were the only point of excellence it would be alone sufficient to recommend it for general use, but its strikingly handsome pod combined with its great size are both features of excellence which still further recommend it. Added to these excellent qualities, are those of thrifty, vigorous growth of vine and great productiveness, all making it a variety especially desirable to the market gardener. It easily brings a higher price in the market than any other, and is not excelled by any other sort for the home garden.

¼ pt. 10c., pt. 20c., qt. 40c., 2 qts. 75c., + pk. $1.25, pk. $2.25.

If desired by mail add prices of ½ pt. 4c., pt. 8c., qt. 15c.
BEANS Pole or Running

If desired by Mail add to prices, of ½ pt. 4c., pt. 8c., qt. 15c.

Horticultural, or Speckled Cranberry. A well-known standard variety. Beans similar to Dwarf Horticultural, ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 80c., pk. $1.50.

Dutch Caseknife. An old, well-known variety. Beans white, flat, kidney-shaped; pods very long. ½ pt. 10c., pt. 15c., qt. 20c., 2 qts. 50c., ½ pk. 90c., pk. $1.65.

Indian Chief, or Black Wax. One of the best wax pole sorts. Remains in bearing longer than the Dwarf Wax. Beans large, round, black. Pods waxy yellow, remaining in good condition longer than most varieties. ½ pt. 10c., pt. 15c., qt. 20c., 2 qts. 50c., ½ pk. 90c., pk. $1.65.

Old Homestead, or Kentucky Wonder. The earliest pole bean. The pod is very long; silvery green; entirely stringless, and of good quality. It is enormously productive, the pods hanging in clusters from top to bottom of the pole. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 50cts., ½ pk. 90c., pk. $1.65.

Scarl. Runner. Largely grown as an ornamental climber; its rapid growth and early production of dazzling scarlet flowers make it a favorite for covering screens, walls, etc. It is also of excellent edible qualities but rarely grown for that purpose.

White Dutch Runner. Pod and vine identical with the Scarlet Runner. Beans and flowers white. Planted with the Scarlet Runner it makes a pleasing contrast; excellent for the table and very productive. Each variety ½ pt. 10c., pt. 20c., qt. 35c., 2 qts. 50c., ½ pk. $1.00.

If larger quantities than one-quarter pound are desired by mail add to prices at the rate of 8 cents per pound.

Early Egyptian. One of the earliest, roots flat; deep crimson, tops small, permitting it to be planted closer than other varieties, especially desirable for forcing as well as for first open ground planting. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 30c., lb. 50c.

Crosby's Early Egyptian. The most popular first early variety and we have found it an excellent sort for late planting having planted it as late as July 29 with very satisfactory result.

Eclipse. One of the earliest globe-shaped varieties, with rather small tops and small tap root, blood-red; of excellent quality. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 50c.

Arlington Favorite. An excellent variety of globular form and deep color, especially desirable to follow the early cabbages. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 50c.

Detroit Dark Red. Rapidly becoming one of the most popular main crop varieties. Roots globular sometimes inclined to ovoid, skin dark blood-red, flesh bright red zoned with a lighter shade, of the finest quality. Top small and upright, leaf green, stem purplish, roots red, flesh purplish; pink zoned with white; on account of its light color not as popular as its quality would otherwise make it. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 50c.

Crimson Globe. Roots perfectly globular, one of the earliest of this shape, flesh dark; skin a shade lighter. Seldom grows over large and is a favorite with some for late as well as early planting. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 60c.

Edman's Early Blood Turnip. Used largely for main crop. Roots somewhat redder than the old strain of Blood Turnip, skin dark red, flesh waxy, zoned with lighter shade; tender and sweet and an excellent keeper. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 50c.

Dewing's Improved Blood Turnip. This has been more largely used for main and winter crop than any other. It is being to some extent displaced by newer varieties but is yet extensively planted and is an excellent sort. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 50c.

Swiss Chard. Used for greens only, at first entire, later the leaf stalks are sometimes used separately, cooked like asparagus. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 20c., lb. 50c.

Sugar Beet and Mangel Wurzels

Lane's Sugar. An improvement on the old white French, recommended as harder and containing as a larger percentage of sugar.

Mammoth Long Red Mangel. A variety of mammoth size; skin light red, flesh white and rose. Grows well out of ground; extensively used in all sections.

Norbiton Giant Long Red. Similar to the preceding; has smaller top and neck; flesh scarlet.

Golden Tankard. Top and neck very small; root ovoid, large; flesh yellow, zoned with white; an excellent sort.

Orange Globe. One of the best, top small, root medium size, skin deep orange yellow, flesh white. Grows almost entirely out of the ground; good for shallow ground; easy to harvest. Prices uniform on all. ½ lb. 15c., ¼ lb. 20c., lb. 35c., 5 lb. lots per lb. 30c.

Brussels Sprouts.

A very hardy plant of the Cabbage family, growing from two to three feet high, producing at the axis of the leaves the whole length of the stem small heads about two inches in diameter, resembling a cabbage and considered by some to be of finer flavor.

Best Imported. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 40c.
CABBAGE

Surehead. Remarkable for its certainty to head and for uniformity. Heads large, of the Flat Dutch type with few outer leaves; are sweet flavored and keep well. Pkt. 5c., 1/2 oz. 12c., oz. 20c., 2 oz. 35c., 1/2 lb. 60c., lb. $2.00.

Warren Stone Mason. An improvement on the Stone Mason which for years was one of the most popular varieties in New England. This is earlier, more nearly round and more solid; one of the very best for winter use. Pkt. 5c., 1/2 oz. 12c., oz. 20c., 2 oz. 35c., 1/2 lb. 60c., lb. $2.00.

Autumn King, or World Beater. One of the largest hard-heading varieties, with few outer leaves, allowing it to be planted closer than others of its size. These leaves are peculiarly crimped, marking it as a distinct variety. An excellent keeper. Pkt. 5c., 1/2 oz. 15c., oz. 25c., 2 oz. 40c., 1/2 lb. 70c., lb. $2.00.

Marblehead Mammoth. A late variety, the largest of all cabbages; heads have been grown weighing sixty pounds. Pkt. 5c., 1/2 oz. 10c., oz. 20c., 2 oz. 35c., 1/2 lb. 60c., lb. $2.00.

Danish Ballhead. One of the most popular late cabbages ever introduced. Heads are of medium size, round and remarkably solid and heavy, averaging one-fourth heavier than most varieties, and are the best of keepers. The stumps, like those of many foreign varieties, are longer than those of our native sorts, though some improvement has been made in late years. Seed should be sown about two weeks earlier than of native varieties. Pkt. 5c., 1/2 oz. 15c., oz. 25c., 2 oz. 40c., 1/2 lb. 70c., lb. $2.50.

Luxembourg or Hard Heading. We think this is not grown as largely as it should be as but few varieties, if any, equal it for late spring keeping, differing from all others in coming out as green as when first buried it is especially attractive. This also should be planted earlier and manured more liberally than our native sorts. Pkt. 5c., 1/2 oz. 15c., oz. 25c., 2 oz. 40c., 1/2 lb. 70c., lb. $2.50.

Mammoth Rock Red. Now the standard red cabbage, a great improvement on the small Red Dutch. Pkt. 5c., 1/2 oz. 15c., oz. 25c., 2 oz. 40c., 1/2 lb. 70c., lb. $2.50.

Othello. A new red variety from Germany; claimed by the originator to be much larger than any red cabbage hitherto known. See novelty pages for further description and price.
CAULIFLOWER.

EARLY SNOWBALL. The earliest variety and the surest to head. It is probably more largely grown than all other varieties combined not only for early use but late as well, and has to a great extent displaced all of the once popular late sorts. Owing to its compact habit and few narrow and upright leaves it is the most desirable for forcing, and, for the same reason, can be set much closer in the field than others. The heads are large, not only in diameter at top, tapering gradually, but uniformly stump-rooted. The flesh and heads are so uniform in size, shape and color that they are seldom injured by frosts that would ruin other varieties. Pkt. 20c.; ¼ oz. 65c.

EARLY LONDON. A well-known variety maturing its heads soon after the extra early sorts. Pkt. 5c.; ¼ oz. 25c.; oz. 40c.; 2 oz. 75c.; ½ lb. $1.25.

LARGE ALGIERS. A late sort and one of the surest to head of this class. Plant, large but of upright growth, the leaves affording protection to the head so that they are seldom injured by frosts that would ruin other varieties. Pkt. 10c.; ¼ oz. 40c.; oz. 75c.

CARROT.

EARLY SCARLET HORN. A popular early variety, grown only for table use. The roots are about three inches long and about an inch and a half in diameter at top, tapering slightly and terminating abruptly like the larger stump-rooted varieties. They make an attractive bunch, are of excellent quality and have small tops. Pkt. 5c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 90c.

CHANTENAY. This is an excellent variety for bunching. The roots are five inches long, three inches in diameter at the top, tapering gradually, but uniformly stump-rooted. The flesh is tender and crisp, color deep orange. The tops are of medium size, and necks small. Pkt. 5c.; oz. 10c.; 2 oz. 15c.; ¼ lb. 25c.; lb. 90c.

OX HEART, or GUERANDE. Roots very thick, often over four inches in diameter at shoulder, tapering to not less than two inches at the stump root, and about five or six inches in length. The flesh is very fine-grained, free from core, tender and sweet. Color, bright orange. An excellent variety for either table use or for stock, and especially suited for hard, stiff soil, where longer growing varieties seldom thrive. Pkt. 5c.; oz. 10c.; 2 oz. 15c.; ¼ lb. 25c.; lb. 85c.

DANVERS. The most popular variety. It is used for bunching for market early in the season and later for packing in boxes or crates. It is also extensively grown for stock although a greater weight per acre could be secured by using either the Rubicon or Long Orange. It can, however, be grown on both shallow and stiff hard soils where the latter would not thrive, and being of more attractive form than the Rubicon is preferred by many who market a part of their crop and feed the balance. The roots are about two and one-half inches in diameter at the shoulder and five to six inches long, tapering gradually to a blunt point. Our strain is one which we have sold for a long time and is of rich, deep orange so much desired by all who grow carrots for market. It is also of remarkable uniformity and purity. Pkt. 5c.; oz. 10c.; 2 oz. 15c.; ¼ lb. 25c.; lb. 85c.

RUBICON. This is similar in form to the Ox Heart but thicker and longer. It is also earlier and larger than the Danvers and is in our opinion preferable to either that or the Long Orange for growing for stock as a greater weight could be grown on the same area than the former and at least an amount equal to the Long Orange. It will also succeed on shallow or hard soils like the Danvers where the Long Orange would not, and is much more easily harvested than the latter. It has less and finer leaves than the Danvers; has no neck, growing hollow-crowned, and is very uniform in growth, of good color and quality, but will probably never be a popular variety for market, lacking attractive form. Pkt. 5c.; oz. 10c.; 2 oz. 15c.; ¼ lb. 25c.; lb. 75c.

INTERMEDIATE HALF LONG. A variety intermediate in size between the Danvers and Long Orange but more nearly the size of the former. It, however, more closely resembles the Long Orange in that the root is pointed. Of good color and excellent quality. Pkt. 5c.; oz. 10c.; 2 ozs. 15c.; ¼ lb. 25c.; lb. 75c.

LONG ORANGE. An old, well-known, and popular variety succeeding on deep mellow soils. On such the roots are very handsome and present an attractive appearance when packed in boxes ready for market. The variety is not, however, largely used for this purpose as most markets prefer roots of the Danvers type. It is extensively grown for stock, probably sometimes where a variety of the Rubicon type would be better adapted. Roots of this improved strain are a little shorter and thicker than the old but uniform that the bulk of the crop would probably be greater. Pkt. 5c.; oz. 10c.; 2 oz. 15c.; ¼ lb. 25c.; lb. 75c.

LARGE WHITE BELGIAN. The roots grow one-third out of ground. The portion above ground is green, that below white. Roots are large and flesh rather coarse. Used only for stock feeding. Pkt. 5c.; oz. 10c.; 2 oz. 15c.; ¼ lb. 20c.; lb. 50c.
CELEERY

White Plume. The earliest and most easily blanched of all varieties; requires little banking-up to make it fit for market, belonging to the self-blanching class; but, in our opinion, it; like all celeries, is of much better flavor when blanched with earth. A desirable variety for early fall use, but does not keep well; very showy and beautiful, but not more so than the Golden Self-Blanching, and not equal to that in several other respects. Pkt. 5c., ½ oz. 12c., oz. 20c., 2 oz. 35c., ½ lb. 60c.

Pink Plume. Nearly identical with the White Plume, except the tinge of red on the leaf stalks, which fades to faint pink when blanched. Like the White Plume it is easily blanched and is of better quality. Pkt. 5c., ½ oz. 12c., oz. 20c., 2 oz. 35c., ½ lb. 60c.

Golden Self-Blanching. The most popular variety in cultivation. It is nearly as early as the White Plume, is generally considered to be of better quality and flavor, and has to a considerable extent displaced it. It is of dwarf, compact habit, and, when grown in rich, moist soil and under favorable conditions, produces more large, thick stalks than other varieties, in such cases requiring but two plants to make a bunch, whereas it usually requires three or more of other varieties. It is self-blanching to a remarkable degree. When young the plant is of a yellowish-green, blanching to a deep, golden-yellow, and the inner stalks to nearly white. It is, when ready for market or the table, a thing of beauty as well as utility, and a most desirable ornament to any table. We offer a proven strain of seed. Pkt. 10c., ½ oz. 20c., oz. 35c., 2 oz. 65c., ½ lb. $1.20.

Giant Pascal. This is a green leaved variety, which was developed from the Golden Self-Blanching. It is much larger, a better keeper and of superior flavor. It grows about two feet high, has very broad and thick stalks, which are stringless. It has a peculiarly sweet and nutty flavor, entirely free from any bitter taste. It blanches quickly after banking-up. Pkt. 5c., ½ oz. 12c., oz. 20c., 2 oz. 35c., ½ lb. 60c.

Celeriac, or Turnip-rooted Celery. The roots only of this are used, either boiled or sliced for salads, or for flavoring soups. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 40c.

Winter Queen The Best Celery For Winter Use.

This comparatively new variety is rapidly becoming popular with those who grow celery for winter use. While no variety is, or ever has been as popular with market gardeners as the Golden Self-Blanching, it is known and generally admitted by them, that it is not equal in quality, especially in flavor, to some other varieties notably the Giant Pascal. The former is grown by them mainly, because of its easy culture, and also, because of its rapid development and beautiful appearance. The Giant Pascal has never been very popular with them, because of the great care necessary in growing and handling it. In the Winter Queen we have a variety, which, while little like the Pascal, is a vigorous grower, is only of medium height, and requires no labor in banking. It is also of more compact form, and with its medium length, it makes it much better for bunching and much less liable to be broken in handling. Each plant produces a large number of stalks which are broad, thick and heavily blanched. The heart is of a rich golden yellow. It is an excellent keeper and when well blanched the stalks are firm and crisp, entirely free from strings and of the finest flavor, and especially desirable for the home garden and for gardeners having a retail trade among those who appreciate and demand a choice article. Pkt. 10c., ½ oz. 20c., oz. 30c., 2 oz. 50c., ½ lb. 85c.

CHERVIL. A hardy annual, used for flavoring and garnishing, and deserving of more general use for the latter purpose. It is thought by some to exceed even parsley in beauty and its use, at least would afford a pleasing variation. Seed should be sown early in the spring and when plants are well rooted they should be transplanted to one foot apart. The leaves will be ready for use in seven to ten weeks from planting. Pkt. 5c., oz. 15c., 2 oz. 25c., ½ lb. 40c.

CORN SALAD, PETFICUS, or LAMB'S LETTUCE. A hardy, rapid-growing plant, often used in winter as a substitute for lettuce and as sometimes cooked and used like spinach. It does not thrive in hot weather and if sown in the spring it should be very early and on extremely rich soil. It will then be ready for use in four to six weeks. It, however, succeeds best when sown in August or September. If sown in the fall, it will be ready for use in the late fall. If left in the ground during winter, it should, on the approach of cold weather, be protected with straw or litter. Pkt. 5c., oz. 10c., 2 oz. 15c., ½ lb. 25c.

CRESS, CURLED, or PEPPER GRASS. A small, pungent salad plant, much liked by some with lettuce. Like all salad plants it should be grown on rich ground. Seed may be sown early in the spring but if desired through the summer repeated sowings will be necessary. Pkt. 5c., oz. 10c., 2 oz. 15c., ½ lb. 20c.
Red Cory, Original Strain. An extra early strain of this very popular variety differing from our regular or ordinary strain only in point of earliness. See novelty pages for description and prices.

First of All. One of the earliest varieties, a selection from the Red Cory, nearly identical in appearance, differing slightly in size of ear (a little smaller) and in being sometimes ten or twelve rowed. While still a very early and excellent sort, it does not appear to us to be as early as when introduced. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Early Minnesota. An old well-known variety which, although it has to a considerable extent been displaced by the many new varieties, is yet a favorite with some on account of its good quality. Kernels broad, ears of medium size, eight-rowed. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Early Red Cory. The most popular early variety; cobs mostly red, kernels from deep pinkish cast to white, ears eight-rowed and of fair size; of medium quality and a good yielder. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Early White Cory. A selection from the Red Cory, having only white kernels and cobs. Ears are a little larger. It is nearly if not quite as early, and is considered by some of better quality. Eight-rowed. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Mammoth White Cory. This, while the stalks are no larger than the White Cory, has larger ears and is claimed to be more productive. The ears are twelve-rowed, very symmetrical and handsome, with no space between the rows at the base. The kernels are large, broad, very white, and of good quality for an early variety. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Kendel's Early Giant. This, the Champion and Metropolitan, are close rivals for first place in the class of second early sorts. Ears of this are from eight to ten inches long and usually have twelve or more rows. Kernels white, sweet and tender. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Early Champion. The ears are fit for use with or before the Crosby and are much larger. From ten to twelve-rowed. Kernels deep, pure white, and of good quality. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Metropolitan. A new second early variety of distinct and vigorous growth about 5½ feet in height. The ears are large and remarkably well formed; 9 inches in length, ten to twelve-rowed, and are set low on the plant. The kernels are large and deep and are very sweet and tender. It is very productive, usually bearing two and sometimes three good ears to the stalk. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.00.

Early Crosby. New England Strain. The Crosby has for years been one of the most popular varieties. The strain we offer differs from the original in being of much larger growth and having much larger ears. These, with the exception of size, closely resemble those of the original, and are usually twelve-rowed, sometimes more. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Moore's Concord. An old well-known variety which was for many years the most popular of the second early class. Ears are large, twelve to sixteen-rowed, and fit for use soon after the Crosby. Of excellent quality. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Black Mexican. A variety when ripe with bluish-black kernels, but when in suitable condition for eating cooks white. But few varieties equal it in tenderness and sweetness. Ears of medium size. It is ready for use about with the Concord. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Potter's Excelsior or Squantum. Known by the first name for years in Boston market, where it was very popular. Used extensively in Rhode Island, where it was named Squantum. Ears of medium size. A standard of excellence in tenderness and sweetness. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Country Gentleman. A medium late variety, having irregular rows. Has a very small cob and deep kernel; is tender and sweet; very desirable for the home garden. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.00.

Marblehead Mammoth. The earliest, sweetest and largest of all the Mammoth sweet varieties. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Ferry's Early Evergreen. A selection from the well-known Stowell's Evergreen; identical in appearance, differing in size, and claimed to be from one to two weeks earlier and to remain in condition for use longer. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 65c., pk. $1.00, bush. $3.50.

Stowell's Evergreen. More largely used than any other late variety. Ears large, kernels very deep and shripeled. ½ pt. 8c., pt. 15c., qt. 20c., 2 qts. 30c., ½ pk. 50c., pk. 90c., bush. $3.00.

Sweet Fodder, Evergreen, and other large varieties. Pk. 40c., bush. $1.50.
IT MAY be remembered by readers of our catalogue for the past two years that on the page devoted to field and ensilage corn, under the heading "Wonderful figures for Farmers," we gave the total value of the most important crop of the United States in the year 1899. Reference to this page will show how greatly corn exceeded in value all other crops. Surprising as these figures must have been to many, the following, showing the immense increase in corn production, are to a much greater extent a cause for surprise and of wonder as to where it could all have been grown and as to what disposition could be made of such enormous amounts. The corn crop of 1899 was valued at $230,689,934 bushels, valued at $1,087,461,440. The yield in 1905 was 2,704,993,540 bushels, valued at $1,116,966,738. These figures were taken from the Crop Reporter, published by authority of the Secretary of Agriculture.

We regret that we have not at hand statistics regarding the acreage of corn planted for ensilage but have no doubt that while such figures would not approach in magnitude those of corn grown for grain, they nevertheless be of the same surprising nature and probably show an even greater proportionate increase in the years which are compared.

We have for several years had the reputation, especially in this section, as distributors of large quantities of choice seed corn for ensilage. We are rapidly extending this reputation to other sections and our Eurekas. Ensilage corn is fast gaining a national reputation. Our sales have rapidly increased due in part to the ever increasing acreage but also to the fact that we handle superior strains of the best varieties and intend to send to our customers only such seed as shows strong germination. Our stocks this season are fully equal to any we have had. Samples of any will be sent on application without charge. We believe that all growers of ensilage should give the Eureka a trial. We claim for it a larger yield of good ensilage than any other variety. The following list is one of well known and tried varieties not surpassed as a whole by any yet offered. The Eureka is the best of all for ensilage.

NO CHARGE FOR BAGS which corn will be shipped. We will yet charge 20 cents for the regular seamless cotton 2-bushel bag and ten cents each for all smaller sizes, prices here quoted for field and ensilage corn include bags. Lots of one or two bushels will be shipped in an especially strong and heavy burlap which we will prove to be quite as a bag as the sun to the regular cotton bag. A discount of 10 cents will be made on both the one and two bushel prices to local customers buying at our counters and furnishing their own bags.

IMPROVED CANADA. Known also as the Early Demond, Deerfield, Greenfield, or Connecticut Valley. This differs from the common Canada, or Canada Cap, in that the ear is about two inches longer. Unlike that, it is eight-rowed and early enough to mature a crop in any section where corn can be profitably grown. Pk. 50c., bush. $1.85, 2 bush. $3.60.

LONGFELLOW. This popular variety is said to be the result of careful selection in the Longfellow family for over fifty years. The ears are very long, sometimes reaching the length of fifteen inches. The cobs are small, with tassels of good size. It yields well, often having two good ears on a stalk. It is safe for planting in the latitude of Massachusetts and is in this state extensively grown. Pk. 50c., bush. $1.55, 2 bush. $3.60.

SANFORD WHITE. A white flint variety, used extensively in Rhode Island for grinding both for stock and culinary purposes, and very extensively used in Vermont for ensilage. Selected hand-picked seed. Pk. 40c., bush. $1.20, 2 bush. $2.40.

SANFORD FODDER. Same stock as preceding but not hand picked. Pk. 35c., bush. $1.35, 2 bush. $2.70.

AUSTRALIAN WHITE FLINT. An extra early and extremely hardy variety, thriving where the climate is too cold for ordinary corn and resisting drought remarkably, will produce a crop when most varieties would fail. Pk. 40c., bush. $1.00, 2 bush. $2.00.

KING OF THE EARLIEST. This dent variety, a selection from the Pride of the North, made by the originator of that variety, is from ten days to two weeks earlier, which we think makes it safe for planting in this latitude for the purpose of maturing grains. The cob is small and although the ears are not long the kernels are very deep and the yield is large. We may say here that more attention is being given in the East to the dent varieties for growing for grain than formerly and they are in a few localities grown almost to the exclusion of the flint type, the growers claiming a much larger yield from the dent. Pk. 40c., bush. $1.60, 2 bush. $3.20.

PRIDE OF THE NORTH. An early dent variety which has been grown in the East to some extent for grain and to a greater extent for ensilage. Although not of as rank growth as other varieties of this type, it is on account of its early protection of ears popular with some for the latter purpose, especially with those having cold clayey soil. Pk. 40c., bush. $1.50, 2 bush. $3.00.

WHITE CAP YELLOW DENT. Nearly as early as the Pride of the North; with large ears. The grower and introducer of this wonderful corn says he will guarantee this corn to mature in ninety to ninety-five days from planting, and to grow a larger crop on poor soil than any other corn in the world. Stalks eight to ten feet high, with abundance of foliage, making it an excellent sort for ensilage. Ears are from eight to ten inches long, well filled out and have from sixteen to eighteen rows. Kernels are of the true Dent type, sweet and nutritious, the outer end white and the balance yellow, which gives it the name "White Cap." Pk. 40c., bush. $1.50, 2 bush. $3.00.

EARLY MASTODON DENT. A very early strong growing corn, with large ears and grain. In the American Agriculturist corn contest, in 1889, it outyielded all others, making the wonderful record of 213 bushels of shelled corn to the acre. Used extensively for ensilage. Pk. 40c., bush. $1.20, 2 bush. $2.40.

LEAMING. An early Yellow Dent corn, which is growing more popular in New England every season for ensilage. Pk. 35c., bush. $1.35, 2 bush. $2.70.

RED COR EN SILAGE. (Bushnell's). A pure, white corn, with red cob. Grown extensively for ensilage. Pk. 30c., bush. $1.35, 2 bush. $2.70.

EUREKA EN SILAGE. The largest, leafiest and most productive variety. Seed white, always of the highest grade and always sure to germinate. See novelty page for description and price.

SWEET FODDER. See preceding page.

Bear in mind that all prices quoted on this page include bags.

IF OUR SEEDS PLEASE YOU TELL OTHERS, IF THEY DO NOT TELL US.
ANNUAL CATALOGUE OF ROSS BROS. CO.

Cucumber

Early Russian. The earliest variety and probably the hardest. Fruit three to four inches long, one and one-half inch in diameter, oval, pointed at both ends and covered with fine, small spines. Vines of vigorous growth and productive. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Early Cluster. An early and very productive variety. Fruit small, thick at the end, dark green, but lighter at blossom end, borne in pairs or clusters and largely near the root. Used to some extent for pickles. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Early Frame or Short Green. Fruit short, straight, small at each end, bright green, lighter at blossom end, and although small is an attractive variety and of excellent quality. Used both for slicing and pickling. Vine vigorous and productive and produces fruit of suitable size for slicing soon after the Cluster. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Improved White Spine. The most popular variety for slicing. Fruit uniformly straight and handsome, dark green, with white lines at blossom end, and has but few spines. Flesh is tender and crisp, and the variety well deserves its popularity. Nearly all the varieties used for forcing in this country sprang from this. They doubtless are more desirable for that purpose, but for growing in the usual way we have found none that surpasses this. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Evergreen White Spine. An extra long and distinct strain of this popular type. It is beautiful in shape and color and of the finest quality. Fruit long, cylindrical, dark green, crisp and tender; vine productive and comes into bearing soon after the preceding variety. A favorite with some for forcing. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Emerald. The originators describe this as follows: “It is strictly an evergreen, retaining its color until quite ripe, making it an attractive variety. The fruit sets early, and its vigorous vines abound in long, straight, handsome fruits of the most desirable qualities. As a slicer the flesh is peculiarly crisp and tender, and the flavor most pleasing. The young fruit being deep green, straight and slender, makes an excellent pickle, and when ripe none excels it for making sweet pickles. For those who grow under glass, or for long-distance shipping, it will prove a boon on account of holding its deep green color so long, and it is not excelled for beauty in color and form, even by the best English Frame varieties; almost spineless. As an all-purpose table or market variety it cannot be surpassed.” Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Improved Long Green. This probably stands next to the White Spine in popular favor. Fruit from ten to twelve inches long, dark green, and very firm and crisp. It is used largely for slicing, but on account of its firmness and crispness is popular with some for pickling, and is especially desirable when mature for sweet pickles. Vine of strong, vigorous growth and productive. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Nichols Medium Green. Fruit thicker than the White Spine and full at both ends. Skin light green and very smooth. An attractive variety and of fine quality. Used by some for forcing. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Cumberland. This new variety originated with a well-known firm of seed growers, who say of it: “We honestly believe this to be the best pickling cucumber ever produced. The variety is of the hardy, white spine type, is a rapid, strong and vigorous grower and very prolific in fruit. The pickles differ from all other hardy sorts in being thickly set with fine spines; the form is exceptionally straight and symmetrical, thus being as choice a variety for slicing as it is for pickling.” Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

Boston Pickling. Probably more widely known and more extensively grown for both private and commercial purposes than any other variety. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c., lb. 90c.

DANDELION.

American Improved. Thick leaved. Pkt. 10c., ½ oz. 25c., oz. 40c., 2 oz. 70c., $1 lb. $1.25, lb. $4.50.

French, or Common. Pkt. 5c., ½ oz. 15c., oz. 25c., 2 oz. 40c., ½ lb. 75c., lb. $2.50.

Arlington. Leaves finer than the American Improved; very popular in Boston market. Pkt. 10c., ½ oz. 25c., oz. 40c., 2 oz. 70c., $1 lb. $1.25, lb. $4.50.

EGG PLANT.

New York Improved. The standard variety in all sections of the country. Pkt. 10c., ¼ oz. 20c., oz. 35c., 2 oz. 60c., ½ lb. $1.00.

ENDIVE.

Ross Curled.

Large Green Curled. A large, coarse, strong-growing variety, which by tying up can be made to form finely blanched centers of good quality; outer leaves well cut, and bright, deep green. Each. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 25c., $1 lb. 40c.

Green Curled Scotch. Of dwarf and compact growth, leaves curled and crimped, the whole plant resembling a bunch of moss. The best variety for general use. Pkt. 5c., oz. 10c., 2 oz. 15c., $1 lb. 25c.

KALE (Borecole).

Early White Vienna. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 30c., $1 lb. 50c.

Early Purple Vienna. Pkt. 5c., oz. 10c., 2 oz. 15c., 2 oz. 30c., $1 lb. 50c.
Lettuce

Hittinger’s Belmont Forcing. Like the preceding this is a plain leaved variety, resembles in general appearance but is much larger. It forms a compact head and is, like the Tennis Ball, almost certain to head, making it a desirable and profitable variety for forcing.

Black Seeded Tennis Ball. For first outdoor crop nothing surpasses this. It also is in some sections used for forcing. It forms firm solid heads of medium size. The leaves are thin, thick, rich dark green, the inner ones blanching to a rich creamy white and are then crisp and of fine flavor. A popular market variety.

Big Boston. Although much larger than either, this resembles the White Seeded Tennis Ball and Belmont, in general appearance and like them is of the type popular with market gardeners here and with most shippers, having but few outer leaves. It is very desirable for those gardeners requiring a large heading variety for forcing, and for growing in cold frames, and heads well very early in spring out doors. It does not head well in midsummer but is especially valuable for fall use, every plant being almost certain to head in the cool months of that season. The heads are broad, comparatively smooth, thin and very hard, the outer leaves are light green; a large proportion of the inner ones or head blanching to a beautiful creamy white. When well grown, of the finest quality, crisp and tender.

Early Curled Simpson. (White Seed.) An old variety with broad, often frilled, very curly light green leaves; sweet, tender, and of fine flavor.

Black Seeded Simpson. Much larger than the preceding, but not as much curled. Forms a large loose cluster of leaves rather than a head, leaves light yellowish green; a good variety and extensively grown.

Early Curled Silesia. An old standard sort, very popular for home gardens.

Deacon. One of the most popular summer varieties, forming heads a little above medium size which although not as large as some of this class are nevertheless very solid, of excellent quality and flavor and which remain fit for use a long time. The outer leaves are few and are of a deep green, the inner portion blanching to a beautiful cream yellow.

Prize Head. This variety has no superior where a thin, tender, crisp and sweet lettuce is wanted for the home garden or local market. Being so thin leaved and tender it, of course, wilts very quickly after cutting, and is not suitable for distant markets. Plant large, deep green, so washed with red as to appear more red than green, forming a head of a dense mass of leaves, rather than one like a cabbage, and very slow to run to seed.

Hanson. An old variety of great merit. It forms a large, flat, cabbage-like head very slow to run to seed. The outer leaves are bright green with veins of lighter shade, inner leaves white usually curved and twisted at the base. A very attractive variety of excellent quality and extensively grown for home use.

New York Market. One of the largest varieties in cultivation. The heads are very solid with but little tendency to run to seed. It blanches itself naturally, is crisp, tender and of excellent flavor, and is always free from bitterness. It is not a forcing variety but is one of the best for summer use.

Preceding varieties at uniform prices.

Pkt. 5c., ¼ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 40c., lb. $1.25.

A New Lettuce — "GIANT GLACIER." WITHSTANDS HEAT AND DROUGHT TO AN UNUSUAL DEGREE.

THE INTRODUCERS of this variety say that it “produced fine solid heads when the soil was so dry and the weather so warm that the varieties usually depended upon for a mid-summer supply failed. The plants are of strong growth, twelve inches in diameter, with large light green outer leaves, finely serrated, and swollen like the leaves of the Savoy Cabbage. The heads are extra large, often six inches in diameter. The interior is white, crisp and tender, entirely free from the bitter pungency of many sorts when grown under the hot summer sun.”

Prices. Pkt. 5c., ½ oz. 10c., oz. 20c., 2 oz. 30c., ½ lb. 50c., lb. $1.75.

MARTYNA. LEAK.

American Broad Flag. The standard variety. Pkt. 5c., ¼ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 40c., lb. $1.25.
Musk Melon

PAUL ROSE

THIS EXCELLENT MELON is a cross of the Osage with the Netted Gem and combines the sweetness of the former, with the general appearance of the Gem. It originated with a large and very successful melon grower, who claims that he realized twice as much from an acre of this melon as from any other sort. In shape it is oval, about five inches in diameter, and has the fine netting of the Netted Gem or Rocky Ford. While in size, shape and general appearance the Paul Rose and the Netted Gem or Rocky Ford are much alike they differ in color of flesh that of the former being of a rich orange red similar to that of the Osage. The flesh is firm, very thick, fine flavored, and sweeter than that of the Osage. It is seldom that a melon combines the superb quality of this variety, with the necessary features for shipping. The Paul Rose, however, is especially adapted for shipping, remaining in good condition longer than most other varieties.

Price. Pkt. 5c., oz. 18c., 2 oz. 25c., 1 lb. 35c., lb. $1.25.

EMERALD GEM UNIFORMLY GOOD

Notwithstanding the excellence of the many new varieties, this ranks with them in delicious and peculiar flavor, and we are somewhat in doubt if any other variety equals it in certainty and uniformity of excellence. The flesh is thicker than that of any other melon of equal size and ripens clear to the thin rind. It is very sweet and melting and of an especially pleasing flavor; in color a beautiful salmon. The melons are small—about the same size as the Netted Gem. The skin, while ribbed, is generally smooth, sometimes slightly netted and in color deep green. Its general appearance is not attractive, which undoubtedly prevents it from being grown for market as extensively as it otherwise would, but in sections where its excellence and uniformity have been recognized it is largely used. The vine is of vigorous healthy growth, productive, and matures fruit extremely early.

Price. Pkt. 5c., oz. 18c., 2 oz. 25c., 1 lb. 35c., lb. $1.25.

COSMOPOLITAN THE MOST BEAUTIFUL

The introducers said of this at its introduction that it was truly cosmopolitan in character, combining the firm sweet flesh of the French Cantaloupe with the delicious flavor of the American Musk Melon. It is the most beautiful of the green fleshed varieties; of medium size, nearly round, slightly oval, without ribs. Color light green but becoming covered when ripe with dense, silver-grey netting. Flesh green, firm, sweet, and of fine flavor. Vine hardy and very productive. The very handsome appearance of this melon, combined with its excellent quality and great productiveness, should make it popular with all those engaged in growing melons for market; while its quality well entitles it to a place in the home garden.

Price. Pkt. 5c., oz. 18c., 2 oz. 25c., 1 lb. 35c., lb. 90c.

Prolific Nutmeg. Fruit of medium size, round, slightly flattened, ribbed and heavily netted. Flesh pale-green, thick, and well flavored.

Surprise. A popular variety, although of but medium quality. Fruit slightly oval and of medium size; slightly ribbed, seldom netted. Skin cream yellow, flesh deep salmon, vine hardy and productive, and matures fruit early.

Extra Early Hackensack. Fruit of good size, round, flattened, heavily ribbed and netted. Flesh green, thick, and of fine flavor.

Osage, or Improved Miller’s Cream. Although much larger the fruit resembles the Emerald Gem, having the same dark green skin with lighter bands between the ribs. Flesh is very thick and firm, of fine quality; color orange. Keeps well and is a favorite with shippers.

Improved Orange Christiana. A favorite in the Boston market. Known also as Black Japan. Fruit above medium size, round, generally smooth; dark green. Flesh yellow, very thick, and of finest flavor and quality.

Montreal Market. One of the largest of this type. Fruit round, slightly flattened, with broad heavy ribs and heavily netted. Flesh light green, very thick, and when melon is well grown of finest flavor and quality.

Bay View. One of the largest, most productive and best flavored melons grown. Shape oblong, flesh green.

The preceding seven varieties at uniform prices. Pkt. 5c., oz. 10c., 2 oz. 15c., 1 lb. 25c., lb. 85c.

A Very Popular Variety — NETTED GEM, or ROCKY FORD

THIS EXCELLENT VARIETY was introduced as the Netted Gem in 1881 and has always been a popular melon. It has, however, attained greater popularity under the name Rocky Ford. It has been very extensively grown in Colorado, there having been shipped from there in season of 1900, 750 cars, representing the product of 5,500 acres, and doubtless the acreage has since been increased. It acquired its later name from the town Rocky Ford, which led in the production and shipping of this variety. It is claimed by many to be the finest small fruited melon in cultivation. Fruits are of uniform size, nearly globular, sometimes slightly oval, always finely netted, and of a grayish golden yellow when ripe. The flesh is light green, ripens to the rind, melting, and of fine flavor. The vine is of strong, healthy growth, very productive, and fruits ripe early. It is undoubtedly one of the best for shipping, and its uniformly excellent quality makes it equally desirable for the home garden.

Price. Pkt. 5c., oz. 18c., 2 oz. 25c., 1 lb. 35c., lb. $1.25.
**Water Melon**

**Sweetheart.** One of the best for shipping. This melon introduced several years ago, has become very popular with shippers in the south. It not only excels as a shipping variety, but is of more than average good quality. Fruit is large, oval, and very heavy. It is uniformly mottled light and very light green, and has a very thin but firm rind. The flesh is bright red, firm and solid, but very tender, melting and sweet. The fruit retains its good quality for a long time after ripening. The vine is vigorous and productive and ripens fruit early. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**Kleckley’s Sweet, or Monte Cristo. The Sweetest of All.** Since its introduction until now this has been known as the “sweetest of all” watermelons. The fruit is large, oblong, averaging eighteen to twenty inches in length by ten to twelve inches in diameter, with a dark green skin and having a very thin brittle rind. The beautiful bright scarlet flesh with its very large solid heart, the white seeds being placed close to the rind, is crisp, sugary and melting to a remarkable degree, and is entirely free from any stringiness. Although its thin brittle rind unifies it for shipping to distant markets, its uniformly superior quality guarantees its ready sale in any markets to which it can be sent in good condition, while for the home garden but few if any equal it. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 90c.

**Cole’s Early.** A small but very early variety, of fine quality, and sure to mature in any latitude where melons can be grown. Rind thin, skin green with white stripes, flesh dark red. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**Phinney’s Early.** A standard early variety; of medium size, oval; marbled with two shades of green; rind thin; flesh pink, sweet, tender and crisp. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**FORDHOOK EARLY**

**The Earliest Large-Fruited Melon.**

This new variety ripens close to the small Cole’s Early and before the Phinney’s Early, and is considerably larger than the latter. In form rather short and blocky; skin dark green; sometimes having faint stripes of lighter green; flesh bright red, sweet and of fine quality. The rind is thin but skin is tough, making it an excellent variety for shipping.

**Price.** Pkt. 50c., oz. 15c., 2 oz. 25c., ¼ lb. 35c., lb. $1.25.

**Peerless, or Ice Cream.** Fruit oblong, of medium size; skin dark green, flesh scarlet, very sweet. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**Mountain Sweet.** An old and popular variety, especially in New England. Rind green and rather thick; flesh scarlet, solid, very sweet, and of excellent quality. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**Kohl’s Gem.** Fruit round or slightly oval and very large. Skin marked with irregular stripes of dark and light green; flesh bright red and rather coarse, rind very tough and hard, making it especially desirable for shipping; and it is largely grown in the south for that purpose. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**Cuban Queen.** Fruit large, globular or oval; skin beautifully striped light and dark green; rind thin but stands shipping well; flesh bright red, very solid, crisp and sweet. Pkt. 50c., oz. 10c., 2 oz. 15c., ¼ lb. 25c., lb. 75c.

**Eight Varieties Mixed.** Pkt. 50c.

**A NEW WATERMELON — Halbert Honey**

**THE BEST FOR THE HOME GARDEN.**

The new Halbert Honey is a rival of the Kleckley Sweet in sweetness, is fully equal in flavor, more regular in form and much more productive. The melons average eighteen to twenty inches in length by six to eight inches in diameter and are blunt at both stem and blossom end. In color they are deep glossy green. The flesh is a beautiful crimson-lake and extends to within less than half an inch of the rind; is entirely free from any fibrous substance, and is rich, sugary and melting, with a delicious flavor peculiar to itself. The vine is hardy and wonderfully productive and matures its fruit sufficiently early to permit it being grown throughout the Northern States, where frost does not appear before September 1st. The thin rind, like the flesh, is so tender that it will not stand shipping to any great distance, but for the nearby market and the home garden no other variety in all respects equals it.

**Price.** Pkt. 10c., oz. 20c., 2 oz. 30c., ¼ lb. 35c., lb. $1.65.
ONION

GLOBE-SHAPED VARIETIES.

Eastern Grown Seed.

The Heaviest - The Best Keepers - The Handsomest

The Quietest to Sell - The Money Makers.

To NO other branch of our business do we give more attention than to the growing of onion seed. We have for several years paid especial attention to the varieties which are globe-shaped, personally selecting our stock in the field, and have to offer THAT GROWS.

It must be obvious to all that a globe-shaped onion occupies no more room when growing than a flat one of equal diameter, and equally obvious that the first would be the heavier when mature; therefore the yield per acre must be much larger. The globe-shaped onions all have thicker outer skins than the flat, bear handling better, and consequently are much better keepers. They are also of more attractive form, selling easier and usually at higher prices. The globe-shaped varieties are the ones to grow for profit. To grow them the right seed is necessary.

That there is a vast difference between the results obtained from the use of eastern and western grown stocks all careful and candid observers will admit, and, while we are not prepared to say here that seed which will produce crops of uniformly globe-shaped onions cannot be grown in California, we can truthfully say, after years of careful observation, that we have yet to see a crop grown from western seed that could at all compare in this respect, or for that matter in any other, with the many grown from our Selected Eastern Grown Seed.

Yellow Globe Danvers. Eastern Grown. This variety is more largely grown than any other, and in Massachusetts the demand for seed of it by far exceeds that for all other varieties combined. The strain which we offer is much different from the old type, that being a flat bottomed onion while the upper half somewhat resembled this. This more nearly resembles the Southport type, is true spherical form, only differing from the Southport in that it is a very little flattened at the top and bottom. We have for several years been selecting in the field such bulbs as were strictly true to the type and have developed a very superior strain. Our onions when selected for seed and spread upon the storage floors excite the admiration of all who see them. As we have said above, this type is the one to grow for profit.

Southport Yellow Globe. Very similar to our Yellow Globe Danvers, a little more elongated and possibly a little later in maturing but not differing nearly as much in that respect as commonly supposed.

Southport Red Globe. Identical in form with the preceding. The handsomest of all onions and is being grown to greater extent at present than ever before.

The preceding varieties each, pkt. 5c., ½ oz. 15c., oz. 25c., 2 oz. 40c., ½ lb. 60c., lb. $2.00

Southport White Globe. Of true globe shape. Not largely grown but brings the highest prices in market of any variety. A much better keeper than any other white variety. Pkt. 5c., ½ oz. 15c., oz. 25c., 2 oz. 40c., ½ lb. 75c., lb. $2.60.

Extra Early Red Flat. The earliest red variety. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 35c., lb. $1.15.

Early Yellow Cracker. The earliest yellow variety; very flat, mild; needs care in handling to insure keeping; very desirable for home markets. Pkt. 5c., ½ oz. 12c., oz. 20c., 2 oz. 35c., ½ lb. 50c., lb. $1.50.

Early Red Globe Danvers. While not all of a crop of this has as yet been as perfect in shape as the illustration, a proportion of them have and the balance somewhat approaching it. It might perhaps be better described as a very thick onion rather than globe-shaped. It is nearly as early as the Early Red Flat, has a firm skin, of fair size and good color. It is remarkably free from the tendency to produce still necks or scallions. It is growing in favor, to which its earliness and other good qualities well entitle it. Pkt. 5c., ½ oz. 12c., oz. 20c., 2 oz. 35c., ½ lb. 50c., lb. $1.75.

White Portugal or Silver Skin. A white, thin skinned variety, of especially mild flavor and very tender. It grows to a good size and is early. Desirable for the market gardener for early use and for the home garden because of its tenderness and mild flavor. Pkt. 5c., ½ oz. 15c., oz. 25c., 2 oz. 40c., ½ lb. 75c., lb. $2.50.

Yellow Globe Danvers. Best Western Stock. Offered by many leading seedsmen as their best. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 35c., lb. $1.25.

Red Wethersfield. A variety which has been extensively grown but which in most of the onion-growing districts of New England is now but little used, and while the demand for red onions seems to be increasing, that for seed is largely for the globe-shaped varieties, planters having learned the superiority of this class. We offer, however, a choice strain of seed grown from selected bulbs. Pkt. 5c., ½ oz. 10c., oz. 15c., 2 oz. 25c., ½ lb. 35c., lb. $1.25.

Prize Taker. One of the largest varieties in cultivation. Skin thin, light straw color, flesh pure white and extremely mild and sweet flavored. It is quite sure to bottom, but is late and is not a good keeper. It is largely used for sowing early in the hotbed for transplanting, and for that purpose is an excellent sort. Pkt. 5c., ½ oz. 10c., oz. 20c., 2 oz. 35c., ½ lb. 50c., lb. $1.50.

The Economy Which Leads to Buying the Cheapest Onion Seed is Surely Great Extravagance. The Best is the Cheapest.
Onion Sets.

Prices Variable.

If by mail add 10 cents per quart to price.

White. Qt. 20c., ½ pk. 65c., pk. $1.25.

Yellow. Qt. 20c., ½ pk. 65c., pk. $1.25.

Top or Button. These are the best for the home garden, especially for growing to full sized matured onions. The sets are obtained by planting large or matured onions which bear the sets at the top of the seed stalk.

We have been unable to secure these for many years and consider ourselves fortunate in being able now to offer them.

Potato Onions. Qt. 15c., ½ pk. 50c., pk. 90c.

Shallots. Qt. 20c., ½ pk. 65c., pk. $1.25.

PARSNIP.

Arlington Long Smooth. A selected strain; roots extra long; desirable for deep mellow soil.

Hollow Crown. Roots shorter than the preceding; succeeds where that would not, that is on shallower soils.

Of both varieties we have to offer choice strains of seed which we have for many years sold and which cannot be surpassed.

Each, pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 20c., lb. 50c.

PARSLEY.

Champion Moss Curled. Extra Double Curled.

Each, pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

PUMPKIN.

Small Sugar. The popular variety in New England for pies; fine grained and sweet. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

Large Cheese or Kentucky Field. Shape flat, skin of a rich cream color when ripe, flesh tender and of fine quality. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

Mammoth Tourne. One of the largest in cultivation; good for feeding stock. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

Connecticut Field. The standard variety for feeding stock. Pkt. 5c., ½ lb. 15c., lb. 50c.

PEAS. Extra Early Smooth Varieties.

Nearly the whole crop can be gathered at one picking. Vines grow about 24 feet in height, bearing abundantly pods which, although small, are always well filled. Peas are small, bluish green.

½ pt. 10c.; pt. 15c.; qt. 25c.; 2 qts. 40c.; ½ pk. 75c.; pk. $1.25; bush. $4.50.

Ross Bros.' Best Extra Early. So nearly identical are all of the first early smooth white peas offered under a multitude of names, that in view of the great decrease in demand for such peas, we no longer consider it necessary to offer but one variety. In offering this stock under this name, we are confident that it is equal to any of this type offered elsewhere, regardless of what name others may choose to attach to what they offer. Others may have as good, none have better. We do not claim that it differs greatly in type, it at all, from others of this class, but do claim that by years of careful selection by one of the most reliable growers, there has been some improvement in size of peas and pod, and uniformity of ripening, on some stocks of Daniel O'Rourke, Philadelphia Extra Early, etc., and in these respects, as well as in productiveness, it equals the best known by other names.

½ pt. 10c.; pt. 15c.; qt. 25c.; 2 qts. 40c.; ½ pk. 75c.; pk. $1.25; bush. $4.50.

Note that we offer Peas by the Definite Quantity — HALF PINT. — Not by the Indefinite one — PACKET.
but not equal to the Nott’s Excelsior for the market garden. bush. $6.50.

Nott’s Excelsior. This is similar to the American Wonder but superior in nearly all respects. The vine grows about 14 inches high, is of vigorous habit, exceptionally uniform in growth and wonderfully productive. The pods are larger than those of the Wonder and well filled. The peas are of fine flavor. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 55c., ½ pk. $1.00, pk. $1.75, $7.00.

Premium Gem. A popular variety, growing about 15 inches high. Pods are a little larger than those of the Wonder, and though not generally so closely packed with peas are yet well filled. The peas are wrinkled, of good size and flavor. Considered by many to be superior to the Little Gem. ½ pt. 10c., pt. 15c., $1.25, pk. $3.50.

McLean’s Little Gem. An old favorite and yet largely grown. Height about 18 inches. Pods are well filled. Peas of good size, green, wrinkled, and of excellent quality. A productive and desirable variety. A little later than the preceding varieties. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.50, bush. $5.50.

Second Early, Medium and Late Sorts.

McLean’s Advance. A green, wrinkled marrow of extra quality. The standard second early in Boston market, and grown extensively everywhere. Height, 2½ feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.35, bush. $5.00.

Hosford’s Market Garden. A wrinkled variety; ripens closely to Advance; of branching habit, very stocky. Peas medium size, of good quality. Height, 2 feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.35, bush. $5.00.

Bliss’ Abundance. Similar in general appearance to the Hosford’s Market Garden but taller. Pods from 3 to 3½ inches long. Peas of good size and excellent flavor. Very productive. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.50.

Heroine. A distinct and valuable variety. Foliage even and luxuriant, pods long, handsome and well filled with large peas of fine flavor. Remarkably true and fixed in its habit of growth. Height, 2½ feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 45c., ½ pk. 75c., pk. $1.35, bush. $5.50.

Yorkshire Hero, or Dwarf Champion. An old wrinkled sort, peas large and of delicious flavor, vines of a robust branching habit. Notwithstanding the many excellent new varieties, this old favorite still continues to be in great demand. Height, 2½ feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.50.

Shropshire Hero. A strong, robust grower and very prolific. Pods and peas are of large size. Peas are of delicious flavor. We know of no other variety which will shell out so many peas from a given quantity of pods. Height, 2½ feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.50.

Improved Stratagem. An improvement on the old Stratagem, the tendency to sport being almost entirely removed. Vines are stocky, of vigorous habit and luxuriant foliage, and very productive. Height about 2½ feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.50.

Everbearing. Vigorous and branching in habit of growth. Remains in bearing longer than most varieties. Pods medium in size. Peas are very large and of best quality. Height about 2½ feet. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 55c., ½ pk. $1.00, pk. $1.85, bush. $7.00.

Telephone. The most popular late variety with market gardeners. Vines large and vigorous, growing about 4 feet high. Foliage light colored and large. Pods large. Peas large and sweet. We offer a carefully selected stock. ½ pt. 10c., pt. 15c., qt. 30c., 2 qts. 55c., ½ pk. $1.00, pk. $1.85, bush. $7.00.

Champion of England. The most popular late sort for the home garden. It is unsurpassed in richness and flavor by any of the newer varieties, if indeed equalled. Pods medium size. Peas of medium size and much shriveled. Vines fairly productive. Height, 4 to 5 feet. ½ pt. 10c., pt. 15c., qt. 25c., 2 qts. 40c., ½ pk. 70c., pk. $1.25, bush. $4.50.

Large Black-Eyed Flarrowfat. A well-known variety, growing about five feet high. Pods large and well filled. Peas large, round and smooth, but much inferior in quality to the wrinkled sorts. ½ pt. 6c., pt. 10c., qt. 15c., 2 qts. 25c., ½ pk. 45c., pk. 75c., bush. $2.60.

White Flarrow. Similar to the preceding. Prices the same.
THE stocks which we offer of the following varieties were all grown in Aroostook County, Maine, by experienced and reliable growers, and especially for seed. They are of good size, healthy, and true to name, and we feel sure that customers will be pleased with their appearance. The varieties offered are such as our experience and that of others has led to think the most desirable. That a charge of seed is profitable and that it should be grown as far north as possible, is a question almost beyond discussion, as it is almost universally admitted to be a fact. While we would lead none to infer that we think that there is no choice in several varieties which are in general somewhat similar, we believe that that which is often of nearly as great importance as the choice of a variety is simply a change of seed, we therefore suggest to those who may not send their orders until the season is well advanced (when we are liable to be sold out of some varieties) that they mention a second choice or even a third with which we might fill the order, if out of the first named sort. This often would save customers much annoyance, and enable them to get seed much sooner than would otherwise be possible. All varieties are put up in sacks, guaranteed to contain 165 pounds (a barrel), plainly marked with name of variety.

**EXTRA EARLY VARIETIES.**

**Early Bovee.** An extra early variety, claimed by the introducers to have outyielded all other sorts. Closely resembles the Queen in shape and color; of good size, producing but few small tubers, and of best quality. All reports seem to bear out the introducers’ claim of large yeldings when planted on strong soil. Pk. 50c., bush. $1.50, bbl. $3.75.

**Early Fortune.** Recommended as one of the best for early market, as it stands shipping well. A heavy cropper. In form and color it resembles the Rose, in quality surpasses it. The introducer says: “It is the earliest potato in the world, and I have tested everything. The quality, shape and color is of the best. It is going to lead everything.” Pk. 50c., bush. $1.50, bbl. $3.75.

**Early Six Weeks.** An extra early variety, of good quality, cooking well as soon as it attains marketable size. In size medium to large, color light red or rose, form round oblong, resembling the Ohio, and having the speck peculiar to the Ohio type. Keeps well. A good yielder. Our grower says of it: “I consider it the best all around potato ever introduced.” Pk. 50c., bush. $1.50, bbl. $3.75.

**Early Harvest.** An early white skinned variety of finest quality. A vigorous grower and great yielder. Said to bear shipping better in hot weather than most kinds. Pk. 50c., bush. $1.50, bbl. $3.75.

**Early Norther.** In general appearance closely resembles its parent, the Early Rose. Since its introduction it has always been a favorite. Matures about with the Rose, perhaps a little earlier, is equal to that in quality and more even and regular in form. Pk. 50c., bush. $1.50, bbl. $3.00.

**Irish Cobbler.** Our grower says of this: “The biggest potato and greatest producer I have ever known among the first early varieties. It will outyield all other early kinds and equal most of the later varieties. Quality the best. Color a pure creamy white. Shape round to oblong, smooth. Vines very stocky, foliage dark green. Withstands drought remarkably well for an early variety. It is a wonderful potato.” Pk. 50c., bush. $1.50, bbl. 4.00.

**Early Essex.** A seedling of the Early Rose, which it resembles. The vine, however, is of ranker growth and more productive. It originated years ago in Massachusetts, and while it has never been a leading sort it has been, in portions of New England, a popular one. Pk. 50c., bush. $1.50, bbl. $3.75.

**New Queen.** A very popular sort. Closely resembles the Beauty of Hebron but is considerably earlier. A heavy yielder and of excellent quality. Pk. 50c., bush. $1.50, bbl. $3.50.

**Clark’s No. 1.** An old favorite and still one with some growers; claimed by them to be earlier and more productive than the Rose, to which it is similar in general appearance. Of excellent quality. Pk. 50c., bush. $1.50, bbl. $3.75.

**Early Rose.** This standard variety needs no description; it is sufficient to say that most new early varieties are compared with this in earliness and quality. Pk. 50c., bush. $1.50, bbl. 3.75.

**Beauty of Hebron.** One of the most popular varieties. Perhaps more extensively grown than any other. Productive, early and of the best quality. Pk. 5 c., bush. $1.50, bbl. $3.50.

**Early Thoroughbred.** A productive early variety. Matures with the Rose, in appearance resembles it, produces but few small tubers; is of extra quality. Vines are exceptionally hardy. Pk. 50c., bush. $1.50, bbl. $3.75.
POTATOES — Continued. — Second Early, or Medium Varieties.

Prolific Rose. This is neither a selection nor sport of the Early Rose but a new seedling of merit. Vines more stocky. One of the heaviest yielders of all the Rose seedlings. A little later than the Early Rose. We therefore place it with the second earliers, although we note that our grower now places it with the first early sorts, while formerly he listed it among the second early. Shape similar to the Early Rose. Color the same, except that the seed end is nearer red. Pk. $0.50; bush. $1.50; bbl. $3.75.

Aroostook Beauty. Our grower says of it: "The rankest grower of nearly fifty varieties. Large, very smooth, about the shape of Carman No. 1. Rose colored. Never has rotted with us. Has no weak spots; of fine quality; no blossoms. Destined to become a universal favorite." Pk. $0.50; bush. $1.50; bbl. $3.75.

Delaware. Succeeds well in all soils. A valuable combination of size, yield and quality. White throughout. Shape oblong. Pk. $0.50; bush. $1.50; bbl. $3.75.

Late, or Main Crop Varieties.

Green Mountain. A white skinned variety of flat oval form, smooth and attractive. Ripens slowly and is a good keeper. Quality excellent when well grown. This variety has been growing in popularity and is now the leader of this class, if not the most popular of all varieties. Pk. $0.50; bush. $1.50; bbl. $3.75.

Carman No. 1. Originated by Mr. Elbert S. Carman, late editor of the Rural New Yorker. Has been very popular wherever grown. Shape round or globular, skin white, shallow eyes; not inclined to rot in field or cellar; of excellent quality. Late in ripening, but yields large crops of fine marketable potatoes. Pk. $0.50; bush. $1.50; bbl. $3.75.

Cambridge Russet. In shape round to oblong, skin a beautiful light russet-brown covered with fine veinings. Uniform in size — none overgrown, few small ones. Never hollow. Of finest quality. Has a rich growth of vines which resist blight and drouth remarkably. Very productive. Pk. $0.50; bush. $1.50; bbl. $3.75.

Carman No. 3. Also originated by Mr. Carman, who said of it: "First, it is the handsomest round white potato ever produced; second, it will outyield any potato of its class; third, practically every potato is of merchantable size; fourth, its table qualities are up to the highest standard." It has yielded over six hundred bushels per acre, and in one instance twenty-two acres have produced 7,600 bushels. The vines grow very large and vigorous, rich dark green in color, and are not troubled by blight or bug as much as many varieties are. Pk. $0.50; bush. $1.50; bbl. $3.75.

Rural New Yorker No. 2. This was one of the first varieties originated on the experimental grounds of the Rural New Yorker. Very large and smooth, in form oblong inclined to round; skin and flesh white. Of superior quality. A large cropper. Pk. $0.50; bush. $1.50; bbl. $3.75.

Spaulding's No. 4. A variety which we introduced two years ago with which many of our customers have been extremely successful. Previous to our introduction it had a record of 479 bushels to the acre and following in a comparative test proved the best producer of 190 varieties. In color it resembles the Early Rose, is somewhat similar in shape but inclines to oblong and is thicker; very uniform in size and very attractive. It is of good quality and seldom rots. It is medium early in ripening, the vines are of strong healthy growth and seldom affected with blight. Pk. $0.50; bush. $1.50; bbl. $3.75.

Reports at harvest time from the sections where seed potatoes are largely grown indicated a short yield but as at this writing reports are much more favorable and we have more definite knowledge as to what we shall receive, we are enabled to offer choice stock at the above low prices and on all orders of five barrels or over 25 cents per barrel may be deducted from these prices.

**Early Scarlet Turnip, White Tipped.** Roots round, bright scarlet, the lower part white. A rapid grower, well adapted for forcing and used largely for out-door planting, although more liable to be pithy than the Scarlet Globe.

**Rosy Gem.** Identical with the preceding. Our first trial of it led us to think that it was a selected strain less liable to pithiness than the White Tipped; subsequent ones, however, have convinced us that there is no difference, but from its popularity with some we feel obliged to catalogue it under this name.

**Non Plus Ultra, or Deep Scarlet.** One of the earliest; tops very small, especially suited for forcing. Color deep, rich red; form, globular.

**Scarlet Globe.** The shape of this when large enough for use at first is oval, in later stages of growth is more nearly globular. Brilliant red, which it holds long after pulling. Tops are a little larger than those of some varieties, but it is, nevertheless, largely used for forcing because it is seldom pithy, excelling in this respect any other variety either when planted under glass or out of doors. By far the best of its class for all purposes.

**New Early Scarlet Olive Shaped, or Leafless.** This differs greatly from the old Olive Shaped, in fact the name is hardly appropriate. It more closely resembles the French Breakfast (though much smaller), having an abrupt termination of the root. It is deeper in color than the Olive Shaped; it has much smaller tops than other varieties, and is, therefore, admirably adapted for forcing, as it can be grown more closely. We cannot recommend it for out-door planting, as with us it has become pithy before attaining a size suitable for pulling.

**French Breakfast.** A stump-rooted variety; longer than the preceding varieties, often slightly larger at bottom of root than at the top. Bright scarlet, white tipped. An old favorite yet popular for the home garden, but little used by market gardeners.

**Early Long Scarlet Short Top.** Once the most popular radish, but has been largely displaced in most sections by the round varieties. Grows from six to eight inches long; is ready to pull in twenty-five to thirty days from sowing.

**Woods Early Frame.** Similar to Long Scarlet, but shorter, of more brilliant color and slightly thicker at top, matures quicker and is more largely used for forcing.

**Chartier, or Shepherd.** A long variety, distinct, and one of the handsomest. Color, red at the top, shading through pink in the middle to white at the tip. Attains a very large size before being unfit for use. Of too strong growth to be used for forcing, but a desirable variety for outdoor growing.

**White Strasburg.** A fine summer variety, growing about four inches long and two inches thick. Pure white.

**Long Black Spanish Winter.** One of the hardestiest and best for winter use.

**Chinese Rose Winter.** A popular winter variety, roots cylindrical, slightly larger at the bottom, terminating abruptly. Grows about one-half above ground. Color of upper part scarlet, shading to rose in lower portion; 6 to 8 inches long.

---

**SQUASH**

**Mammoth White Bush Scallop.** An improvement on the old variety, larger, pure white and superior in quality. The Scallop varieties, while popular in the South, are but little used in the north.

**Early Summer Crookneck.** For early planting the Crookneck type is used in New England to almost the exclusion of any other. This, while much smaller than the Mammoth Crookneck, is yet largely grown, many considering it of better flavor.

**Mammoth Summer Crookneck.** This, like the preceding varieties, is of true bush form. The squashes are nearly twice as large as the ordinary Summer Crookneck and more warty. It is generally considered earlier than that. This opinion is held because the fruit attains more quickly a size equal to the ordinary strain when that is mature or fit to eat. If fruit of this were left on the vine until really in condition to eat, instead of being taken when half ripe, it would not then be held that it was much earlier, if indeed any. It is because it has been so largely used before reaching a proper size that it is thought by some to be inferior in quality and flavor to the old Crookneck, while it really is fully equal to that.

**Fordhook.** An early running variety, suited for either summer or winter use. Fruit small, oblong, eight to ten inches in length, with smooth, thin skin, bright yellow; flesh straw yellow, dry, sweet and of fine flavor. Excellent for baking or for pies; a remarkable keeper.

**The Faxon.** A very desirable variety for the home garden. It is very productive, of medium size (five or six pounds), fine grained, dry, sweet, a good keeper, uniform in shape, and varied in color. This variation in color is a distinct feature of the squash. While some of the ripe squashes are pale yellow, with still paler yellow stripes, others are green, mottled and faintly striped with a light green.

**Price of each of preceding varieties:** Pkt. 5c., oz. 10c., 2 oz. 25c., lb. 1 lb. 25c., 1 lb. 75c.
SQUASH--CONTINUED.

Prolific Marrow. (Dunlap's.) The earliest fall variety; from a week to ten days earlier than any other Marrow. Color deep orange. Skin considerably pitted. Not as thick meated as the Orange Marrow nor quite equal in quality, but especially desirable on account of its earliness and also because it is very prolific. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 85c.

Orange Marrow. Also an early variety, generally considered identical with the Prolific Marrow, but differs sufficiently to be catalogued as a variety. It is identical in color and pitting but is more nearly round, later, much thicker meated and of better quality. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

Boston Marrow. This grows larger than both of the preceding but is not of so deep color. Skin thin, yellow with pinkish tint. Desirable for pies but not as dry as the Hubbard. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

Essex Hybrid. A cross between the Hubbard and old Turban, partaking somewhat of the features of both. Like the Hubbard, it is hard shelled. In color it is like the Turban and in form somewhat resembles it, but an improvement. Of fine flavor and quality and an excellent keeper. (See cut.) Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 90c.

Bay State. Similar in shape to the Essex Hybrid; shell slate color and harder, and flesh is dryer than that of variety. Of excellent flavor and very solid. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 30c., lb. $1.00.

Warren. Similar in shape to the Essex Hybrid, but of richer color, a very deep orange. Shells also are thicker and are rough and warty. Claimed to be of better quality. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 30c., lb. 90c.

GOLDEN HUBBARD.

This has now become a standard variety, and as extensive as our list of varieties now is this is yet a decided acquisition.

It is a distinct sort, of the shape and general character of the Hubbard, but a little smaller, earlier to mature, and a rich orange red instead of the dark olive green of the old Hubbard, while the flesh, which is thick, is a little deeper colored, of fully as good quality, fine grained and dry. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 30c., lb. $1.00.

Hubbard. A well-known and favorite winter variety, more largely grown than any other. Very hard shelled, skin dark green, flesh yellow, fine grained, sweet, dry, and of the best flavor. We offer a choice strain, considered by some of our customers to be superior to the popular Chicago Hubbard. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 90c.

Chicago, or Warted Hubbard. A selection of the Hubbard with thickly warted shell. Equal in quality to that and generally considered to be of more attractive appearance. Of this also we offer a carefully selected strain, unsurpassed by any we have ever seen. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 90c.

GOLDEN BRONZE. A NEW VARIETY.

The introducers say of it: "A cross, some four years ago, of the Bay State and Boston Marrow. In form the same as the last named, with stem and blossom end precisely like that variety; also having that peculiar wrinkled appearance of the skin like the Boston Marrow. Size averaging from eight to ten pounds; color a dark greyish green, with bronze on upper surface when ripe; flesh an exceedingly bright golden yellow. Fine grained, very sweet and of delicious flavor. Early in maturing, a good keeper and yielder. Squashes are of very uniform size and appearance. As a squash, combining the qualities desired for the table and pies, this has no superior. Specimens grown in 1897 were kept until June, 1898." Pkt. 5c., oz. 10c., 2 ozs. 20c., ½ lb. 30c., lb. $1.00.

Marblehead. Form oval, shell hard, slate-colored. Dry, delicious flavor and a good keeper. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 90c.

Sibley, or Pike's Peak. A fine old variety; dry, fine-grained and of rich, delicate flavor. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 90c.

Large Winter Crookneck. Vine resembles that of the pumpkin, easily grown. Seldom troubled by borers, very productive; of fair quality. Pkt. 5c., oz. 10c., 2 ozs. 15c., ½ lb. 25c., lb. 75c.

Mammoth Chili. The largest variety, attaining under special cultivation an enormous size, and often weighing 200 pounds or over. Pkt. 10c., oz. 20c., ½ lb. 60c.
SPARKS’ EARLIANA

This new extra early variety is exactly what many gardeners have for a long time desired—an extra early which would, if not equal the later varieties, more nearly approach them in size, smoothness and quality than any of those of previous introduction. In the Earliana we have one that at the very least compares favorably with later varieties in size and smooth, regular form, and surpasses many of them in solidity, having a smaller seed cavity and fewer seeds, even at almost any other variety, while in quality it ranks with the best. It has also the merit of ripening a good proportion of its fruit early, and on this account alone is a profitable variety for the market gardener. The vine is of rather slender habit, hardy and productive, and produces its handsome deep red fruit in clusters of five to eight.

Price. Pkt. 10c., ½ oz. 20c., oz. 35c., 2 ozs. 60c., ½ lb. $1.00.

Atlantic Prize. An extremely early variety of medium size; bright red.
Acme. An old, yet still popular variety. Fruit of good size; bright pink.
Livingston’s Perfection. One of the most popular large red tomatoes. Fruit is very solid with not a large amount of seed. Vine hardy and productive.

IMPERIAL

The Imperial was originated by a market gardener, a large grower of tomatoes, who said of it at its introduction: “My experience with it is that it is the earliest, most solid, and most productive, perfectly smooth tomato on the market. It ripens evenly, is the best flavored, and more than twice as productive as any other known variety. It is the handsomest tomato grown; I always get first premium at the fairs.” Color purplish crimson.

Price. Pkt. 5c., ½ oz. 15c., oz. 25c., 2 ozs. 40c., ½ lb. 75c.

THE STONE

Since its introduction this has steadily increased in favor with market gardeners on account of its exceptional firmness and great productiveness. Its solidity and carrying qualities are remarkable. Its color is a desirable red; in shape, thicker from stem to blossom end than most varieties; perfectly smooth, making it very handsome and salable.

Price. Pkt. 5c., ½ oz. 15c., oz. 25c., 2 ozs. 40c., ½ lb. 75c.

TRUCKER’S FAVORITE

This new variety is very uniform in size, thick meated and very solid. Although very large it is always smooth, ripens evenly, and is of the finest flavor. The vine is of strong, vigorous growth, not subject to rust or blight, and produces enormous crops, yielding well throughout the season until killed by frost.

Price. Pkt. 10c., ½ oz. 20c., oz. 30c., 2 ozs. 50c., ½ lb. 85c.

Three Dwarf Varieties

Which on account of their dwarf habit and compact form may be set much closer than the ordinary type

Livingston’s Dwarf Stone. A new variety from the Livingstons. They say of it: “In habit of vine it resembles Dwarf Champion, but is of stronger growth and more erect. The fruit resembles Livingston’s Stone in color, shape, and what is more remarkable for an erect sort, it is practically of the same size. Ten fruits picked from one vine at same time weighed five pounds, three ounces. Five fruits selected by eye for average size weighed two pounds, nine ounces. This was under field cultivation on farm land, with no fertilizer. Specimens weighing one pound each are quite common. The New Dwarf Stone is fully double the size of Dwarf Champion, and yet equally as early. It is fully as prolific, and consequently vastly more productive. We consider this one of our best productions, one that will meet with general favor; especially will this be true with the class of growers whose gardening is limited to a few acres, and where economy in saving land must be taken into account.

Price. Pkt. 10c., ½ oz. 20c., oz. 35c., 2 ozs. 60c., ½ lb. $1.00

Dwarf Champion. Vine dwarf and compact, early and productive. Fruit of medium size, in color deep purplish red.

Dwarf Aristocrat. Of similar habit to Dwarf Champion. Preferred by some on account of its color, which is bright red. Prices same as for Dwarf Champion.
**Turnip**

*Early White Milan.* The earliest, showiest and best early white turnip ever offered. The pure white roots are very smooth and handsome, tops small, upright and compact, allowing a close planting. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 25c., lb. 75c.

*Early Purple Top Milan.* Similar to the White Milan, but a little flatter and purple on top; an excellent variety. Superior to the well-known Purple Top Flat. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 25c., lb. 75c.

*Early Purple Top.* Strap leaved. This well-known variety is yet the most popular early one, although not equal to the Early Top Milan. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

*Early Snow Ball.* Pure white, round, of medium size and fine quality. Fit for use six weeks after planting. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

*Early Purple Top White Globe.* One of the handsomest varieties, the upper portion of the root being a purplish red, the lower pure white. A rapid grower, attaining a marketable size sooner than other large globular varieties. Of the best quality and an excellent keeper. Owing to its strong growth should be more severely thinned than other early varieties. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

---

**SWEDISH, RUSSIAN OR RUTA BAGA**

*White French, or Rock.* A very delicate flavored variety; an excellent keeper; fine for table. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

*Sweet German.* A white globe-shaped sort. Superior for table use. Of excellent quality; good keeper. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

*Breadstone.* A medium sized quick growing variety; white, faintly colored at top; exceptionally tender and sweet. One of the best table varieties. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 75c.

*Budlong.* Originated in Rhode Island by Mr. Budlong, a very extensive grower of Ruta Bagas. Earlier and more nearly round than other white varieties of this class. An excellent strain. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

*Shamrock.* A popular English Yellow Swede. A decided favorite with our local trade. Has short neck, shape oblong. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

*Long Island Improved.* This is undoubtedly the finest variety of Purple Top Ruta Baga, and is of American origin. It grows much larger than other American varieties, is therefore desirable for stock, but equally desirable for the table and market as it is tender and sweet and of very attractive appearance. Pkt. 5c., oz. 10c., 2 oz. 15c., $ lb. 20c., lb. 50c.

Grain and Miscellaneous Seeds for Forage Crops

While we always endeavor to maintain throughout the season prices quoted, owing to the liability of the market to fluctuate, these prices are subject to change without further notice.

BARLEY. Very largely used in New England as a forage plant. The seed we offer is suitable for either this purpose, or for the growing of grain, being a very choice grade. For soiling, sow 2½ to 3 bushels per acre; for grain, less is required.

Beardless. Considered by many much more desirable for green fodder, and especially so for hay, in that it is free from beards, which are thought to often injure cattle. Bush. $1.35.

BUCKWHEAT, Japanese. By far the best variety. Earlier, yields better and grain is larger than of other kinds. Bush. $1.40.

Oats. Used extensively for soiling. We offer as good and clean seed of the common strain as can be obtained, and which is doubtless suitable for this purpose. If, however, seed is desired for the raising of grain, the following variety will be found more profitable. Bush. 60c.

OATS. Long's White Tartar. Claimed to be the earliest, heaviest and most prolific domestic-grown Oat in cultivation, and suitable for all soils. The straw is long and stout, and does not easily lodge. The heads are from 8 to 10½ inches in length, while the kernels are very large, plump and heavy. The seed we offer weighs about 40 lbs. to the bushel. While we always endeavor to procure plump, heavy seed of the old common strain for soiling, it is a mistake to sow such for the purpose of securing grain, when, by the use of a new variety like this, a much heavier crop may be had. Bush. $1.25, 10 bush., or over, $1.20 per bush.

RYE (Spring.) Used very extensively in New England for a forage crop. Seed scarce. Bush. $1.50.

WINTER RYE. Bush. $1.25.

WHEAT. (Spring.) Choice selected seed. Pk. 60c. Bush. $2.25.

WINTER WHEAT. This is now being considerably used in the East for early green feed in the spring, and is considered by some to be greatly superior to rye for this purpose. Price on application.

JAPANESE OR BARNYARD MILLET

We are enabled to publish this photographic illustration of a field of Japanese Millet through the kindness of the Hatch Experiment Station of the Massachusetts Agricultural College.

JAPANESE MILLET, (Panicum Crus Galli.) The most popular forage plant ever introduced. Readily eaten by cattle either green or dry.

GOOD FOR SOILING, FOR ENSILAGE, FOR HAY.

Will produce more tons per acre of either green or dry fodder than any other plant of similar nature.

For further description see one of following pages under head of Millets.

Lb. 10c., 10 lbs. 90c., 25 lbs. $2.00, 100 lbs. $7.50.

DWARF ESSEX RAPE. Used both for green manuring and for pasturing sheep and hogs, and is considered by many to be the cheapest feed for these animals and to leave the land in an improved condition after the crop has been eaten by them. Sow as soon as frost is out of ground, the crop will be ready for pasturing in about six weeks. Sown in drills, two and one-half feet apart, it will require about three pounds per acre, broadcast about double that quantity.

Price. Lb. 12c. Lb. by mail 25c. 10 lbs. 75c. 25 lbs. or over, 6c. per pound.
Seeds for Forage Crops

Continued

VETCH. Spring. (Vicia Sativa.) Known also as Spring Tare. Used the same as the Canada Pea, as a green forage plant. May be sown alone, but is generally sown with oats, and requires then from $1 to 1 bush. per acre. Bush. $2.75.

Winter, Sand or Hairy. (Vicia Vilosa.) This thrives on poor, sandy soil, and will produce heavy crops of hay or green forage. It is perfectly hardy, may be sown either in spring or fall, and will remain green through the winter. It is claimed to be more satisfactory than Crimson Clover, as it may be sown later and produces a larger crop of green foliage earlier in the spring. It makes an excellent cover crop, preventing washing by winter storms. It may be sown with rye, the latter making a support for the vine. Alone, 1 bush. per acre; with rye, ½ bush. (60 lbs. to the bush.) Lb. 12c., 10 lbs. $1.10, 100 lbs. $10.50.

Kafir Corn. This is especially valuable for dry and comparatively poor soils, withstanding long periods of drought, and producing a fair crop of good fodder under conditions that would ruin common corn. It is distinct from the latter in habit of growth, does not stoop from the roots, but branches from upper joints. The stalks are tender and juicy, are used entire as well as the blades and are readily eaten by horses or cattle either green or dry. Usually sown in drills about 2½ ft. apart, with plants from 5 to 9 inches apart, according to the nature and condition of soil. About 10 lbs. to the acre. For further information we advise a reading of Farmers Bulletin No. 37, which may be obtained of the Secretary of Agriculture at Washington, D. C., on application. Lb. 10c.; lb. by mail, 20c.; 10 lbs. or over by express or freight, 5c. per lb.

Early Amber Sugar Cane. Sorghum is more and more becoming to be regarded of value as an addition to the list of fodder and ensilage plants. The Early Amber Sugar Cane is considered the most desirable variety of this class for these purposes. It withstands extreme drought and hot dry winds, remaining fresh and green through a dry period that would ruin corn. It is recommended for pasturing, especially for sheep and hogs. It will mature a crop of grain wherever Indian corn will ripen. This, while not quite equal in value for general feeding purposes to corn, is, however, considered very desirable for poultry in that it is greedily eaten by them, affords a desired change, and is said to greatly stimulate egg production. Further information may be gained by a reading of Farmers' Bulletin No. 50, which may be obtained free on application to the Secretary of Agriculture at Washington, D. C. Seed may be sown either broadcast or in drills with the rows sufficiently apart to admit of cultivation, the latter method being the more popular in the East. 75 to 100 lbs. to the acre. Lb. 12c.; lb. by mail, 20c.; by express or freight, 10 lbs. 75c.; 25 lbs. or over, 6c. per lb.

A Field of Peas and Oats

The above photographic illustration is from a cut loaned us by the Hatch Experiment Station.

In the Station's Bulletin No. 72 — Summer Forage Crops, we find the following regarding this combination.

"Oats and Canada field peas make the best green crop to follow clover. Generally it is advisable to make three sowings; the first as early as possible in the spring, April 20 to 25, and the second and third fifteen and thirty days later. One and one-half bushels each of the oats and peas is the usual quantity to the acre. They may both be sown broadcast at the same time after the land is plowed, and thoroughly harrowed in with a wheel harrow. Some sow the peas first, covering with a wheel harrow, then sow the oats and cover with an acre or similar harrow. This method however is hardly necessary. The first sowing will be ready about June 28 and cutting should begin as soon as the oats show the head. The average yield from the first sowing is 20 tons to the acre. The yield from the second and third sowings is not likely to be as heavy, as the crop matures more quickly during the warm weather. Oats and peas will remain in condition to be cut for 10 or 12 days. The average cow will consume 40 to 60 pounds daily until the feed becomes tough. One-third to one-half acre will furnish sufficient fodder for 10 cows twelve days."

CANADA PEAS. These may also be sown with other grains as well as with oats, and are sometimes sown in August with Barley. They are also sometimes sown alone. Pkt. 50c., bush. $1.75.
Grass Seeds

It would seem unnecessary for us to make an extended comment on the following pages, as the usual advantages and disadvantages of the grasses will be known to each of us desiring to use them. We should therefore immediately bring to the attention of the reader that there is a great variety of grasses, some of which are suitable for one purpose and not for another. The selection of the grasses for each purpose is usually determined by their adaptability to each other, and the adaptability of each other to the soil, climate, and other conditions of the locality.

For the many varying natures and conditions of soils, situations, climate, etc., there seem to be grasses especially suitable. Some thrive in one place or soil, and fail utterly in others. Some delight in cool moist land and others in dry hot places, and still others seem to have a general adaptability.obliss. Some start early in the spring, some grow till late in the fall, while others start early, bear repeated cuttings, and grow till late in the season. Some are very productive at once but die out in a few years, while others have a longer time to be established, are then productive and continue to be so for many years. It is obvious, then, that the farmer engaged in the pastures, and the one who is interested in the selection of varieties for the different soils, conditions, purposes, etc., of the grasses which we offer, we have only to say that we aim to have the best available. We do not claim to have better than any other dealer, and have but little respect for seedsmen who make such claims.

Many of the grasses in the following list have been compiled from various writers interested in the subject, and are not only given to the reader the information they contain regarding the grasses, but are also an excellent reference for the selection of the varieties for the different soils, conditions, purposes, etc., of the grasses which we offer, since their prices, together with their qualities, are also given.

As the market price of the leading varieties of grass seeds is very variable, it is advisable to consult the list of quoted prices throughout the season, although endeavoring to do so.

25 lbs. will be sent at the 100-lb. rate.

Avens Brome Grass. (Bromus inermis.) An extremely hardy grass, long-lived, and suitable for pastures, hay, or long grassed meadows. It is adapted to a wide range of soil conditions, and is especially valuable for use in poor soils or on land that is likely to be subject to drought. It is a valuable forage crop and is also used for hay.

COW PEA. This is not only an excellent forage plant, but a great soil enhancer. Its use in pastures, hay, or long grassed meadows, in common with all leguminous plants, increases the fertility of the soil upon which it grows. While this fact has been recognized for a long time, it is only within recent years that it has become generally known. It is the only leguminous plant that can be used in pastures, hay, or long grassed meadows, and it is especially valuable for use in poor soils or on land that is likely to be subject to drought. It is a valuable forage crop and is also used for hay.

Whippeno willow. Clay. Each, pkg. 15c., bush. 3.00.

Grasses.

I'llow. Clay. Each, pkg. 15c., bush. 3.00.

Forassary or other, tallest, one, yearlong, growing in popularity as a forage and slough plant. From the Farmers' Bulletin, No. 58, we take the following: "In both Europe and America it has been found to be of great value as a grass for pastures, hay, and long grassed meadows. It is especially valuable for use in poor soils or on land that is likely to be subject to drought. It is a valuable forage crop and is also used for hay.

Early Yellow. Succeeds on any soil but especially well on light sandy or gravelly soil. Can be grown to the northern limit of bean culture. Pkg. 15c., bush. 3.00.

Aveni. Clay. Each, pkg. 15c., bush. 3.00.

Canada Blue Grass. (Avena Cenata.) This thrives on a variety of soils and is very hardy. It forms by means of its creeping rootstocks a compact and durable turf of fine turf. It thrives on the poorest and driest land, and is also used for hay. Its growth is good in all kinds of soil, and it is especially valuable for use in poor soils or on land that is likely to be subject to drought. It is a valuable forage crop and is also used for hay.

Alfalfa. Clay. Each, pkg. 15c., bush. 3.00.

This grass is especially valuable for use in poor soils or on land that is likely to be subject to drought. It is a valuable forage crop and is also used for hay.

Recommended Grasses.

Many of the grasses in the following list have been compiled from various writers interested in the subject, and are not only given to the reader the information they contain regarding the grasses, but are also an excellent reference for the selection of the varieties for the different soils, conditions, purposes, etc., of the grasses which we offer, since their prices, together with their qualities, are also given.

As the market price of the leading varieties of grass seeds is very variable, it is advisable to consult the list of quoted prices throughout the season, although endeavoring to do so.

MILLETS.

Hungarian Grass. (Panicum Germanicum.) Used extensively in New England for forage and to some extent for hay. It withstands drought well, succeeds on any ordinary soil, and on rich land two crops may be grown in the same season. 45 lbs. to the bushel. One bushel per acre. Bush. $1.40.

Common Millet. (Panicum Miliaceum.) Of somewhat ranker growth than Hungarian and with a more green or greenish head. Seed resembles that of Common Millet. 50 lbs. per bushel, 1 bushel per acre. Bush. $1.25.

German or Golden Millet. (Setaria Italic.) Of stronger, ranker growth than either Common or Hungarian Millet. It has been grown several years past in this country and has largely taken the place of German and Common Millet, as well as Hungarian. We have made extensive inquiries and the general report is that the plant has a tendency to make a larger and chaffier growth. It is not quite so tender as Hungarian; the plant making a ranker growth, produces more leaves than either Common Millet, German Millet or Hungarian. It is not a good forage plant, as it has a rather coarse texture; stems wide and tender, making it preferable for other Millets for hay. Yields a hay reported 4½ to 5½ more per acre, besides hay fodder when cured, greener in color and preferred by stock to other hay or millets. It matures about the same time as Common Millet and Hungarians and earlier than German Millet, and will claim a place in the warmer and more droughted parts than any other variety of Millet. It has been a success in sections where no other variety of grass can make a corn crop. ½ bushel per acre. 50 lbs. to the bushel. Bush. $1.25.

Japanese Millet. (Panicum Crum Galli.) This comparatively new yet popular forage plant is of very rank growth, from six to seven feet high, with much larger leaves than any of the preceding. Like all coarse growing plants it needs abundant plant food, and when given this it yields immensely. When its use is confined to sowing purposes, it may be used for ensilage, and is, when cut at the proper stage and made into hay, readily eaten by stock and horses. Probably no other forage plant ever sprang so quickly into popular favor, and that it will continue to occupy a prominent place among our forage plants is without doubt. It may be sown from May 10th to July 15th lbs. per acre. Lb. 10c., 10 lbs. 90c. 25 lbs. $2.00, 100 lbs. $5.50.

Pearl or Egyptian Millet. (Pennisetum Scirpet.) A very rank-growing grass, attaining a height of six or more feet. Popular in the South as a fodder plant, but as yet little used in the North, although it has for many years been offered under various names. Whether it would be of value for ensilage we are not aware. Lb. 12c., 10 lbs. $1.00.

CLOVERS.

Medium Red. (Trifolium Pratense.) This well-known plant, one of the most valuable, especially in the warm states, need no description. It is suitable to say that its great value either for sowing, hay pasture or for turning under for green manure and the improved condition of the land on which it has been grown, gives it its deserved popularity. Lb. 10c., 100 lbs. $15.00.

Hammock or Pea Vine. (Trifolium Pratense var.) A variety of the preceding growing taller and lasting longer. Very valuable for plowing in. Lb. 12c., 100 lbs. $16.00.

Alfak or Swedish. (Trifolium Hybridum.) A very hardy variety, succeeding best in stiff, cold soils, and in those too wet for the other species, and is equally productive in popularity and should enter into all pasture mixtures for moist or wet lands. Lb. 10c., 100 lbs. $15.00.

White Clover. (Trifolium Repens.) This thrives in nearly all soils and situations, withstanding extremes of heat and cold, dryness and humidity. It is of low growth and spreads rapidly, the stems creeping and rooting at the joints. It will bear hard grazing and is valuable for both pasture and lawn mixtures. Lb. 5c.

Crimson Clover. (Trifolium Incarnatum.) An annual which has been largely grown in the South for plowing under, and to some extent in the North for the same purpose. In the North, treated as an annual for sowing and perhaps for hay, sown in the spring either alone or with Italian Kye Grass it is said to be of great value, but in this section and as far as we can learn all attempts to winter it North of New Jersey have largely resulted in failure. 20 lbs. per acre. Lb. 8c., 100 lbs. 75c.

Alfaka or Lucerna. (Medicago Sativa.) There have been more or less contention among those seemingly fitted to be authorities on the subject as to whether Alfaka is better suited for high northern and eastern states, we are somewhat in doubt as to the advisability of recommending it for this section. We, however, quote from a Farmers' Bulletin (No. 31. Alfaka or Lucerna) issued by the Department of Agriculture at Washington, D. C., whose opportunity for general observation certainly is not exceeded by any other authority. Alfaka has been grown with more or less success in every State and Territory in the Union, from Maine to Washington and from California to Florida. There is not a State from which the report has not gone out that Alfaka will, when properly treated, become one of the best fodder plants. It is the best hay and sowing crop in the West. In the South it has been widely recommended as a very valuable addition to the list of forage grasses and clovers. In the Middle and Eastern States it promises to become a rival of the better known and more widely grown Red Clover. Its roots often reach the depth of 10 to 15 feet. It, therefore, requires a deep, rich, well-drained soil, and on such is capable of resisting long droughts. It should be sown at the rate of 25 lbs. per acre, cut as it begins to bloom. Height, 1 to 3 feet. Lb. 15c., 100 lbs. $7.50.

CATALOGUE BROS.

Wool Meadow Grass. (Poa Nemoralis.) A very early and permanent grass, especially valuable for shaded lawns and parks' very hardy, withstands all weather; roots creeping forming a close turf. Desirable for permanent pastures and in good soil for hay. 15 lbs. per acre, including 3 lbs. of Mixed Clovers. Lb. 14c., 100 lbs. $15.50.

MIXTURES OF GRASS SEEDS.

Our Regular Mixture for Permanent Mowing for Average Soil.

In view of what we have previously said concerning a combination of several grasses we would say further that it seems fair to be beyond dispute that a thicker growth, therefore larger yield, may be obtained by sowing a mixture of many varieties than by the use of one or a few. Many of the grasses of fine growth are rich in nutritive quality and of heavy bottom growth, but their scanty top growth makes them unsuitable for sowing alone. Combined, however, with grasses of thick growth, they fill the interstices, restraining the rank growth of the latter, making them thereby more tender and greatly increase the total yield, the whole producing not only a larger yield and much heavier aftermath at once, but if properly combined for many years. This mixture was devised after careful study of the various authorities, assisted by the experience of those engaged in farming. It is especially designed for the average soil (neither unusually wet nor dry). We advise a minimum sowing (which may sometimes be profitably increased) of 40 pounds per acre. This includes 6 to 8 of Mixed Clovers which, after the first cut, weight, should be sown separately, and in this latitude in the spring or not later than August. As these are always included (but in separate package) no reference need be made to them unless it be in the fall, when, if not desired, it should be so stated, otherwise they will then as usual be sent. Lb. 14c., 100 lbs. $15.00.

Our Special Mixture for Permanent Mowing for Dry Soils.

This is prepared from varieties which are especially adapted to high and dry soils and, while probably it will not prove as productive as the previous mixture if sown on dry soils, it will feel sure, prove greatly superior in results to those obtained from the use of the few generally sown, which are not only inadequate but also unsuited to the purpose. 40 pounds per acre, including 4 pounds of Mixed Clovers. Lb. 14c., 100 lbs. $15.50.

Our Special Mixture for Permanent Mowing for Wet Soils.

This, like the preceding, is a special mixture, but designed for soils of an opposite nature. If sown on land not too wet, that is not swampy (is of course understood there is a limit both as to wetness and dryness as to where grasses will thrive), this will produce large crops of excellent hay for many years. 40 lbs. per acre, including 3 lbs. of Mixed Clovers. Lb. 14c., 100 lbs. $15.50.
Our Regular Mixture for Permanent Pastures.

As fully important is, and perhaps more, when laying down a pasture, that it \textit{be} properly seeded, as the sow, and much more important to \textit{have} it properly managed. Full attention has been given to the different characteristics of the various grasses, which are shown in the descriptions. We again call attention to the fact that the grasses in this mixture start early in the spring. Some of them, at the same age, before the others, others at the end of the season. The resulting growth will be continuous, and will not be injured by the slightest trampling. This mixture is designed for the average soil. We advise a minimum rate of one pound per acre, which is the weight of the best and most improved Mixed Grass, and for which reasons previously stated (see Regular Mixture for Mowing) are put up in separate packages. 1 lb. 14 c., 100 lbs. $3.00.

THE WORCESTER LAWN GRASS

THE BEST.

Probably above all Mixtures of grass seeds that we the lawn is one that is desired to be permanent in its results. Other considerations are, that not only shall the effect be permanent but it is also desirable that it shall be seen as soon as possible. Therefore the mixture should contain some varieties which are of early and rapid growth. It is obvious that all the grasses should be of fine, soft growth, and also that they must be capable of bearing constant trampling and frequent cutting. Simply stated, the WORCESTER LAWN GRASS MIXTURE is a combination of such varieties as years of experiment and observation have shown us are those best suited to the requirements. In this selection of varieties we have those that grow and thrive at different times of the year—insuring early and constant re-culture through the season, those that are remarkable for their enduring and tenacious qualities—insuring a degree of wear at which a mixture, not only bear constant trampling and frequent cutting but which actually improves by it, and those which are long-lived or perennial—insuring permanency. This mixture is designed for the average soil and on such soil, properly prepared and enriched, will produce a fine, velvety growth the first season, and for years if properly treated. It contains nothing but extra clean or reclaimed seeds, as free from weed seeds as it is possible to make it with improved machinery, and is exactly what we claim—\textit{the BEST} that can be made. We offer this mixture not only by weight, and at the price per pound, it is actually much cheaper than that offered by many dealers at the same price per quart. The should be sown at the rate of 75 to 85 lbs. per acre. A 1 lb. pkg. will therefore be required for about 300 square feet. 1 lb. pkg. 22c.; 4 lb. pkg. $1.00; 10 lbs. or over in bulk, 20c. per lb.

THE PARK LAWN GRASS.

GOOD. There being some demand for a cheaper mixture than the preceding suitable for large areas, parks, etc., as well as for smaller plots like the back yard, we offer this mixture. We claim for this an equality with much that is sold and generally at much higher prices than our price for this. While of course not equal to the preceding it is by no means a poor or inferior mixture. Simply stated, this is \textit{good}; the Worcester \textit{BEST}. In making this mixture we have had it as far as possible, that is considering the price, conformed to the ideas previously expressed as to what grasses should enter into a mixture for the lawn. Although opposed to the term quart and bushel because there are no intermediate when applied to these terms, the fact that all dealers have to determine the bushel by weight, we feel, however, to conform to this custom, for the evidence in their favor, to some extent, and so offer this mixture by the quart, etc. Sow from 3 to 4 bushels per acre. A quart package is sufficient for about 300 square feet. 1 qt. pkg. 13c.; 4 qt. pkg. 50c.; bushel, 20 lbs. $2.50.

Our Special Mixture for Permanent Pastures for Wet Soils.

This, like our Special Mowing Mixture for Dry Soils, is composed of varieties especially adapted to such soils, and with this as with all others our object has been to make a mixture not only continuously productive for the season but for as many years as possible. 40 pounds per acre, including 4 pounds of Mixed Clovers. 1 lb. 14c., 100 lbs. $3.50.

Our Special Mixture for Permanent Pastures for Dry Soils.

This, while containing some of the grasses which are in our Regular Mixture (in different proportions, however), also contains others which thrive on dry or very moist land. For this we claim the same probably superior results to those obtained by the present custom of using but two or three varieties. 40 pounds per acre, including 3 pounds of Mixed Clovers. 1 lb. 14c., 100 lbs. $3.50.

Special Lawn Mixture for Shady Places.

It certainly is displeasing to say the least, when the larger part of the lawn presents an attractive appearance that its effect should be marred by bare, unsightly spots under the trees. This may, however, to an extent be obliterated by sowing grasses which thrive in the shade. This mixture is composed of such varieties and which do not to any extent enter into the ordinary or regular mixtures. We would mention that where the shade is very dense it often happens that the soil is poor, and if moss has covered the ground it is a sure indication that this is the case. If so, the moss should be removed, the soil thoroughly worked over and enriched, and an application of slaked lime made at the rate of one bushel to the thousand feet. Per lb. 32c.; 4 lbs. $1.25; 10 lbs. or over, 30c. per lb.
ABRONIA.
1—Umbellata. A beautiful little trailer suitable for vases, rock-work, etc. Flowers fragrant, rosy pink, borne in large trusses. Half hardy annual; ½ ft. 5c.

ACROCLINUM & Everlasting Flower.
A free-flowering plant, suitable for garden culture. Flowers when d. y. are largely used for winter bouquets. Half hardy annual; 1 ft.
2—Double, mixed colors 5c.

ADLUMIA & Mountain Fringe—Allegheny Vine.
3—Cirrhosa. A beautiful climber with graceful, feathery foliage, bearing freely all summer small rose colored flowers. Hardy biennial; 15 ft. 5c.

ADONIS & Pheasant's Eye—Flos Adonis.
4—Autumnalis. A free-flowering, garden plant with finely cut dark green foliage, bearing blood-red flowers. A popular and desirable plant, remaining in bloom for a long time; of easy culture. Hardy annual; 1 ft. 5c.

AGERATUM
Favorite annual plants, profuse and continual bloomers, growing from six inches to two feet in height. The tall varieties are very suitable for planting in clumps or masses, producing a striking effect and furnishing an abundance of cut flowers. The dwarf varieties are very desirable for edgings, and both make excellent pot plants.
5—Mexicanum. Lavender blue; 2 ft. 5c.
6—Album. White; 2 ft. 5c.
7—Little Dorrit. Azure blue, very compact; ½ ft. 5c.
8—Imperial Dwarf. White; ½ ft. 5c.
9—Mixed Colors 5c.

AGROSTEMA
Pretty, free-blooming plant, useful both for cutting and bedding.
10—Celi-rosa (Rose of Heaven) rose, white center. Hardy annual; 1 ft. 5c.

AQUILEGIA & (Columbine).
Hardy herbaceous perennials, deserving a place in every collection of perennials. Flowers curiously and gracefully formed and beautifully colored; of easy culture; 1½ to 3 ft.
11—Mixed Colors 5c.

ASPERULA & Swce Woodruff.
12—Odorata. A free-blooming plant, bearing fragrant blue flowers which remain a long time in bloom. Hardy annual; 1 ft. 5c.

SWEET ALYSSUM.
13—Sweet Alyssum. Fragrant white; 1 ft. Oz. 25c., ½ oz. 5c., 5c.
14—Little Gem. Dwarf, growing but a few inches high, of spreading or trailing habit, forming compact masses of bloom often a foot or more in diameter; very useful for edgings. Oz. 40c., ½ oz. 25c. 5c.

AMARANTHUS
Ornamental foliage and flowering plants, very showy and interesting, of rapid growth and easy culture; color of foliage will be better if planted on rather poor soil; half hardy annuals.
15—Caudatus, (Love-lies-bleeding.) Long, drooping flower, spikes dark red. 5c.
16—Tricolor. (Joseph's Coat. Red, yellow and green foliage, 3 ft. 5c.
17—Salicifolius. (Fountain Plant.) Graceful, drooping leaves, varying from green to bronze, banded and tipped with carmine. 5c.
18—Mixed Varieties, including above and others 5c.

ANTIRRHNIM & Snap Dragon.
Well known favorite border plants, half hardy perennials, flowering first year from seed sown in spring.
19—Tall Varieties. Mixed Colors; 2 ft. 5c.
20—Dwarf or Tom Thumb Varieties. Mixed Colors 5c.
21—**Queen of the Market.** A very early and profuse bloomer, of branching habit. 1 ft. Mixed Colors..............10c.

22—**Queen of the Earliest.** Resembles the preceding but is considerably earlier. Flowers white only, borne in profusion on long stems. 14 inches..................10c.

23—**Truffauts Peony Flowered Perfection.** An old, but still popular variety. Plant large but of compact form. Flowers large with incurved petals; very double and of beautiful form. An abundant bloomer. 1½ ft. Mixed Colors...........10c.

24—**Lady in White.** A variety especially desirable for its freedom of blooming and distinct in its foliage. Plant of branching habit, bearing on slender stems semi-globular pure white flowers. From forty to sixty buds are borne on each plant which, developing gradually, prolong the season of bloom................10c.

25—**Jewel or Ball.** A fine new type. Plant, dwarf, but bears freely, on long stems, flowers which are of good size and perfectly round. Mixed Colors......................10c.

26—**Daybreak.** A beautiful Aster. Plant of bushy, branching habit, bearing on long, stiff, upright stems, large double flowers with incurved petals, very regularly placed. Color, a lovely shell-pink; as a cut-flower, not excelled by any other variety.....................10c.

**Giant Branching Comet.** A distinct and very valuable class. Flowers resemble the Japanese Chrysanthemum, and differ from those of the older Comet class in that they are not only larger but petals are broader and longer, flower-stems long. Plant of vigorous, luxuriant growth, 1½ ft.  
27—**Giant White.** ........................................10c.  
28—**Giant Rose.** .........................................10c.  
29—**Mixed Colors.** .......................................10c.

30—**New Japanese.** A very distinct and desirable class. Flowers very large and peculiarly beautiful, with long tubular and twisted petals. Plant vigorous and productive. Mixed Colors..........................10c.

**Semple's Branching.** Of very branching habit and a strong grower; flowers large, often four inches in diameter. Valuable for cutting on account of their long stems; very double, beautiful colors. One of the best late flowering varieties, 14 to 2 ft.  
31—**Rose.** ..................................................10c.  
32—**White.** ................................................10c.  
33—**Mixed Colors.** .......................................10c.

**Victoria.** One of the most popular varieties. Flowers large, full and double with reflexed petals. Plant large and vigorous and a free bloomer; colors varied and beautiful.  
34—**White.** ................................................10c.  
35—**Scarlet.** ...............................................10c.  
36—**Blue.** ................................................10c.  
37—**Mixed Colors.** .......................................10c.

38—**Betteridge's Quilled.** Flowers composed of tube or quill-shaped petals. This is an improved strain, with large, double flowers, and of beautiful colors, 2 ft.  
Mixed Colors..............................................5c.

39—**Prince of Wales.** Plant of free branching habit, bearing on long stems large flowers of a deep crimson red. It is a very early bloomer, a fitting companion to the *Queen of the Earliest,* the color of its flowers making a pleasing contrast to the pure white of that variety..........................10c.

40—**Our Worcester Mixture.** Our own mixture of above varieties, carefully mixed, enabling any to secure a choice collection at slight outlay..........................10c.

**Good Mixed.** Many varieties........................................5c.
BALSAM

An old favorite garden flower which has been greatly improved in recent years. With favorable conditions and proper treatment but few single flowers are produced. The Camellia flowered varieties are especially fine, and if planted on rich soil and given sufficient room (about two feet apart each way) will produce a great profusion of flowers, nearly all of which will be as double as their name implies. The rose-flowered, also, are strikingly beautiful with their large, perfectly double, rose-like blossoms and great variety of shades and colors. Hardy annual; 1½ to 2 ft.

41—Double Camellia Flowered. Mixed colors..................10c.
42—Double Rose Flowered. Mixed colors..................10c.
43—Double Pure White. ......................................10c.
44—Double Dark Red. ..........................................10c.
45—Good Mixed. .............................................. 5c.

BACHELOR'S BUTTON

A well known and very popular plant, blooming early and continuously until autumn if flowers are not allowed to go to seed. White, blue and pink. Hardy annual; 2 to 3 ft.

46—Single and Double Mixed, Mixed Colors..................5c.

BRACHYCOME

A free flowering plant of dwarf compact growth, bearing in great profusion beautiful single blue or white flowers. Effective as edgings or in beds, and suitable for rustic baskets or pot culture. Half hardy annual.

48—Mixed Colors ................................................. 5c.

BROWALLIA

Strikingly beautiful plants and profuse bloomers, succeeding best when started in the house or hot-bed, but can be sown in the open ground. When successfully grown the plants are completely studded with the rich, beautiful blue and white flowers. Half hardy annual.

49—Rosehill. Blue and white mixed..........................10c.
50—Elata. Mixed ............................................... 15c.

CALLIOPSIS

One of the most graceful and satisfactory hardy annuals, profuse and continuous bloomer, sometimes called "Bright Eyes." Flowers brilliant yellow, orange, crimson, red and brown, spotted or margined with different shades, and having long stems are excellent for cutting.

51—Choice Varieties Mixed, 2 ft. .............................. 5c.
52—Golden Wave. (Drummondii.) Plant distinct from above sorts, of bushy, compact and dwarf habit. Flowers large, often 2 inches across; beautiful golden yellow with small dark center. ................................... 5c.

CALENDULA

A free and continuous flowering plant of dwarf, bushy habit; of the easiest culture, growing freely in nearly all soils. Desirable both for garden decoration and pot culture. Hardy annual; 1 ft. .......................... 5c.

53—Meteor. Light yellow, striped with deep orange; very popular. ................... 5c.
54—Prince of Orange. Bright orange, striped with light yellow. ................... 5c.
55—Trianon, the Royal Marigold. Very large, sulphur-yellow, striped with deep, rich brown. ................................ 5c.
56—Pongei. White Marigold. ........................................ 5c.

CANDYTUFT

Well known, popular hardy annual, of easiest culture; useful for bedding, edgings or for cutting.

57—White Rocket. (Empress.) Large trusses, 1 ft. ½ oz. 15c., oz. 25c. .................. 5c.
58—White Fragrant. 1 ft. ½ oz. 15c., oz. 25c. .................. 5c.
59—Tom Thumb. Very dwarf, mixed colors .................. 5c.
60—New Carmine. A distinct shade .............................. 5c.

LADY SLIPPER

TOUCH-ME-NOT

CANDYTUFT—White Fragrant.
CARNATION

A beautiful, well-known and extremely popular flower; half hardy perennial; the Marguerite class, however, flowering the first year from seed and in a comparatively short time.

63—Choice Double Mixed.................................................................10c.

Marguerite. One of the greatest acquisitions to the flowers which the amateur can conveniently grow, enabling all lovers of this beautiful flower to secure very satisfactory and immediate results without the usual care and time necessary to succeed with the Carnation of the older types. Flowers may be had from August until severe frost comes from seed sown in the spring, which have the characteristic form and fragrance of the Carnation proper, borne in greater profusion and on plants of more bushy and vigorous growth. Too much could not be said in praise of this, nor could it be too highly commended for the amateur’s use.

64—Choicest Mixed. Complete assortment of colors..........................10c.

MARGUERITE CARNATIONS & Giants of California.

An improved, extra large flowered strain from California, of vigorous, robust habit but having the same dwarf compact form of above, blooming also as early and producing larger flowers, many of which are as fine and more freely produced than those grown by florists in the greenhouse. A very shy seeder.

65—Mixed Colors. Small pkt.........................................................15c.

HARDY GARDEN CARNATIONS & For Open Ground.

Plants of low, bushy, tufted form, producing on long stems the beautiful fringed flowers with their delightful clove fragrance, known as "Clove Pinks," so highly valued in the "old fashioned garden" and which merit a place in the perennial bed and border of today.

66—Plumarius Double Mixed. Double fringed, fragrant flower, white, crimson or purple shades, beautifully shaded and spotted..........................10c.

67—Plumarius Single Mixed............................................................5c.

CASTOR BEAN (Ricinus)

Well known tender annuals; tall, stately, majestic plants of very rapid growth. with palm-like leaves of glossy green, brown or bronze hue; very effective for lawns, planted singly or in groups; 8 to 12 ft.;

70—Sanguineus. (Tricolor.) Stalks blood-red, foliage reddish bronze with scarlet seed pods; 6 ft. 1 oz. 12c., oz. 20c. 5c.

71—Zanizibarensis. A comparatively new class, with gigantic leaves ranging in color from light green to bronzy maroon; 10 to 15 ft. Mixed varieties. 1 oz. 12c., oz. 20c. 5c.

72—All Varieties Mixed. 1 oz. 10c., oz. 15c. 5c.

ANNUAL CHRYSANTHEMUMS

Free-flowering plants of branching habit, with rich, finely cut and very ornamental dark green foliage, bearing on long stems daisy-like flowers of bright and varied colorings. These colorings on the single varieties are usually in distinct rings and look on the flat petals as though they were painted on. The double varieties withstand the heat of summer, blooming more freely than the single, the latter requiring cooler weather to bloom freely but are much more beautiful than the double. Both grow freely from seed, are of easy culture, very desirable for cutting, and are effective bedding plants.

73—The Sultan. (Atro-Coccineum.) Large velvety single flowers, crimson maroon with golden ring...........................................5c.

74—Eclipse. Large single flowers, golden yellow with scarlet ring and brown disc.................................................................5c.

75—Single Mixed. All colors.........................................................5c.

76—Corinarium Double Mixed.......................................................5c.
CANTERBURY BELL
(CAMPANULA MEDIA.)

Beautiful hardy biennial plant, of easy culture, a profuse bloomer, succeeding best in a light, rich soil; bearing flowers of rich and exquisite colorings. Like most biennials, it can be sown after mid-summer where it is to remain, or in the spring for transplanting. Plants should stand about two feet apart. 24 ft.
77—Double. Mixed colors..............................5c.
78—Single. Mixed colors...............................5c.

CUP AND SAUCER CANTERBURY BELL.
(Companula Calycanthema.)

Flowers of this class are of peculiar form and strikingly beautiful, that part resembling a cup is about three inches in length or depth and the saucer from three to four inches in diameter. This plant is a very free bloomer, often bearing during its season of several weeks in early summer a hundred or more of its exquisite blossoms, and is, when in full bloom, a pyramid of beauty.
79—Mixed Colors.................................5c.

CANARY BIRD FLOWER & Tropaeolum Peregrinum.

80—A favorite half hardy annual climber of rapid growth, bearing curiously formed yellow flowers having a fancied resemblance to a canary bird; blooms from July until frost; 10 to 15 ft..........................5c.

CLARKIA.
Favorite hardy annuals, bearing beautiful, delicate, rose-colored, purple and white flowers; profuse bloomers; of easiest culture; 1 ft.
81—Mixed Colors.................................5c.

COBEB.

82—Scandens. A rapid growing perennial climber, flowering the first year from seed, bearing flowers which are at first green, changing soon to deep violet or purple. It should not be sown in open ground until soil has become quite warm, and will germinate most readily if seed is pushed into soil edgewise and barely covered; 20 to 30 ft..................10c.

COCKSCOMB & Celosia Cristata.

Popular annuals, producing flowers which somewhat resemble a cock's comb; of various colors, rose or crimson the most striking; of easy culture.
83—Glasgow Prize. Immense crimson combs; 1 ft........5c.
84—Mixed Colors.....................................5c.

COCKSCOMB FEATHERED & Celosia Plumosa.

Of branching habit, producing large, graceful, plume-like flowers; beautiful and effective; 2 to 3 ft.
85—Ostrich Plume. Crimson..........................5c.
86—Ostrich Plume. Golden...........................5c.
87—Mixed Colors. Crimson, orange, yellow, rose, etc.......5c.
Columbine. (See Aquilegia.)
Convolvulus. (See Morning Glory.)

COREOPSIS & For Annual Varieties See Calliopsis.

88—Lanceolata. A hardy hardy perennial, flowering the first year from seed sown early; forming large clumps, growing from two to three feet high, bearing long stems large rich, yellow flowers in great profusion; very desirable for cutting; of the easiest culture, growing anywhere, and should be in every flower garden..........................5c.

COSMOS

A rapid growing, graceful plant, with beautiful feathery foliage, bearing flowers which resemble the Single Dahlia; a very hardy annual of strong, vigorous habit, growing about five feet high in ordinary soil, and often eight feet in very rich. It is seldom given room enough; plants should stand not closer than two and one-half feet apart, and in rich soil a greater distance. The Cosmos makes a most desirable background for many other plants, its beautiful, finely cut foliage alone making it well worth the growing for this purpose; its value, however, is greatly increased by its lovely flowers, white, pink, crimson or rosy purple, borne in great profusion on long stems, rising above the foliage in an especially graceful manner, equally graceful in appearance when arranged in a vase with sufficient foliage; for this purpose but few other flowers are as desirable and none can be had so late in the season, as, owing to the great hardiness of the plant, it bears fine flowers even after the first light frosts have come.
89—Mammoth Perfection. Flowers of mammoth size, rather late in flowering and, as the plant is quite hardy, seed should be planted as early as possible and will then, in most seasons, produce a profusion of flowers before frost.....................5c.
90—New Early Flowering. This, while flowers are not as large as those of the Mammoth, is growing in favor because of its earliness. If seed is sown in open ground in early spring, plants will begin to bloom the last of July and continue until November, making it, therefore, especially desirable in northern latitudes..........................5c.
CYPRUS VINE  Ipomea Quamoclit.
A very popular climber, with delicate, feathery foliage, bearing small, star-shaped rose, scarlet and white flowers, presenting a very pleasing contrast with the beautiful dark-green foliage. Tender annual; 12 to 15 ft.
92—Mixed Colors ............................................. 5c.

DAISY  Bellis Perennis.
A hardy perennial plant, of dwarf, compact growth, blooming freely during the cool months of spring and fall; flowers very double, about one inch in diameter, borne singly on a stem about five inches high. A beautiful little plant well adapted for edgings, and should be more generally cultivated. It bears transplanting well, even when in flower, and thrives best on richly manured soil and in a cool, partially shaded location.
93—Mixed Colors ............................................. 5c.

DIANTHUS  (See Pink.)
94—Mixed Colors ............................................. 5c.

Digitalis  (See Foxglove.)
D A TURA.
95—Strong, vigorous plants, of branching habit, bearing large trumpet-shaped flowers six to eight inches long and very fragrant. Tender annual; 3 ft. Finest Mixed.................. 5c.

DUTCHMAN'S PIPE  Aristolochia Sipho.
96—A beautiful, rapid growing climber, bearing curiously formed, purplish brown flowers, thought to resemble in shape a pipe. Hardy perennial; 15 to 30 ft. .......... 15c.

ESCHSCHOLTZIA  California Poppy.
Very showy hardy annual, with beautiful, delicately cut foliage, bearing bright yellow and scarlet flowers; one of our most attractive annual plants, blooming early and continuously. Succeeds best in light, rich soil, and should be sown where designed to grow, as it does not bear transplanting; 1 ft.
97—Mixed Colors ............................................. 5c.

EUPHORBIA VARIEGATA  Snow-on-the-Mountain.
Very showy hardy annual plant, grown for its striking foliage. Leaves, dark green, veined and margined with white. Very effective in the garden or on the lawn......... 5c.

EUPHORBIA HETEROPHYLLA  Mexican Fire Plant, or Annual Poinsetta.
99—This is somewhat similar to the brilliant Poinsetta, grown in pots in the greenhouse during winter and which is a very popular decorative plant. This, however, can be easily grown from seed in the open ground, which should be sown when trees are starting into leaf. It produces large bracts of fiery scarlet which, in contrast with the dark green foliage, make a striking and effective appearance..
100—Alpestris  Marvel of Peru. (Mirabilis.)
101—Alpestris Alba  Similar in habit of growth, but the florets are pure white....... 5c.

FOUR O'CLOCK  Marvel of Peru. (Mirabilis.)
A well-known and favorite plant, bearing freely funnel-shaped white, red and striped flowers, which open about four o'clock in the afternoon and perish before noon the next day; of easy culture, will grow anywhere, but should be given plenty of room—at least three feet each way.
102—Mixed Colors ............................................. 5c.

FOXGLOVE  Digitalis.
Favorite perennial plants, of easy culture. Flowers borne on long spikes; 3 to 5 ft.
103—Mixed Colors ............................................. 5c.

GALLIARDIA  Blanket Flower.
A very free-flowering class of plants, entirely hardy, blooming the entire summer, of easiest culture and succeeding well in the poorest soils. Flowers brilliant and beautiful, 2 to 3 inches in diameter, borne singly on long stems; exceptionally fine for cutting.
104—Choice Mixed  Comprising a wide range of colors in both single and double varieties; hardy annuals, some of which become perennial by protection of the roots in winter. 1 to 2 ft. ............................................. 5c.
105—Picta Lorenziana  (Double.) Large, round heads composed of many individual florets, richly colored in shades of bronze, brown, maroon, etc., brightly tipped with shades of yellow and creamy white; hardy annual. Mixed colors........ 5c.

GODETTA.
Attractive hardy annuals of compact growth, bearing profusely large flowers beautifully colored; fine bedding plants of easy culture; 1 to 1½ ft.
106—Mixed Colors ............................................. 5c.

GOUDRUST.
Ornamental, tender annual climbers, bearing curiously formed and colored fruit. Of very rapid growth; useful for covering fences, stumps, etc.; 10 to 20 ft. 107—All Varieties Mixed ................. 5c.

FORGET-ME-NOT  Myosotis.
An old, well-known and favorite garden plant; hardy perennial, flowering the first year from seed sown early in the spring, succeeding best in cool, moist soil and thriving well in partial shade.
108—Alpestris  Plant dwarf and compact, about six inches in height; flowers star-shaped, blue....... 5c.
109—Alpestris Alba  Similar in habit of growth, but the florets are pure white....... 5c.

A plant of such tender culture, that it is impossible to transplant it more than once.
HELIOTROPE.

A favorite perennial plant, highly prized for its delicious fragrance. We think it is not generally known that it can be had in bloom the first season from seed: but fine flowering plants can be easily grown from seed sown in the house in March. Soil should be light and rich, and young plants kept in a warm, sunny location. Sow seed in shallow boxes and transplant before plants become crowded into small pots. If desired for bedding, wait until nights are warm. Make the soil rich and give it an abundance of water.

112—Mixed Colors ........................................... 5c.

HELCYCHYSUM & Or Everlasting Flower.

Free-blooming, hardy annual plant, of easy culture. The flowers are large, full and double, of various colors, white, scarlet, yellow, etc., and are often used when dry for winter bouquets.

112—Mixed Colors ........................................... 5c.

HOLLYHOCK & "Queen Hollyhock, with Butterflies for Crowns."

This well-known plant has always been a great favorite, and is perhaps today more popular than ever. Stately and majestic in its growth, it is especially suited for a background to the perennial border. Although a biennial it becomes perennial by proper treatment, continuing to grow and bloom for several years if the flower spike is cut off as soon as through blooming. Seed may be sown at any time from spring until midsummer and will produce plants which will bloom the following season. The soil should be light, and rich, and well drained.

113—Chater's Choicest Double Mixed. This well-known, superb strain will produce a large percentage of double flowers in a wide range of colors, and has, as yet, not been surpassed. .................. 10c.

114—Allegheny. (New.) The flowers are not as double as those of the older form, but are distinctly beautiful. They differ both in form and in the manner in which they are disposed on the stem; every bud to the top of the plant develops, making the blooming season a long one. They are enormous in size, often six inches in diameter, of silky texture and beautifully fringed and colored. .......................... 10c.

HYACINTH BEAN & Dolichos Lablab.

115—Mixed. A tender annual climbing plant, with purple or white flowers, which are followed by very ornamental seed pods. 10 to 15 ft. .......................... 5c.

ICE PLANT. & (Mesembryanthemum.)

116—A trailing plant, with succulent stems and leaves, which have the appearance of being covered with ice crystals; excellent for hanging baskets and rock work. Tender annual. 6 ft. .................................. 5c.

IPOMEA.

Rapid growing, annual climbing vines, with very luxuriant foliage, producing an abundance of showy flowers, white, pink, blue and purple. While both the flowers and foliage closely resemble that of the Morning Glory, many varieties, both are larger, although the flower of one of the following (Coccinea) is smaller and of different form, more nearly resembling that of the Cypress Vine. All should be more generally cultivated. 10 to 20 ft.

117—Bona Nox. (Evening Glory.) Beautiful, large, violet-blue flowers, which open in the evening .......................... 5c.

118—Coccinea. (Star Ipomea.) Plant similar to the Morning Glory; flowers small, star-shaped, in great profusion. .......................... 5c.

119—Grandiflora, Striped-Leaved. The leaves of these are dark green, mottled with white; the flowers intense ultra-marine blue, edged with sky-blue and shaded with carmine pink in the throat. .......................... 5c.

120—Setosa. A beautiful variety, of very luxuriant growth. The leaves are from eight to twelve inches across, the underside being thickly set with small, reddish hairs, as is also the vine. The flowers are about three inches in diameter, produced in clusters produced in twos, in each cluster opening at once; of a lovely satiny pink. .......................... 5c.

121—Choice Mixed. Above and other varieties .......................... 5c.

LANVANA.

Favorite, rapid growing plants, forming small shrubs; profuse and constant bloomers, well adapted for pot culture, and are very effective planted singly in the garden. Tender perennials, flowering first year from seed if sown early; 1 to 3 ft.

122—Mixed Colors ........................................... 5c.
Popular annual, biennial and perennial plants, with finely cut leaves and beautiful flowers, which are either white, scarlet, pink, blue or purple, but never yellow; of easy culture, succeeding best in a location open to the sun.

123—**Double Dwarf Rocket.** Hardy annual; 1 ft.; mixed colors..........................5c.

124—**Double Tall Rocket.** Hardy annual; 2½ ft.; mixed colors..5c.

125—**Elatum.** (See Larkspur.) Hardy perennial; flowers have curiously folded, hairy petals

---

**LOBELIA.**

Pretty, graceful, little plants; those of trailing habit being used for hanging pots and rockeries, and those of dwarf, compact habit for edgings and bedding.

129—**Gracilis.** Light blue, slender trailer, half hardy annual; ½ ft........................................5c.

130—**Crystal Palace, Compacta.** Of dwarf, compact growth, excellent for edgings; blue. Half hardy annual; ½ ft . . . . 5c.

131—**White Gem.** Plant of similar habit to the preceding variety; flowers pure white..............................5c.

132—**Cardinals.** (Cardinal Flower.) This is a native species, of greatly different habit from the others, growing about two feet high. Though usually found when growing wild in moist places, it succeeds well in the most perennials for the shady side of the house. Its spikes of intensely brilliant, cardinal red flowers make it one of the most effective plants, growing in masses to 2½ to 3½ feet high.

---

**LOVE-IN-A-MIST & Nigella Damascena.**

A favorite annual, bearing blue and white flowers half hidden by the fine, feathery foliage. Known also as Lady-in-the-Green and Devil-in-the-Bush; 1 ft.

133—**Mixed**........................................5c.

---

**LUPIN.**

Very showy plant, bearing spikes of pea-shaped blossoms of rich and varied colors; a free bloomer and easily grown. Hardy annual; 1½ to 3 ft.

134—**Mixed Colors**........................................5c.

---

**LYCHNIS & London Pride—Burning Star.**

Hardy perennials, some of which will flower the first year from seed, and but few plants produce more brilliant blossoms. The plant blooms freely and continuously, bearing its clusters of scarlet flowers through the entire summer.

135—**Chalcedonica.** (London Pride.) Bright scarlet; 2 ft . . . . 5c.

136—**Haageana.** Bright scarlet flowers, larger than those of the preceding. Plant about one foot high and will bloom the first year........................................10c.

---

**THE MISSION OF FLOWERS.**

Violet, why are your eyes of blue
Wet with tears of the morning dew?
Roses, why do you blush and start?
And hide the crystal gem at your heart?
Lily, what are you doing there,
With your bells a-swing in the balmy air?

A light breeze born of the morning hours
Softly stole o'er the banks of flowers;
And, list'ning closely, I seemed to hear,
Chimed in silvery voices—

"We are blessing the earth with our wealth of bloom;
We are lading the air with a rare perfume;
All things have their mission, and God gives us ours,
And this is a part of the mission of flowers:
To give life to the weary and hope to the sad;
To cheer the desponding, give strength to the weak;
To bring health's bright bloom to the invalid's cheek;
To bring joy to the grief-stricken heart;
To cheer homes of mourning where sorrow betides;
To rob dreaded Death of a part of his gloom.
By decked the dear one arrayed for the tomb;
To furnish the home with a lasting delight,
With our perfumes so lovely, our blossoms so bright;
To hallow the homestead, embellish the lawn,
Reflecting the mists of the roseate dawn;
In low, voiceless language, we're striving to tell
How God, in His wisdom, doth everything well."

—Dart Fairhorne.

in the center, giving them a fancied resemblance to a bee. Intense blue, plant five feet high..........................5c.

126—**New Compact Blue.** Hardy perennial, flowering freely the first year from seed, if sown early. Rich flowers, large, dark blue. Plant about one foot high, growing a little taller the second year, and blooming even more profusely..............10c.

127—**LAVENDER.** Hardy perennial plant, bearing long spikes of blue flowers; chiefly grown on account of its delicious fragrance, which the plant, when dried, retains for years..................5c.

128—**LINUM, (Scarlet Flax.)** A very showy and beautiful hardy annual, bearing profusely bright, scarlet flowers; 1 ft........5c.

---

**MIGNONETTE Reseda odorata**

A well-known and popular hardy annual, highly prized for its delightful fragrance. While blooming freely at all times, much larger and finer spikes are produced during the cool, moist weather of early spring and late fall. Seed sown in autumn will bloom in early spring, and when sown the last of July will come into flower in a few weeks and continue until cut down by frost.

137—**Sweet Mignonette.** Large flowered; ½ oz. 10c., oz. 15c . . . . 5c.

138—**Parson's White.** Nearly white; fragrant..........................5c.

139—**Golden Queen.** Flowers golden yellow. Growth dwarf but dense..........................5c.

140—**New Quaker City.** Flowers a handsome gold red, rich and fragrant; foliage very dark . . . . 5c.

141—**New Giant Flowered Red.** Form pyramidal, quite distinct, very striking and handsome . . . . 5c.

142—**Choice Mixed.** Our own mixture of the above and other varieties, ½ oz. 15c., oz. 25c . . . . 5c.

---

**DWARF Morning Glory**

**CONVOLVULUS MINOR**

Plant of trailing, branching habit, growing about one foot high and in diameter about two feet, and bearing in great abundance small, bell-shaped flowers similar to the tall varieties. These remain open much later in the day than do those of the tall sorts, often in clear weather till evening. Half hardy annual.

143—**Mixed Colors**........................................5c.
MARIGOLD

Open a fresh your round of starry folds,
Ye art end Marigolds!
Dry up the moisture of your golden lids,
For great Apollo bids
That in these days your praises shall be sung
On many harps, which he has lately strung.
—Keats.

Well-known plants, blooming freely and constantly. The African varieties are usually tall, the French more dwarf. Both are great favorites. Hardy annuals. 1 to 3 feet.

144—African Double. Mixed 5c.
145—African, Eldorado. Flowers very large and extremely double; quilled like a Dahlia; various shades of yellow and orange. 3 ft. 5c.

146—French Double. Mixed 5c.
147—French Double Dwarf, Gold Striped. Golden yellow striped with velvety brown. 5c.

148—French Legion of Honor. A beautiful single variety of dwarf and bushy habit, rich golden yellow, with garnet blotch in center of petal. 1 ft. 5c.

MOON FLOWER. 148. A rapid growing climber, often attaining a height of 30 feet in a season. Especially adapted to shading porches, etc. To secure flowers in northern latitudes seed should be started early in the house and then be planted out in rather poor soil, else it will run too much to vine. The thick outer shell of the seed should be cut through or a portion chipped off to assist germination...10c.

Morning Glory ~ Convolvulus Major

Flowers, shrinking from the chilly night,
Droop and shut up; but with fair morning's touch
Rise on their stems, all open and upright.
—Montague.

149—Mixed. All colors. 1/2 oz. 10c., oz. 15c.
150—Double White Tassel. A new, very distinct and beautiful variety. The plant is of rapid growth, blooms early and as profusely as the common Morning Glory. The flowers are double and of snowy whiteness. The seed we offer will produce a much larger proportion of double flowers than any seed of double varieties yet imported from Japan...10c.

Imperial Japanese Morning Glory.

Every Season Increases the Popularity of this Beautiful Flower.

Among the many wonderful novelties in the floral line introduced into this country from Japan, there is perhaps nothing which better attests the great skill of the Japanese florist or gardener than this superb strain of Morning Glory. Not only are the flowers of an almost endless variety of coloring, but the foliage, as well, is greatly varied and very attractive. The flowers are much larger than those of the old strain and fully as freely produced. Some are brilliant red and some clear blue; others are equal in brilliancy, margined or bordered with clear white. Some are striped or blotched with red or blue on white or yellow ground, and others clouded with blue and red. In fact the many variations are almost indescribable, and one may expect to find each morning some new combinations of colorings. The large leaves are of varied form; some are plain green and some green mottled with white, while others are yellow or yellowish-green. So beautiful and effective is this plant and so simple is its culture that it would seem that none who once learned its merit could possibly fail to cultivate it.

151—Choicest Mixed. Comprising seed from several noted growers, both American and foreign, insuring the greatest possible diversity in color of flowers and of foliage. 1/4 oz. 15c., oz. 25c. 5c.
The Nasturtium is so well known that it needs no description. It is sufficient for us to say of it that, among annuals, it is rivaled only by the Sweet Pea in popular favor, and that no other plant, not even the Sweet Pea, with so little care, produces such an abundance of graceful, beautiful flowers.

TALL NASTURTIUM - Tropaeolum Majus.

152 - Atropurpureum. Rich, dark crimson. Oz. 15c. 5c.
153 - Dunnett's Orange. Bright orange, blotched red. Oz. 15c. 5c.
154 - Edward Otto. Light brown with yellow calyx and spur. Oz. 15c. 5c.
155 - Golden Leaved Scarlet. Deep scarlet, with light yellow foliage. Oz. 20c. 5c.
156 - Heinmanni. Chocolate Brown. Oz. 20c. 5c.
157 - Luteum. Clear light yellow; large. Oz. 20c. 5c.
158 - Peart. Very pale yellow, nearest approach to white. Oz. 20c. 5c.
159 - Prince Henry. Yellow, marbled scarlet. Oz. 15c. 5c.
160 - Regelianum. Deep purple violet. Oz. 15c. 5c.
161 - Scarlet. Very intense scarlet. Oz. 15c. 5c.

Three Giant-Flowered Tall Varieties.

162 - Sunlight. This beautiful variety is of strong, vigorous growth and blooms profusely. The flowers are of the largest size, often nearly three inches across; a clear golden yellow. The petals are large, of rounded form, daintily crinkled. The two upper ones have fine, brown lines at the base; the three lower are more distinctly bearded or fringed at the throat than other varieties.

163 - Moonlight. This is nearly the counterpart of the "Sunlight," differing only in color, which is a lovely pale yellow or straw color. It is equal in size and has the same crinkly or crepe-like petals. It is a worthy companion of the preceding rather than a rival, and when grown side by side both show how aptly they are named.

164 - Salmon Queen. A beautiful variety, with dark green foliage, bearing flowers of the largest size and beautifully colored. Of a rich but soft, velvety shade of salmon, the two upper petals heavily veined with crimson in the throat. A fitting companion to Sunlight and Moonlight, and a variety with which none can but be pleased.

Each variety, pkt. 5c., oz. 15c., 1 lb. 40c.
NASTURTIIUM--Continued.

LOBB'S Tall Nasturtium;  (Tropœolum Lobbianum.)

This class differs from the common or Majus in being of a more free flowering habit and in the greater brilliancy of its flowers. Both foliage and flowers are slightly smaller and it is not as rank in growth as the common. The greater profusion of bloom and brilliancy of color makes it the more desirable to many.

165—Cardinal.  Cardinal red; purplish-green foliage.
167—Crystal Palace. Bright orange-yellow with bronzy-crimson markings at base of each petal.
168—Giant of Battles. Sulphur-yellow with carmine markings.
169—King of the Blacks. Very dark red, foliage dark green.
171—Mercier Lacombe. Purplish-violet.
173—Spitfire. Brightest scarlet; very free bloomer.

Each variety, pkt. 5c., oz. 15c., 2 oz. 25c., ½ lb. 40c.

174—Lobbianum Choicest Mixed. A mixture of above and other varieties. Pkt. 5c., oz. 10c., ½ lb. 30c.

TALL NASTURTIIUM.

175—Hybrids of Madame Gunter. A beautiful strain, having a wide range of distinct colorings, salmon tints striped and blotched with different shades of red predominating, but embracing pink, rose, crimson, maroon, purple, light yellow and orange in self-colors as well as striped and blotched. For richness and variety of colorings this class is not surpassed by any other nor does any other bloom more freely. Pkt. 5c., oz. 15c., ½ lb. 40c.

176—New French Chameleon. A wonderful new variety, having the peculiar property of producing flowers of many distinct colorings upon the same plant. The flowers are not only of different colors but are variously blotched, striped and bordered with contrasting shades. On the same plant appear at once clear self-colored flowers, others stained or flushed on a clear ground, and still others edged or banded with lighter or darker shades. Pkt. 5c., oz. 15c., ½ lb. 40c.

177—Tall Mixed, all Colors. A choice mixture, of which we have sold in the past few years large quantities. It comprises many distinct colorings and is fully equal to most of the mixtures generally offered. Being, however, mostly grown in mixture, it is not guaranteed to contain all of the most desirable varieties, but will, nevertheless, afford an effective display, surpassed only by the Worcester Tall Mixed. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.

178—Worcester Tall Mixed. In this mixture we have one which cannot be surpassed. It embraces many named varieties, including such as the Giant-Flowered Sunlight, Moonlight and Salmon Queen, The Hybrids of Madame Gunter, New French Chameleon, and all of the best of the Majus and Lobbianum classes. This mixture is made by ourselves and we therefore know just what it is, and can confidently recommend it as the best that can be made. Pkt. 5c., oz. 15c., 2 oz. 25c., ½ lb. 40c., lb. $1.25.

Nasturtium & DwarF, OR TOM THUMB.

This class blooms as freely as the Tall, and, being as well-known, requires no description or commendation. The following list of varieties comprises all of the best and most distinct. A package of Nasturtium contains thirty to forty seeds.

179—Aurora. Bright chrome-yellow, veined with carmine.
180—Beauty. Orange, with bright scarlet markings.
182—Bronze Colored. A very distinct and peculiar shade.
183—Cloth of Gold. Brilliant scarlet. Foliage golden yellow, distinct and pleasing; excellent for edge of bed of Nasturtiums, or foliage plants, or for combining with dark leaved varieties like Empress of India, King Theodore, etc.
186—Empress of India. Dark rich scarlet. Foliage golden purplish-green. Plant dwarf and compact; fine for edgings.
190—King of Tom Thumbs. Brilliant orange-scarlet. Foliage dark green.
191—Pearl. Pale primrose, often described as white.
192—Prince Henry. Pale yellow, heavily suffused with rose. A distinct and desirable variety.
193—Rose. Bright rose. A small flowered but charming variety.

All varieties at uniform prices except where noted.
Pkt. 5c., oz. 15c., 2 oz. 25c., ½ lb. 40c.
NASTURTIUM--Continued.

DWARF & Nasturtium.

194—New French Chameleon. This is identical with the New Tall Chameleon in the feature of producing flowers of greatly diversified colorings and markings on the same plant, the plant, however, being of the true dwarf type, and is perhaps even more striking than the Tall Chameleon. A pleasing novelty, which all growers of the Nasturtium should try. Pkt. 5c., oz. 15c., 2 oz. 25c., $ lb. 40c.

195—Liliput. A new, distinct and charming strain, of very dwarf, compact habit, which originated from the tall Tropeolum Lobbianum. It has the same desirable features of great brilliancy of coloring and free-flowering habit. The plant is smaller than the common strain of Dwarf Nasturtium, as are the light green leaves. The flowers also are smaller, but so profusely borne that they appear above the foliage in clusters and embrace many new and beautiful colorings. Very desirable for edgings. Pkt. 5c., oz. 15c., 2 oz. 25c., $ lb. 40c.

Dwarf Nasturtium MIXTURES.

TWO—One Good, the other Better.

196—Dwarf Mixed, all colors. For so many years have we sold this mixture that we unhesitatingly say it is a good one, despite the fact that we offer another—a better one—which we advise planting in preference to this. Although this, like the Tall Mixed, is largely grown in mixture, it, like that, embraces a wide range of colors and, also like that, has given great satisfaction to our many customers who have used it. Pkt. 5c., oz. 10c., $ lb. 25c., lb. 90c.

197—Worcester Dwarf Mixed. In addition to all of the preceding named sorts, including the new Chameleon, we have selected other choice varieties of the large flowered type, all of which combined make a mixture which for pleasing variations cannot be surpassed. We advise its use in preference to the regular mixture, believing that the wider range of color will much more than offset the slight difference in price. Pkt. 5c., oz. 15c., 2 oz. 25c., $ lb. 40c., lb. $1.25.

Collections of Nasturtiums.

So popular have our collections of Sweet Peas always been that we now offer Nasturtiums in collections, enabling those who prefer to know just what varieties they are to receive to secure a large number, distinct and varied in color, at a greatly reduced price.

198—Our Special Collection of Dwarf Nasturtiums. Ten named varieties, our selection, but including the New French Chameleon and Liliput. .................30c.

199—Our Special Collection of Tall Nasturtiums. Ten named varieties, our selection, but including Sunlight, Moonlight and Tall Chameleon. ..................30c.

200—Our Favorite Collection. One packet each of Tall Nasturtiums—Sunlight, Moonlight, Salmon Queen, New Tall Chameleon, Golden-Leaved Scarlet, Prince Henry, Pearl, Rose, and one each of Dwarf—Bronze Color, Cloth of Gold, Cerulean Roseum, Empress of India, King Theodore, Rose, New Chameleon and Liliput—16 varieties for 40 cents. The packets in these collections are not specially prepared for this—that is, having but few seeds—but are just what we sell at our counters for 5 cents each—full size, containing from 30 to 40 seeds. Our Special Offer does not apply on collections, nor can there be any further discount, regardless of number purchased.

PETUNIA.

201—Dwarf Inimitable. Of compact habit and growing but five to eight inches in height, bearing profusely small striped flowers ..................10c.

203—Finest Striped and Blotched. A choice assortment of striped and blotched varieties of many exquisite markings. 10c.

204—Good Mixed ..................5c.

A New Strain of Petunia.

"Giants of California"

This new strain was developed in California. The flowers are nearly all ruffled or fringed and are often five inches in diameter. It embraces a wide range and many beautiful combinations of colors—some with deep throats of yellow, green, maroon, black or white veined, blotched or striped with contrasting shades. The plant is of vigorous habit. A superb strain, which all lovers of the Petunia should try.

205—Choicest Mixed ..................25c.

It might be well for us to mention that the seeds of Petunia being so very small it often appears as though there were but few seeds in a packet, whereas a packet contains from 150 to 300 seeds.
Royal German. This superb strain is notable for its very great variety of beautiful shades of coloring together with its fine rounded form, large size, and enduring quality of the flowers. In all these respects it is unsurpassed by any other. It comprises all the solid or self-colored; a great variety of the delicately-shaded flowers; the three and five spotted; those having a distinct border or margin; the fancy striped and marbled. We offer in our Splendid Mixed all of these, and also some of the most desirable types and colors separately.

207—Snow White. Pure white; of perfect form
208—Light Blue. A delicate and exquisite shade of light lavender blue
209—Dr. Faust, or Black Knight. Deep dull black; very large and fine form; entirely free from glossy tints
215—Royal German. Splendid Mixed

GIANT TRIMARDEAU.

216—Mixed. A distinct class, with enormous flowers of rich and varied shades distinctly marked with large blotches on three lower petals. A charming and desirable strain of French origin, lacking somewhat the broad round form of the German varieties, but which, on account of its size and beauty, is a very popular one
PANSY -- Continued.

EXTRA LARGE FLOWERED.
217—Choice Mixed. A selection of extra-large-flowered varieties containing a large proportion of the separate colors of German Pansies, with the usual characteristics of these flowers. On account of their substance, especially desirable for cutting. While not as desirable as the following for bedding, yet for early spring blooming this will be very satisfactory, especially to those who prefer large flowers rather than a greater profusion of smaller ones .............................................. 10c.

SPECIAL MIXTURE—For Bedding.
218—This mixture is made of such varieties as experience has shown are best adapted for bedding; that is, those that will give the greatest freedom of bloom in the summer, and which, while not as large-flowered as some, are yet by no means small. It comprises a large range of colors, and owing to the free blooming habit of the varieties selected is especially desirable for bedding, producing a bright effect, even in the hot weather, so trying to the Pansy .............................................. 10c.

Phlox Drummondii

One of most popular annuals; hardy and of the easiest culture. Remarkably free flowering and brilliant and varied in coloring. It is very desirable for bedding, the brighter colors especially producing a striking effect; the red, when grown in masses, verifying the correctness of the name Phlox—signifying flame.

Seed may be sown in the open ground in the fall or early spring and will produce plants that will commence to bloom about the first of July, and continue in bloom until cut down by severe frosts. The dwarf varieties may be allowed to grow from four to six inches apart, but the tall varieties should stand about one foot apart, for if closer they are liable to mildew.

GRANDIFLORA.
A large-flowered strain; a great improvement on the old type both in size and form of flower.
222—Choicest Varieties. Mixed, all colors. ½ oz. 25c., oz. 75c.............................................. 5c.

NANA COMPACTA. (Dwarf Phlox)
This dwarf type grows only from six to eight inches high, and is especially desirable for ribbon beds and edgings.
223—Fireball. Bright scarlet.............................................. 10c.
224—Snowball. Pure white.............................................. 10c.
225—Mixed Colors. All the choice varieties. ½ oz. 30c., oz. 50c.............................................. 10c.

Star, or Fringed Phlox. Star of Quedlinburg
226—A distinct class, having petals partly fringed, partly toothed, instead of the entire rounded form of other Phloxes, and some of which being longer than others and regularly placed give the flowers a star-like appearance.
Mixed Colors. ½ oz. 25c., oz. 90c.............................................. 10c.

ENGLISH PRIZE, or English Face.
219—Choicest Mixed. The peculiar characteristic of this strain is the bold face-like markings of the flowers, which, combined with their delicate texture and velvety appearance makes it a pleasing variation .............................................. 10c.

WORCESTER GIANT MIXED.
220—This mixture is made by us, from the choicest large-flowered varieties and mixtures, including the best of those here offered, and many other German and French Prize strains, which we do not consider necessary to list separately. It affords the greatest possible diversity of color, with almost innumerable shadings and markings, and like all mixtures to which we attach the name Worcester, is the best we know how to make .............................................. 15c.

221—Good Quality. Mixed. A good assortment of colors. A strain which, being grown in mixture, does not require the care in growing, or selection, of named varieties, and can therefore be sold at less price. It will give more pleasing results than might be supposed from the price at which we offer it .............................................. 5c.

PERENNIAL PHLOX.
An old, well-known and very popular herbaceous plant, and growing in favor yearly. While propagation is usually accomplished by the amateur by division and by the florist with cuttings, our choice new varieties are seedlings and the field is open to all to easily increase their stock in this way, and is, to say the least, an interesting one, with but little expense.
227—Tall Varieties. Mixed colors. Seed saved from choicest varieties .............................................. 10c.
THE following varieties of Dianthus, commonly known as Chinese and Japanese Pinks, have been for a long time very popular, and deservedly so. In diversity of rich and beautiful markings they have but few rivals, and in ease of culture, freedom of bloom, and almost certainty of satisfactory results, they stand close to the Nasturtium. They are all hardy biennials, blooming the first year from seed, and some in most localities will often produce larger and finer flowers the second, but, owing to the ease with which they can be grown from seed, few treat them as biennials. Seed may be sown in the open ground at any time during May. Plants should stand about six inches apart.

229—Double China. (Chinensis fl. pl.) Plant compact, bearing in large clusters small, double flowers of varied coloring. Mixed colors, ¼ oz. 15c., oz. 25c. 65c. 

230—Hedewig's Double. (Hedewigii fl. pl.) Flowers very large and double, with finely fringed petals. A very fine strain, embracing a wide range of colors,—pink, rose, purple, maroon, white, and occasionally black and white. All colors mixed, ½ oz. 20c., oz. 65c. 240—Hedewig's Single Mixed. Fine large flowers, of brilliant colors, deeply fringed or feathered. 5c.

231—Crimson Belle. (Hedewig's.) Large single flowers, beautifully fringed; deep crimson. 5c.

232—Eastern Queen. (Hedewig's.) Flowers single, often two to four inches across; silvery white ground, with rich shadings and crimson center. 5c.

233— Mourning Cloak. (Hedewig's.) Large double flowers, with deep mahogany, almost black ground, and finely fringed edge of white. 5c.

234—Hedewig's Single Mixed. Fine large flowers, of brilliant colors, deeply fringed or feathered. 5c.

235—Double Diadem. (Diadematus fl. pl.) Flowers large, double and finely marked. Beautiful and varied in color, running from crimson-purple to black purple. Choice mixed. 5c.

236—Double Imperial. (Imperialis fl. pl.) Bright, showy flowers, very double, finely variegated in a wide range of colors. ½ oz. 15c., oz. 50c. 25c. 

237—Double Japan. (Laciniatus fl. pl.) Large double fringed flowers, of peculiarly rich and varied colorings. A choice strain. 5c.

238—Worcester Mixed. Our own unsurpassed mixture of above and other choice varieties. ¼ oz. 20c., oz. 60c. 5c.

239—DOUBLE DWARF LARGE FLOWERING HYBRIDS. The plants of this new strain are of dwarf habit, only nine to ten inches in height when in full bloom. They bloom profusely and the flowers are of fine form and substance, of brilliant colors, and of the largest size, specimens often reaching a diameter of three inches. They embrace all colors, from white to crimson, and are mostly variegated in the striking markings peculiar to the Dianthus. 10c.

Physalis. (Franchetti—Chinese Lantern Plant.)

240—This has been extensively advertised under the latter name, and has also been known as the Japanese Winter Cherry. It is really a small-fruited Husk Tomato, but of little value, if any, for eating. It is, however, of merit as an ornamental plant, the large, bright-red husks, or pods, produced in the axils of the leaves making it very showy. The roots are perfectly hardy and send up numerous shoots early in the spring. These are of straggling growth but, when covered with the bright pods, the plant is very effective for either garden or house decoration. Perennial; easily attaining a fruiting size the first year. 10c.

Portulaca.

WELL-KNOWN tender annuals, blooming profusely soon after seed is sown until cut down by frost. They thrive in nearly all soils and locations, but succeed best in a light, sandy soil and sunny spot, enduring any amount of dry weather. They are of but little value for cutting, but for a dazzling display, when sown in masses, nothing equals them. 

241—Single Mixed. ¼ oz. 25c., oz. 40c. 65c. 5c.

242—Double, Choice Mixed. Usually from fifty to sixty per cent of the flowers will come double, attaining to the highest proportion and largest size the latter part of the summer. ¼ oz. 40c., ½ oz. 65c. 10c.
POPPY

But pleasures are like Poppies spread;
You seize the flower, its bloom is shed.
—Burns.

This well-known plant is of the easiest culture, only requiring to be sown where designed to remain as it is very difficult to transplant. Although not generally adapted for cutting, some of the recent additions have flowers of more lasting quality than the older type, of which the poet writes.

243—Umbrosum. Scarlet, with black spot on each petal. A very showy variety, of dwarf habit.......................5c.
244—Snowdrift. Large, pure white flower, very double and finely fringed. A grand variety.........................5c.
245—Cardinal. Large, double flower, bright cardinal red; as finely fringed as the Snowdrift. A worthy companion for that beautiful variety.........................5c.
246—Tulip-Flowered. Splendid large flower, borne well above the foliage, cup-shaped, bright scarlet, sometimes having a black spot at base of each petal. Very beautiful, and when grown in mass resemble a bed of scarlet Tulips. 1½ ft.........................................................5c.
247—Shirley. Flowers large, generally single or semi-double. Of a wide range of color, running from blush-white through shades of pink-rose and carmine to deep crimson, occasionally blotched or streaked with white. A very graceful and elegant variety, especially fine for cutting..................5c.
248—Double Carnation-Flowered, Mixed. An old but desirable strain, embracing many distinct shadings and colors. Flowers very large and double, with beautifully fringed petals..............................................5c.
249—Danebrog. A single-flowered variety; bright scarlet with white spot at base of each petal. Very showy and distinct. 5c.

ROCKET. (Hesperis Matronalis.)
In rival pomp, see either Rocket blow,
Bright as the sun, or as the new fallen snow. —Evans.

Hardy perennial plant of easy culture, bearing clusters of purple or white fragrant flowers. The fragrance is much more powerful in the evening. 1½ ft.
253—Mixed.....................................................5c.

RICINUS. (See Castor Bean.)

RHODANTHE. One of the finest everlasting flowers and an excellent plant for garden decoration. If flowers are gathered before they are fully expanded and dried in the shade, they will retain their color for years. Tender annual. 1 ft.
254—Mixed Colors. Various shades of pink, rose, crimson and white..................................................5c.

SALVIA. (Flowering Sage.) Well-known perennials, blooming the first year from seed sown early in heat. They grow well in any light, rich soil, and will bloom until after frost. The Splendens (Scarlet) is one of our best and most effective plants for lawn decoration.
255—Splendens. The well-known variety; bright scarlet. 10c.

250—Worcester Mixed. Our own mixture of the preceding varieties and several others, all annuals, cannot fail to please...5c.

PERENNIAL VARIETIES.

ICELAND POPPIES.

These bloom the first year from seed. Large satiny flowers, borne on long stems; somewhat fragrant; excellent for cutting, remaining in good condition several days if cut when first open. The plant is perfectly hardy and blooms from June to October.
251—White, Yellow and Orange, mixed.......................5c.

ORIENTAL POPPIES.

These are also perfectly hardy and may be used to advantage in the perennial border. Seed may be sown in the open ground late in fall or early in the spring. They bloom early the second spring from sowing. All are single-flowered and of some shade of red, the following variety being much the best of the class.
252—Oriente. Flowers of immense size, six inches in diameter, bright scarlet. 3 ft.................................................10c.

SCABIOSA, or Sweet Scabious. Mourning Bride.
The Scabious blooms in sad array,
A mourner in her spring. —Flora's Interpreter.

A popular hardy annual, blooming freely in cool locations or during the late summer and fall. The flowers of the Tall varieties are borne on slender but stiff stems and are excellent for cutting. The foliage is of compact, rounded form, about ten inches in height. The Dwarf varieties are similar in form but only one-half the height.
256—Dwarf Double. Mixed, all colors. Includes the new varieties.........................................................5c.
257—New Tall Large-Flowering Double. Mixed. Large double flowers in a remarkably wide range of colorings, shading from white to pink, crimson to deep red, and from lilac to deep black.........................................................5c.

SENSITIVE PLANT. (Mimosa Pudica.)

Weak with nice sense the chaste Mimosa stands,
And from each touch withdraws her timid hands. —DARWIN.

Very curious and interesting plant, the leaves closing if touched or shaken. Half-hardy annual.
258—Sensitive Plant. Pinkish white; 1½ ft.......................5c.
**SWEET PEAS.**

Here are Sweet Peas, on tip toe for a flight;
With wings of gentle flush o'er delicate white,
And taper fingers catching at all things,
To bind them all about with tiny rings. —Keats.

A selection aimed to contain only the best or most desirable varieties, classified as to color or shade.

Descriptions of flowers, especially of those of a class as varied as the Sweet Pea, are at their best but meager and unsatisfactory, but as it is not always easy to determine in which class some varieties should be placed, the brief description with each variety may aid in distinguishing the difference between those in the same class.

Nearly all of the following varieties are of large size and excellent form, and generally superior to those of similar color or shade. We however carry in stock nearly all of the named varieties, and should any desire some of them they may safely include them in order.

Uniform price on all varieties. Pkt. 50c., oz. 10c., 2 oz. 15c., 1 lb. 25c.

### White.
1. Blanche Burpee—Large and of fine form and lasting substance, stems long and stiff; often three-flowered.
2. Emily Henderson—The earliest pure white variety.
3. Sadie Burpee—Claimed to be of improved form, but otherwise similar to Blanche Burpee.

### Pale Yellow or Cream.
5. Duchess of Westminster—Standard creamy white, shaded with coppery rose; wings suffused with salmon-pink.
6. Mrs. Eckford—Light primrose yellow, large.
7. Queen Victoria—Primrose yellow faintly suffused with purple, the nearest approach to yellow excepting Stella Morse.
8. Stella Morse—Large and of fine form, a combination of creamy yellow and salmon-pink, producing a beautiful apricot shade.

### Light Blush.
10. Mrs. Sankey—Often described as white, but is perhaps more appropriately classed here owing to its tinge of pink, becoming white only as it fades.
11. Sensation—Fine large flowers often three, sometimes four, on a stem, faint blush pink.

### Pink and White.
12. Blanche Ferry—Standard bright pink; wings nearly white, very popular.
13. Extra Early Blanche Ferry—A strain of the preceding, flowering at least a week earlier.
14. Earliest of All—Still earlier than the Extra Early Blanche Ferry, similar in color. Does not grow as tall as others.
15. Little Dorrit—Standard clear rose pink; wings creamy white flushed with faint rose. Of desirable form.

### Light Pink.
17. Katherine Tracy—Both standard and wings of soft but brilliant pink. Large and of desirable form, plant vigorous and free flowering.
18. Lovely—Delicate shell-pink faintly tinged with yellow, a truly lovely variety.
19. Mrs. Gladstone—Brilliant but soft rose pink on white ground.

### Deeper Pink.
20. Apple Blossom—Standard heavily shaded and edged with soft rose; ca white ground; wings white with rose in center.

### Salmon and Orange.
22. Prima Donna—Beautiful blush-pink. Large and of finest form, often four-flowered.
23. Royal Robe—Standard rich pink, wings soft rose. Large and of beautiful form.
24. Triumph—Standard creamy white flushed with salmon; wings shaded with carmine.

### Rose.
26. Her Majesty—Beautiful, soft but deep rose, large and finely hooved.
27. Mrs. Dugdale—Both standard and wings, carmine-rose faintly marked with primrose. One of the largest flowers of all; uniformly three on a stem.
29. Prince of Wales—Self-colored deep rose. Large, beautifully hooved, frequently four-flowered.
30. Royal Rose—Standard deep rose-pink; wings a lighter shade. Of largest size and fine form.

### Scarlet and Crimson.
32. Firefly—Bright scarlet, of medium size.
33. Flare—Intense scarlet; wings suffused with rose.
34. Prince Edward of York—Standard, a shade between scarlet and salmon; wings deep rose.
36. Salopian—(Improved Sunproof.) The finest scarlet variety. Of the largest size and finest form, uniformly three-flowered.

### Salmon and Orange.
38. Countess of Powis—Light salmon-pink suffused with orange.
40. Hon. F. Bouverie—Soft salmon-pink, shading to lighter salmon buff at edges of standard and wings.
41. Lady Mary Currie—Of rich orange effect, standard veined with salmon-pink and shaded at base with carmine; wings rose-pink veined with deeper shade.
42. Oriental—Bright orange-salmon veined with deeper shade. Large and finely formed.
43. Venus—One of the loveliest of this class. Beautiful salmon-buff shaded with rose-pink.

### Mauve and Lavender.
44. Admiration—Self-colored mauve. A fine large flower freely produced.
45. Celestial—Light lavender with faint reddish tinge.
SWEET PEAS — CONTINUED.

Bluish-Purple with White.

55. Captain of the Blues—Standard bluish-purple; wings purplish lavender.

Approaching Blue and Purple.

56. Countess of Radnor—Light lavender, often with faint purplish shade, especially in late stage of bloom.
57. Butterfly—Flowers small, but a popular variety from its peculiar form and color, creamy white with lavender shadings and purple edges.
60. Fluid of Honor—White ground shaded with light bluish-purple, and narrowly edged with violet.

MIXTURES OF SWEET PEAS.

OUR CHOICE MIXTURE.

This Choice Mixture is made by us, and contains about sixty named varieties, including both old and new, mixed in right proportions of color, and with the exception of some of the latest highest priced varieties contains all that is desirable for a choice mixture.

Pkt. 50c., oz. 10c., 1 oz. 25c., 1 lb. 25c., 1 lb. 50c.

COLLECTIONS OF SWEET PEAS.

EVERLASTING, OR PERENNIAL SWEET PEA.

(Lathyrus Latifolius).

This is very hardy, having long roots which penetrate the soil to a great depth. It is slow in starting, does not produce many flowers the first year, but when fully established blooms profusely and is one of the most satisfactory perennials. The flowers are borne in clusters on stout stems, only lacking fragrance to make them more popular; but they are, nevertheless, especially valuable for cutting, and the plant should be more generally cultivated. The colors are white, purple and red.

61. Mixed Colors—...50c.

SWEEP WILLIAM.

(Disanthus Barbatus).

This well-known, free flowering perennial is very desirable for an effective display in the border, is of the highest culture, and presents a more generally cultivated. Seeds may be sown at any time from early spring to the middle of August and will make fine blooming plants for the following spring.

63. Choice Double, Mixed—...50c.

SWEET SULTAN.

(Centaurea Moschata).

An annual of easy culture, bearing fragrant flowers.

64. Mixed, White and Purple—...50c.

57. Navy Blue—Perhaps as nearly approaching a True Blue as can be reasonably expected in a sweet pea.
58. Indigo King—Standard rich purplish maroon; wings of more bluish cast.

Claret and Maroon.

59. Black Knight—The darkest variety, standard rich claret; wings shaded with brownish purple.
61. Captivation—Bright claret.
66. Duke of Sutherland—Rich claret with reddish tinge, shading to purple at base.
63. Othello—Deep maroon, self-colored; very large.
69. Dark Marrada—Very large, tinge of purple.
70. Stanley—Self-colored dark maroon.

Striped and Variegated.

66. America—White, striped with bright red.
67. Aurora—Creamy white, striped or flaked with orange-salmon; extra large.
68. Gray Friar—Creamy white, marbled with light purple.
69. Juanita—Pink and white; light lavender markings on creamy white ground. Large and of fine form.
71. Lottie Hutchins—Creamy-white, striped or flaked with light pink.
72. Pansy—Large, of fine form and very attractive.
75. First Jos. Chamberlain—Ground clear white, striped with pink; extra large and of good form, very popular.
76. Princess of Wales—White, striped with marron.
77. Ramona—Rich cream, with broad splashes of pink.
78. Senator—White, heavily striped with chocolate maroon.

Our Best Mixture.

This is made of the large flowering varieties only. It contains most of the above desirable varieties and many of the higher priced more recent introductions not therein contained. Special attention is given to those that are right as to size and proportions of form and substance of the flowers. Nearly all have long stems, many of them becoming three or four feet long. This mixture cannot be passed over by any one, regardless of the price that may be attached to it.

DWARF, OR CUPID SWEET PEAS.

Plants of this class seldom grow over six inches high, but are of spreading growth, and are formed to a mass of rich green foliage thickly set with flowers of varied colors is very attractive and makes this class desirable for bedding purposes. The flowers are much larger than those of the Tall varieties, and unfortunately are short stemmed, which makes them like those of the Bush class—of but little or no value for cutting. There is, however, to be placed to the credit of this class the fact that if endures and thrives during periods of hot weather, which would greatly injure if not destroy the Tall sorts. Care, however, should be taken that the plants should not stand too closely, as owing to the very dense growth they do not so quickly penetrate into the foliage, and are, if too close, liable to rot. There have been introduced a number of named varieties, mostly an improvement of some of those of the Tall sorts, and are identical in color with the variety which name they bear. In addition there are a larger number of varieties or colors which have not yet been given a name, and nearly all the colors of the Tall sorts can be found in this class. We offer some of the most distinctive and desirable varieties and a mixture containing most of the named sorts and a much larger number of unnamed colors.

Mixture of over Fifty Varieties or Colors. Pkt. 50c., 1 oz. 10c., 1 oz. 15c., 2 oz. 25c., 1 lb. 40c.

STOCK.

One of our most popular and easily grown annuals, only needing a good, rich soil, good seed and ordinary culture to furnish a profusion of beautiful and fragrant flowers. The seed now offered is a great improvement over the old stock, shall grow, and will produce as large a proportion of double flowers as plants of the named sorts grown from cuttings.

65. Largest Flowering Globe Pyramid, Mixed. This new strain produces larger flowers of the largest size and perfectly double. Individual blooms are often over two inches in diameter. 3/4 oz. 75c., 1 oz. 1.25c.
68. Giant Perfection. One of the finest large-flowered varieties, with large spikes of double flowers. Plant of vigorous habit, growing about two and a half feet in height. Mixed colors. 1 oz. 1.25c.
69. Cut-and-Come-Again. (Princess Alice.) Plant of branching habit, bearing from the point of the leaf a profusion of pure white double flowers. 3/4 oz. 75c.
SALPIGLOSSIS - VELVET FLOWER.

A lovely class of half-hardy annuals which should be more generally cultivated. Flowers funnel-shaped, of beautiful and varied colors, exquisitely marbled and veined; in bloom from August to October. 1½ to 2 ft.

270—Choice Mixed .......................... 5c.

271—NEW EMPEROR. This forms only one leading stem, which often grows as thick as one's finger and bears on its end a bouquet of the most beautiful flowers. These are richly veined with gold and much larger than those of the old type. There is as much difference between the "Emporium" variety and the old type as between the improved varieties of Petunias and the common. The throat is wide open and short, and the edge of the flower is not so deeply incurved as with the old type. Mixed colors ................................... 10c.

VERBENA.

A well-known favorite flower, which should be more generally grown from seed. If sown in the open ground in May it will bloom in August, and, of course, somewhat earlier if sown in the house in March. Half-hardy perennial. 1 ft.

272—MAMMOTH, Mixed. Not only are the trusses of extra size, but the individual florets as well are much larger than in any of the old varieties, often greater in diameter than a silver quarter. It embraces all the colors with the markings peculiar to the Verbena. ½ oz. 40c., oz. $1.50 ......... 10c.

273—SCARLET DEFIANCE. Large trusses; bright glowing scarlet .......................... 10c.

274—MAMMOTH WHITE. Both truss and florets are of the largest size. Flowers are of good substance and of delightful fragrance .......................... 10c.

275—ITALIAN STRIPED. The trusses of this are large, but florets are smaller than are those of preceding varieties. Each floret is distinctly striped in bright colorings embracing a wide range of shades ............................................ 10c.

276—FINE MIXED. All colors. ½ oz. 25c., oz. 75c ........................................ 5c.

277—HYBRIDA COMPACTA. Mixed. A distinct strain, of dwarf habit. The plant forms a compact bush about five inches in height and blooms profusely throughout the season. Trusses large; colors white, scarlet and violet ........ 10c.

WALL FLOWER.

The flowers of the Wall Flower are deliciously fragrant and greatly prized. The large, massive, conspicuous spikes of the Double German varieties have a charming effect, while the more bushy, compact growth and profuse blooming single ones render them exceedingly attractive. Tender perennials. 1½ ft.

278—SINGLE, Fine Mixed ........................ 5c.

279—DOUBLE, Choice Mixed ................. 10c.

WILD CUCUMBER. Echinocystis Lobata.

280—A very rapid growing annual climber, reaching a height of 20 feet. Seeds germinate more freely if soaked a few hours in warm water before sowing ........................................ 5c.

WILD FLOWER GARDEN MIXTURE.

281—This mixture is made from a large number of the best free-flowering annuals, and will be found very useful to sow in various places where there is quite an area to be filled up without much expense or labor. If properly cared for and weeds are kept out, this mixture will furnish flowers continually through the season. oz. 25c., ½ lb. 75c 5c.

ZINNIA. Youth and Old Age.

The Zinnia has always been a popular plant on account of its freedom of bloom, bright, showy flowers, and the ease with which it could be grown. Although not a graceful plant, it is, when grown in masses or as the background to other lower-growing plants, striking and effective. Hardy annual. 1 to 3 ft.

282—MAMMOTH, Mixed. This plant is of unusually vigorous growth, often reaching a height of three feet. The very double flowers are of immense size, about four inches in diameter, and of rich and varied color. ½ oz. 25c., oz. 75c ................. 10c.

283—CHOICE MIXED. Not equal in size of flower to the Mammoth, but, nevertheless, a fine strain of double flowers with many brilliant colors ........................................ 5c.

284—STRIPED, or Zebra. The flowers of this are striped or mottled with contrasting colors ........................................................................................................ 10c.

285—LILLIPUT, Mixed. Plant grows about one foot high and bears in profusion small, very double and globular flowers about one inch in diameter of very brilliant colors ........................................ 10c.

286—HAAGEANA. Plant of distinct growth, more slender than others, flowers a little over an inch in diameter, semi-double and single. Color deep orange. The plant is of very free-flowering habit, and the flowers are excellent for cutting ........................................ 10c.
DAHLIAS. A Selection of Choice Varieties. The Best of the New and Old.

ALL POSTPAID AT PRICES QUOTED. We hope to be able to fill all orders with roots, but if the supply of these becomes exhausted, growing plants will be sent; if the latter are not desired it should be plainly stated in the order and money remitted will be returned.

SHOW AND FANCY DAHLIAS. SHOW DAHLIAS include all large close flowering varieties of a single color, and those in which the ground color is of a lighter shade than the edges or tips. FANCY DAHLIAS include all striped, large close-flowering varieties and those in which the ground color is darker than the edges. These varieties are, however, somewhat variable and often show but a single color.

A. D. LIVONI. Shell pink, fine; see specialty page. Each 10c., doz. $1.00.

ARABELLA. Pale primrose, shaded old-rose and lavender. Dr. KIRKLAND. Crimson-red, very large; see specialty page. 20c. Doz. $2.00.

CATHARINE. Bright yellow. HENRY COUNTESS OF BRENTWOOD. Intense cardinal-red, very rich, always full to the center. Blooms early and profusely. The red.

C. WOODBRIDGE. A magnificent flower; rich crimson; always full to the center. Blooms early and profusely.

BEATRICE. Pale rose, large and full; a beautiful variety.

ARACHNE. This derives its name from the peculiar and twisted petals of this flower. The petals are creamy white, edged with a broad band of crimson. The color, however, varies as much as the form; rarely two alike.

BRIEDERMAIT. Pale primrose, shading to delicate rose toward the outer petals; beautiful form and blooms freely.

CAPSTAN. Soft brick-red, shaded apricot; with the exception of Countess of Brentwood the most free-flowering variety.

C一世CTS DAHLIAS. Varieties of Special Merit.

COUNTESS OF RADNOR. Delicate salmon-rose.

CYCLE. Bright rosy crimson; early and profuse.

DELICATA. A beautiful true Cactus variety. Light salmon at base of petals, shading to a delicate pink.

GEORGE MARLOWE. Primrose-yellow, shaded amber.

GLORIOSA. Long; long pointed twisted petals; vivid carmine-scarlet. Very striking.

HENRY STREDDICK. Rich velvety maroon; petals long, an exquisite flower.

HOHENZOLLERN. Rich, bronzy orange-red with golden sheen; very fine.

IONA. A rich terra-cotta, shading to orange. Large petals, profuse.

JOHN H. ROACH. Beautiful light yellow. Of perfect form.

MATCHLESS. A grand variety. Of branching habit, dwarf but strong; blooms extremely early and profusely. Flowers large; rich crimson over laid with deep bordeaux. MRS. BENNETT. Flowers large and well built with broad but well-curved petals; soft crimson.

HUNOLD.; Flowers of ideal Cactus form; large, always full to the center. Blooms early and profusely. The red.

MRS. BARNES. Long twisted, narrow petals, lovely clear primrose, shading to a pale rosy pink. MARY SERVICE. Pinkish apricot or heliotrope. MRS. CHAS. TURNER. Of immense size, pure yellow. Blooms freely. RUBY. Deep vermilion center, shading to a purplish tinge at tips of petals. Rich and showy and perfect in form.

STANDARD BEARER. Rich fiery scarlet. One of the best of this color.

DECORATIVE DAHLIAS. Each 15c., dozen $1.50 unless otherwise stated.

Small flowered varieties, the best of all for cutting, blooming more freely and usually having extra long stems.

ACHILLES. Pale blue, finely quilled.

ARIEL. Orange-buff.

ALDINE. Delicate pink, tinged lilac.

BOBBY. Plum color.

CATHARINE. Bright yellow.

DARKNESS. Deep maroon.

Small flowered varieties, the best of all for cutting, blooming more freely and usually having extra long stems.

FAIRY QUEEN. Sulphur yellow, edged pink.

FASHION. Brown orange.

F. O. WINTERS. Pale fawn.

LITTLE BESSIE. Creamy white.

MAY CLIFF. Light maroon.

MABEL. Salmon-pink, fine.

PARIS. Cactus, striped orange.

PRINCE CHARMING. Cream, tipped purple.

SNOW CLAD. Small white, free.

VIVID. Bright scarlet.

NYMPH. THE WATER LILY. Shrimp pink, tinted lighter.

OLYMPIA. Deep rose-pink striped and penciled with rich crimson; very large. 20c.

WM. AGNEW. One of the finest reds; large and of perfect form, constantly in bloom.

Pompon or Bouquet Dahlias. Each 12c., dozen $1.25.

These will be better than we have ever before offered. Labels have been lost of some of the finest varieties we have ever had; such are therefore put in mixtures, and for various reasons other fine varieties of all classes are included.

Mixed Dahlias. Dozen 90c., hundred $7.00.
BEGONIAS. Tuberous Rooted.

These are among our finest bedding plants.

The flowers are marvels of beauty — delicate yet brilliant, of beautiful form and very large, often measuring, when conditions are favorable, over four inches in diameter. In color they are extremely varied, ranging from pure white through many shades of pink and rose to scarlet and deep crimson, and from pale yellow to deep orange. The foliage is remarkably clean and healthy, varying in form, deep green, presenting a very pleasing contrast with the bright flowers. For best results, tubers should be started early in the house and then be planted out only when danger of frost is past. They will come into flower very soon and bloom profusely and continuously until frost. The tubers can then be taken up and stored in dry sand in a moderately warm place.

**Single Varieties.** White, Pink or Rose, Red and Yellow. Each, 10c. Doz. $1.00. Postpaid.

**Double Varieties.** Same colors. Each, 15c; 3 for 40c. Doz. $1.50. Postpaid.

CALADIUM ESCULENTUM. Elephant’s Ears.

A very large-leaved tropical plant of rapid growth. In warm, rich, moist soil a single bulb will send up from three to ten stalks four to five feet in height, each having a leaf three to four feet long and nearly as wide. Very ornamental, planted either singly or in groups.

**Extra Large Bulbs.** Each, 20c; 3 for 50c. Postpaid.

**Second Size Bulbs.** Each, 15c; 3 for 40c. Postpaid.

**Per Dozen, by Express.** Extra Large, $1.50. Second Size, $1.25.

TUBE ROSE.

Bulbs may be started in the house for early flowers, or they may be planted in the open border, but not earlier than June in this latitude.

**Excelsior Dwarf Pearl.** This is an improved strain, plant is of dwarfer habit, blooms earlier and flowers are more double than old strain. Our bulbs are sure to please.

**Extra Large Bulbs.** Each, 4c.; 3 for 10c., doz. 40c., 25 for 70c., postpaid. By express, 50 for $1.00; $1.75 per hundred.

**Medium Size.** Each 3c., 4 for 10c., doz. 25c., 25 for 45c., postpaid; 100 by express $1.35.

For peculiarly beautiful flowers, with rich, brilliant and diverse colors and stately foliage, no plant exceeds the Canna. Planted in masses on the lawn, no other plant is its equal in striking decorative appearance, and it is at present probably the most popular of all bedding plants, even exceeding in popularity the old-time favorite, the Geranium. Strong, dormant roots.

A. Bouvier. Brilliant crimson, of deeper hue when fully expanded; foliage bright green; 6 feet.

**Alsace.** Delicate sulphur yellow, changing slowly to creamy-white; the nearest approach to pure white; foliage green; 4 feet.

**Austria.** A fine variety of the orchid-flowered or Italian type. Canary-yellow; foliage green, large and handsome; $5 feet.

**Burbank.** Also of the Italian type; similar in color of flower and foliage to the Austria. 5 feet.

**Chas. Henderson.** Deep but brilliant crimson; foliage broad, a rich deep green with narrow margin of bronze; 4 feet.

**Flamingo.** Clear intense crimson, large flowers borne in immense trusses and in great profusion.

**Florence Vaughan.** Yellow, spotted with red; foliage green; a popular variety; 4 feet

**Grand Rouge.** A gigantic dark-leaved variety, often attaining a height of over 8 feet. Very desirable for massing. It also bears freely bright scarlet flowers of fair size which adds to its value.

**Italia.** A beautiful large orchid-like flower, brilliant red in center with a wide irregular margin of yellow; foliage green; 5 ft.

**Madame Crozy.** A very popular variety; crimson-scarlet, bordered with golden-yellow; foliage bright green, and massive. Although of vigorous growth, the plant seldom exceeds 4 feet in height, and often commences to bloom when about a foot high.

**Morning Star.** Yellow, spotted with maroon; somewhat similar to Florence Vaughan but does not grow as tall.

**Paul Marquant.** Rich salmon, shaded with rosy carmine; foliage dark green; a distinct and pleasing variety; 4 feet.

**Peachblow.** Pinkish-white, changing to rose, with a distinct blotch of deeper shade at neck; foliage green; of dwarf habit.

**Queen Charlotte.** Bright orange-scarlet, widely edged with golden-yellow; a popular variety; of dwarf habit.

**Robusta.** A tall variety with ornamental dark foliage; 7 to 8 ft.

**Shenandoah.** A splendid red or bronze leaved variety, beautifully veined and tinted. It bears fine large trusses of waxy-pink flowers and, unlike other dark leaved sorts, blooms early and abundantly.

**Mixed.** All varieties, doz. 75c., postpaid; hundred by express, $5.00

CANNAS

Each, 10c., 3 for 25c., dozen, $1.00. Postpaid.

**Strawberry Plants**

The plants we offer are of our own growing, are always dug after orders are received and carefully packed, insuring delivery to customer in best condition possible. Their condition will be found greatly superior generally to those received from the West or South, the latter being generally sold so cheaply that the necessary care in preparing them for shipping cannot be afforded. The probable different conditions should be considered when comparing prices. We offer only a few—but the best varieties, and see no reason for offering others inferior in various respects. Varieties marked (P) have imperfect flowers and require to be grown with some one of the others, one row in five of the latter being sufficient.

**The President.** This new variety is highly recommended by those who have seen or grown it. Producing an abundance of very large perfectly formed fruits, the number of which is so great that they might be termed a second crop, and the product being always of largest size and perfect form. The fruit is of the finest quality and stands shipping well. The plant is not only productive but extremely vigorous and hardy. Doz. 50c.; postpaid, 100 by express $1.00.

**Brandywine.** A large, late and handsome berry, conical form, dark, glossy red. Plant healthy, vigorous and productive.

**Bubach (P).**—Of large and uniform size, regular in form and of good color. Plant remarkably vigorous and unsurpassed in productivity. Probably more largely planted at present than any other variety.

**Cahill.**—Fruit large, firm and beautiful, of regular conical shape, never varying, and holds size to end of season. Color light scarlet. Considered by some good growers to be almost a perfect variety.

**Gen Mary.**—A good sort for the kitchen garden. Berries conical, bright red, of fine flavor.

**Glen Arbor.**—Good for setting with Talko or other imperfect colored varieties. One of the largest and finest kinds in cultivation.

**Glimmer (P).**—One of the most valuable new sorts, continuing in bearing for an unusually long time. Fruit bright scarlet, very sweet.

**Sample (P).**—One of the best market berries in cultivation. Fruit of fine color and flavor.

**Talko (P).**—Fruit large, bright crimson, and of fine flavor; very productive.

**Each of the above except President by mail, postpaid, doz. 40c., 100 by express, 90c. Special price by the 200.**
THE BRADLEY FERTILIZER COMPANY

was the pioneer of the fertilizer business, and for nearly half a century has been and still is, the leader in that line, manufacturing and selling more fertilizers yearly than any other company in this field. They have not only the largest and best equipped factories, but the prestige of longest experience and most successful career, which has rendered their products a household theme from Maine to California, and has secured to them the familiar cognomen of the "OLD RELIABLE."

The Bradley Fertilizer Co. are Manufacturers of the following well known brands of Fertilizers:

Bradley's X. L. Phosphate, Bradley's Potato Fertilizer, Bradley's Complete Fertilizer for all Crops.

Special Pamphlet describing them all mailed free on application.

Bradley's Complete Manure for Potatoes and Vegetables

Is particularly rich in ammonia and potash, and has given phenomenal results in growing large crops of the best quality of potatoes, onions, beets, turnips, carrots, cabbages, squashes, melons, etc. It is the most perfectly balanced fertilizer manufactured for growing all kinds of root crops and market garden truck. It is the market gardener's favorite.

ANALYSIS.

Nitrogen, equal to Ammonia.  4.00 to 5.00 per cent.
Available Phosphoric Acid. 8.00 to 11.00
Total Phosphoric Acid.  9.00 to 12.00
Potash (K2O) 7.00 to 8.00
Equal to Sulphate Potash. 12.95 to 14.50

Price per 100 lbs. $2.10; per ton, $40.00.

BRADLEY'S XL PHOSPHATE

A High Grade Complete Fertilizer for General Use on all Farm and Garden Crops, either with or without Barnyard Manure.

Bradley's Potato Fertilizer is one of our best known and most popular brands, having been found a sure producer of large crops of fine quality potatoes. It is finely ground, and its superior mechanical condition insures even distribution either by hand or in the potato planter.

ANALYSIS.

Nitrogen, equal to Ammonia. 3.00 to 4.00 per cent.
Available Phosphoric Acid. 7.00 to 11.00
Total Phosphoric Acid. 10.00 to 14.00
Potash (K2O) 5.50 to 7.50
Equal to Sulphate Potash. 3.70 to 5.55

Price per 100 lbs. $1.75; per 50 lbs. $1.00; per 25 lbs. 60c.; per ton, $33.00.

NITRO-CULTURE FOR SOIL INOCULATION.

We wish we had space to give a lengthy report in regard to this much talked of article which we offered last year in our catalogue for the first time, but space will not permit. We wish to say, however, that while a very large number of the reports which we received from parties to whom we sold last season were not favorable, after careful investigation and from reports from trustworthy parties who gave it a fair trial, we still believe that NITRO-CULTURE is all that Mr. Moore claimed for it and we recommend another trial this season, and as stated in our last year's catalogue, we hope that every one of our customers will report the results at the close of the season.

While very few of the cultures which we sent out last year responded or showed any life, we believe that a large number of the failures were due to the water that was used and for that reason we advise all to use boiled water and to follow directions carefully. It is also necessary that the soil be tested to ascertain whether or not it contains any acid.

NITRO-CULTURE is not a cure all, guarantee crop or mortgage lifter, as some of the leading newspapers and magazines would have you believe. Neither will it make poor seed grow or be of any benefit on soils which now contain the proper amount of bacteria, but it has a place and it is for the farmer to find out for himself whether his soil needs it or not. It is certainly worthy of trial.

PORT NORRIS, N. J., Aug. 16, '05.

GENTLEMEN:—I have an immense crop of lima beans, and farmers for miles around come to see it. The best farmers never saw its equal. If Nitro-Culture had cost $10.00 per acre I would have been well pleased. I have in all 8000 hills and the cost of Nitro-Culture was $4.00. I know by test that it made my crop one week earlier, which means several times the cost of inoculation.

(Signed) J. W. BRADLEY.

WHAT IS NITRO-CULTURE?

Nitro-Culture is designed to supply a specific need to the soil.

If used under proper conditions it will put into the soil bacteria of the highest efficiency into the soil, which finding lodgement in the roots of the legume, enables that plant to receive nitrogen in large quantities and as a result the crop is vastly better and the soil greatly enriched.

Nitrogen is the only food element added by the bacteria. But nitro-gum is the most important, the one demanded in largest quantity by all plants and is the most expensive of fertilizers.

In a soil already rich in nitrogen the bacteria are not needed, in fact they will not grow with success. Neither is it necessary to inoculate land plentifully supplied with the proper organisms.

We will gladly furnish literature describing its value and as Dr. Moore is now with the company of which we buy, we believe that with his advice and one year's experience, better goods will be sent out this season.

Waverly, N. Y., Sept. 12 1905

Dear Sirs:

I can readily testify to the value of Nitro-Culture on Garden peas. I planted Nott's Excelor on soil which last year did not yield much of any peas. I planted a row without inoculation and one inoculated alongside this year. The un inoculated bore few peas, short pods, vines about one foot high, while those treated with the culture were vines fifteen inches to two feet, average eighteen to twenty inches; more than double the peas, two or three picking.

Respectfully yours,

(Signed) G. L. LEMON.

When ordering be sure and state what particular crop you desire to inoculate.

Alfalfa or Lucerne.  Garden Beans (Wax, String, Lima, Pea or Kidney).
Red, Yellow or Mammoth.  Soy Beans.
Clover.  Velvet Beans.
Alike or White Clover.  Vetch.
Crimson Clover.  Peas.
Burr Clover.  Peanuts.
Cow, Clay, Whip- O' Will.  Field Peas.
Black Eye Peas.  Sweet Peas.

PRICE LIST.

Trial package, $ .50  SPECIAL GARDEN PACKAGES.
1-Acre package, 1.50  Sweet Peas, $.25
2-Acre package, 5.00  Garden Beans, $.25
50-Acre package, 25.00  Garden Beans, $.25

Nitro-Culture cannot be furnished for any crops like corn, wheat, potatoes, cotton, etc., but only those which are mentioned on the above price-list. Inoculated clover may be planted with oats or other crops, and we have reason to believe that they will be benefited.
be it large or small, adds greatly to the beauty of any home; but no one has a right to expect a lawn to stand cutting, trampling and the other abuses to which they are subjected without some complete fertilizer being applied each season to furnish the necessary plant food. Our Worcester Lawn and Garden Dressing is designed to take the place of stable manure, which contains more or less, and usually more, foul seed. Our Dressing is acknowledged to be the standard food for grass and is used largely on our parks, cemeteries and large lawns. We mix this dressing-ourselves and allow nothing to go in it that is not of the highest quality. It contains chemicals that will give the grass an early start (for who does not wish their lawn to look green before their neighbor’s) and it also contains the necessary plant food to carry it through the season. Our largest and best Worcester lawns have been kept green for years with this mixture. Stable manure should not be used under any condition if you wish to keep your lawn free from weeds. Pure ground bone, muriate of potash, nitrate of soda and fine ground kiln dried sheep manure are the principal ingredients used. This is not only designed for lawns, but is adapted for small gardens and flower beds. It is put up in 25, 50 and 100 lb. bags under a guaranteed analysis.

Prices: 25 lbs. 60c.; 50 lbs. $1.15; 100 lbs. $2.00. Special Prices in One to Five Ton Lots for large Estates and Parks.

Raw Materials or Fertilizing Chemicals

Farmers who understand compounding and mixing chemicals for different crops can do without buying chemicals and mixing them themselves rainy days and odd jobs, but it is a dangerous and expensive undertaking for those that do not know how. To all who advise buying mixed goods of some reliable brand. We have for several years made a specialty of this small branch of our trade and have the reputation of furnishing the chemicals lower than many of the fertilizer companies who hand large quantities, but recommend mixed goods. The following prices are subject to change without notice, but in large lots we can make the prices for cash with the order.

PULVERIZED SHEEP MANURE.

This is a pure, natural manure, and the most nutritious food for plants. Its effect is immediate, much more lasting and healthy than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest and quickest liquid manure, rivaling guano, without any deleterious effect. Instead of being put up in the natural state as formerly, we have it kiln-dried and then finally pulverized, which makes it much more convenient to handle, and it can be kept in any cellar for an indefinite length of time.

DIRECTIONS. For mixing with soil: Take one part manure to six of soil. For making a liquid: Take one pound of manure to five gallons of water. This can be used with safety every day.

Prices. Ton, $25.00; 100 lbs. $1.75; 5 lbs. 25c. Special Price by the Car Load.
**ESSEX HIGH GRADE FERTILIZERS**

**RAISE GOOD CROPS.**

The Essex Fertilizers have as a basis the Dry Fish and Fish Bone produced by the Russia Cement Co. In the process of manufacture owned by this company, and which no other manufacturer can obtain, these ingredients are manipulated in a way which renders them especially valuable as plant food.

This accounts for the superior availability and crop producing power of the

WE DO NOT SELL LESS THAN 100 LBS.
Agricultural Tool Department.

Syracuse Reversible Sulky Plow.
Steel Moldboards and Landslides.

This is the lightest draft sulky plow on the market. Will plow on sidehill or level ground and leaves no dead furrows. We believe this is the only sulky that will do satisfactory work on all kinds of soil and on hill or level farms. As shown in cut two plows are used (one only being in use at a time). Throwing the plow in and out of the ground is done by the team while the operator has control of the width of furrow with his feet, leaving both hands free to handle the team. The wheels always stand perpendicular and the plows level. Several valuable improvements have been made since the plow was first placed on the market. Each plow cuts 11 to 16 in. wide. Weight of plow complete, 526 lbs. We furnish two sets of points and two-horse hitch with each plow.

List, $45.00. Discount for cash, $3.00.
Three-horse hitch in place of two-horse, $3.00 extra.

The Wachusett Swivel Plow.

This is our latest and, we believe, for all kinds of work, the best Swivel Plow on the market. Nearly all other plows on the market at the present time have some defects, and we have been studying for the past few years to overcome them as far as possible, and we think we have accomplished our object in this plow.

We can furnish either hardened or steel moldboards.

List price No. 2, $11.00. List price No. 3, $11.00.
List price No. 12, $12.50. List price No. 13, $12.50.
No. 2 and 3 Hardened, No. 12 and 13 Steel Moldboards.
Discount for cash, $1.00.

The National Reversible Sulky Plow.

This plow works equally well on sidehill or level land. As with the Syracuse, two plows are used, both fastened to one beam. The plows are thrown in and out of the ground with the foot, making it a very easy plow to operate. A boy 12 years old can handle it easily. There are few farms in New England where a Sulky plow cannot be used to a good advantage. Price includes extra set of points, neck-yoke and evener.

List price, $45.00. Discount for cash, $3.00.

DIAMOND A, B AND C PLOWS.
New Style with Steel or Chilled Moldboard.

Excepting the Wachusett this is one of our best swivel plows. It is furnished with steel or chilled moldboard, patent foot latch, wheel and cutter and shifting clevis. All parts interchangeable with the '76 plow made at Castleton, Vt.

A cuts 5 to 7 in., 11 to 14 in. wide; wt., 139 lbs. List price, $13.00
B cuts 6 to 8 in., 8 to 12 in. wide; wt., 114 lbs. List price, $12.00
C cuts 7 to 9 in., 7 to 8 in. wide; wt., 77 lbs. List price, $8.50
A and B are two-horse; C one-horse. A and B have wheel and cutter. C has wheel. Discount, on A and B, $2.00; C, $1.00. Steel Moldboard, $1.50 extra.
**Syracuse No. 60 Plow,**

*With Steel Cutter or Jointer, Steel or Chilled Moldboard.*

This is our leading Steel Beam swivel plow and will work on level land or sedgehill. It has a steel or chilled moldboard, patent foot latch and shifting clevis. Cuts 5 to 8 in. deep, 12 to 15 in. wide; weight, 138 lbs.

---

**Syracuse No. 5 Vineyard Plow One-Horse.**

This plow is designed for plowing between rows of trees or vines. The handles are adjustable sideways or up and down. The horse can walk in the furrow or on the land. It can also be used for garden plowing. Iron beam; cuts 3 to 5 in. deep, 7 to 10 in. wide; weight, 63 lbs.

- List price, with wheel, $7.25.
- Discount for cash, 50c.

---

**Syracuse No. 31 and No. 32 Two-horse Landside Plows.**

These plows have steel moldboards and wheels, straight cutters or jointers. No. 32 is the same plow used on the double sulky with the addition of a pair of handles, and no better plow was ever made.

- No. 32 cuts 5 to 7½ in. deep, 10 to 15 in. wide; weight, 119 lbs. List Price, $16.50
- No. 31 cuts 5 to 8 in. deep, 12 to 15 in. wide; weight, 108 lbs. List Price, $17.00

Discount for cash from either of the above, $3.00.

---

**The Arlington Plow.**

The Arlington Plow has become a favorite in many sections. They are made with steel shifting lever, clevis, patent spring foot latch. Moldboards are made of patent steel, and all castings nicely polished. The beam and handles are made from selected stock, neatly striped and varnished.

**The Arlington Swivel Plow.**

- **DESCRIPTION OF SIZES.—**
  - No. 29 turns a furrow 12 to 14 in. wide, 5 to 7 in. deep. Weight, 135 lbs.
  - No. 29 turns a furrow 12 to 14 in. wide, 5 to 7 in. deep. Weight, 135 lbs.
  - No. 27 turns a furrow 8 to 11 in. wide, 4 to 6 in. deep. Weight, 85 lbs.

**DOE CAST IRON PLOW.**

A good general purpose plow, designed for all kinds of garden work. Wood beam, cast moldboard and point.

- E 0 Medium one-horse, $5.00
- E 1 Large one-horse, 6.00
- E 2 Light two-horse, 7.00
- E 3 Medium two horse, 8.00
- E 4 Two or three-horse, 10.00

Discount for cash, 50 cents.

---

**THE SYRACUSE PLOW No. 812.**

This is the latest number in the Syracuse line, and we believe the best one. The leading feature is the shifting handles, which enables the operator to walk directly behind the plow. It has a steel truss beam, automatic jointer or cutter and shifting clevis, adjustable wheel, inclining forward or back.

- List price, with chilled moldboard, wheel and cutter or jointer, $16.00. Discount for cash, $2.00.

---

**OLIVER PATTERN CHILLED PLOW.**

All parts interchange with the Oliver. This plow has a chilled moldboard, extra high standard, which prevents clogging in weeds or trash. It is our best one-horse landside plow.

The above prices are without wheel. If wheel is wanted, add $1.00 net to above prices.
The Eldridge Flexible Steel Disc Harrow.

The only Disc Harrow made that has a steel frame made in one piece with no cast iron standards to break. It is a perfect flexible disc harrow and can be taken apart in one minute without removing a bolt. It runs on ball-bearings, each gang having three bearings with nine balls in each. The discs have special concavity deeper than any other disc harrow, which allows it more cutting capacity than any other make with discs at the same angle. It can be taken apart for loading or storing by simply removing two cotter pins and giving the discs a slight turn. One great feature is the closeness with which the discs run together in the center. It is practically an overlap harrow. As one gang runs about six inches behind the other, which allows it to cut within one inch, it leaves no ridge behind it. It has the easiest seat of any harrow made and all things considered, we claim it to be the most perfect and durable harrow on the market. We are the exclusive selling agents and want good agents in unoccupied territory.

Price list: 12-16 in. Steel Discs, complete with whilletree, yoke and scrapers, $21.00. Discount for cash, $1.00.

Same Harrow with cut-out Discs, $22.00. Discount for cash, $1.00.

The Acme Pulverizing Harrow.

A general purpose harrow that will crush, cut, lift, turn, smooth and level the soil to perfection, all in one operation. While pre-eminently adapted for heavy, stubborn land, it can be adjusted, by means of the levers and runners, to do perfect work on the lightest soil. It cuts the entire surface without disturbing sod or trash that has been turned under by the plow. It prepares a perfect seed bed, and also covers seed in the best manner. The draft is reduced to a minimum. Being made entirely of cast steel and wrought iron, it is practically indestructible.

PRICES.

No. 23. Regular size, 1 and 2 horse, made in two sections. List price, $18.00 Discount for cash with order, 10 per cent.

The Badger One-Horse Spring Tooth Harrow and Cultivator.

This is one of the handiest tools a farmer can have. It will do work equally as well as a two-horse harrow, having the same teeth, only a trifle smaller. We offer this harrow at a very low price.

Price, $9.00. Discount for cash, 50c.

The Syracuse One-Horse Spring Harrow.

We have sold this harrow for the past four seasons and it has given perfect satisfaction. It has ten spring teeth, oil tempered, and is adapted for all kinds of work.

List Price, $9.00. Discount for cash, 50c.
The Reliance Disc Harrow.
With Steel Weight Boxes. 12 16-inch Steel Discs.

The Reliance Disc Harrow, as shown above, is made especially for us, and is designed for farmers who want a harrow with weight boxes so that it can be weighted to work on very hard soil. The boxes are also very handy to throw loose stones into while at work harrowing. All parts except the discs are painted bright red.

List Price, $21.00. Discount for cash, $1.00.

Reed Spring Tooth Harrow.

The Reed Harrow is our best spring Harrow. It is made of very best material throughout and has two levers for raising and lowering the teeth.

The Original PERRY Spring Harrow

This is the first Spring Tooth Harrow ever offered for sale, and it has many friends today. For durability, it is equal to any harrow made. The wood frame is lined with carbon steel, bolt heads protected, teeth cannot get loose.

List price, 16 teeth, $11.00. Discount for cash, $1.00.

The Aberdeen Spring Tooth ... Lever ... Harrow.

Having some calls for a spring harrow with shoes instead of wheels, we have added to our already large line of harrows this make, and while it has to be hauled to and from the field on the shoes instead of wheels, we believe it will do just as good work and is as durable as any harrow on our list.

List Price, 15 teeth, $15.50.
   " 17 "   $16.50.

Discount for cash, 50c.

BIG 5
Spike Tooth Smoothing HARROW.

This harrow is designed as a leveling harrow, and for covering all kinds of grain and grass seed. It is also used largely for cultivating corn just after it comes up. The teeth are adjusted by means of a lever, and can also be thrown up from the ground and harrow transported to and from the field on the shoes at the end. Each tooth is held in place by two bolts (nearly all others have but one), and the entire harrow is made of steel.

List price, 60 teeth, $12.00. Discount for cash, 75c.
List price, 80 teeth, $11.00. Discount for cash, 50c.

Prout's Two-Horse Hoe.

To those unacquainted a brief description of this machine will undoubtedly prove of interest. Each Standard as shown in the cut has two hoes attached, and in working one set of hoes work on one side of the hill and the other on the opposite side hoeing a row at a time. The hoes operate same as a hand hoe, moving fresh earth to the plant, and crowding the old dry earth away from the plant, the work being done much more quickly and thoroughly than when hand hoes are used. Unlike the cultivators and horse hoes now in common use, the whole surface for the distance of two feet, more or less, on each side of the plant is cut over, and all the weeds removed. The hoes being made tapering permit of cutting close up to the plant without injury to corn roots which run close to the surface.

List Price, with Wheels, $25.00; Cash Price $20.00
   " no "   $23.00; "   $18.00
Planet Jr. No. 72, Riding Cultivator.

No. 72 Planet Jr. Two-row Pivot Wheel Cultivator, Plow, Furrower and Ridger. With Lever Adjustable Gauge, price, $52.50; weight, packed, 560 lbs. No. 70, Three-lever, list, $40.00; weight, 465 lbs.

Five per cent discount for cash.

The Twentieth Century Manure Spreader.

Mr. Kemp's latest invention, and the best Spreader on the market at the present time. The original tight-box Spreader, and the only machine that will sow commercial fertilizers, ashes, chemicals, lime, etc.

Send for complete catalogue.

The Wood Bar Smoothing Harrow.

With lever for adjusting the teeth. This is the best Wood Bar Harrow made.

Price, 60 Tooth, $11.00. Discount for cash, 50 c-nts.

Cast Iron Boat Head.

Dunham All Steel Land Roller.

With solid steel head. Cannot break and will not fill with gravel and stones. The most durable roller made. One size only; 7 feet, 3 section, 24 inches high.

List, $30.00. Discount for cash, $2.00.

The Stevens Fertilizer Sower.

The latest improved and best machine for sowing all kinds of artificial fertilizer, such as bone phosphate, cotton seed meal, lime, ashes, etc., either damp or dry, in drills or broadcast.

Unequalled for top-dressing grass lands, lawns or large parks.

List price, $45.00. Discount for cash, $2.00.

McWhorter Hand Fertilizer Sower

This fertilizer sower can be instantly changed so that the stream is divided from one into two or more streams, and thus be applied beside or on two or more rows of plants at the same time. The spouts or channels through which it passes to the ground open and close, so that starting with a width of about 4 inches the spread can be gradually increased to 30 inches. This is especially adapted for top dressing strawberry beds and lawns.

Price, $11.00. Discount for cash, $1.00.

Farmer's Friend Seed and Fertilizer Sower

Attaches to any ordinary farm wagon, and sows to perfection grass and grain seeds of all kinds and in any desired quantity per acre, up to 100 acres a day. It also distributes all dry commercial fertilizers also ashes land plaster, lime, etc. It has a positive force feed and an adjustment opening the holes from 1/4 to 1/2 inches, which allows the sowing of seeds of any size; the flow can be shut off anywhere, either on one side or the other, or altogether, as required; it is instantly thrown in or out of gear. Price, complete to attach to wagon, $10.00. Discount for cash, $1.00.
Eclipse Corn Planter and Fertilizer Distributor.

Plants field or ensilage corn, beans, peas or beet seeds in hills, drills or checks; it will drop 6, 12, 24, or 36 inches apart. By scattering pumpkin seeds in with the fertilizer in filling the hopper will place seeds in hills when planting corn. It accurately distributes from 50 to 400 lbs, as desired, of commercial fertilizer, wet or dry. In the rows of hills, first drawing most earth on the seed before the fertilizer is dropped each side of the seed, and all is covered to a uniform depth. Price complete, $21.00; discount for cash, $1.00.

The Segment One-hand Corn and Bean Planter.

Lightest, most accurate, strongest and most up-to-date planter on the market. All parts are interchangeable.

Price, $1.75.
Discount for cash, 25 cents.

Eclipse Two-Row Two-Horse Corn Planter.

The most complete, accurate, durable and easily handled double row corn planter in the market. All the good points found in the well-known and popular "Eclipse single row Planter" are retained in this machine. Rows 36, 38, 40 and 42 inches apart. The new Marker Device, used for two reasons with perfect success on the single row Eclipse, is used on this. One move of the lever throws the machine out of gear, and at the same time raises the planter and covers the row or furrow at end of row.

Price, $50.00. Discount for cash, $2.50.

AUTOMATIC HAND CORN PLANTER.

Very handy for re-planting, and for small gardens.

Price, $2.00
Discount for cash, 25 cents.

The New Aspinwall Potato Planter with Fertilizer Attachment.

Loose Furrow, Anti-Packing Paw. All Parts Automatic and Adjustable. Deposits the Fertilizer Where It Will Do the Most Good.

The New Aspinwall Potato Planter with Fertilizer Attachment embraces more substantial improvements and desirable features than any other make. Instead of depositing the fertilizer from the rear of the machine, partially mixing it with the earth as the furrow is being closed, they have transposed the location to the front and arranged the plow to open a deep furrow, where the fertilizer is deposited, being mixed and covered with the earth, putting it underneath and in advance of dropping seed. List Price, $70.00; discount for cash, $5.00. Corn Planter attachment, $5.00 extra.

HOOVER POTATO DIGGER.

Space does not allow us to give any lengthy description of this wonderful tool but we should be pleased to mail complete catalogue describing it fully.

PRICES.

Regular size 22-inch.
Machine, $100.00. Discount for cash, $5.00.
20-inch—$95.00. Discount for cash, 5.00.
Cahoon's Improved Broadcast Seed Sower.

Will sow all kinds of grass and grain seeds from 4 to 8 acres per hour at a common walking gait. Heavy seeds, such as wheat, it will throw 40 feet (20 from each side of the operator); lighter seeds, of course, will not be thrown so far.
Price, $3.50.

THOMPSON'S SEEDER.

For broadcasting Grass, for sowing Red Top, Clover, Timothy, and all Mixed Seeds. Light, strong and simple.

Sows uniformly the whole length of the hopper. twelve feet. It has no cam or cog gearing to get out of order. It has a positive motion, and works as freely and easily when sowing as when empty.

 Seeder No. 5. Sows all varieties of Clover, Timothy, Hungarian Millet, Alfalfa, Chaffy Seeds, like Red Top, Orchard Grass and Kentucky Blue Grass. This style machine is made expressly for New England trade. List price, $10.00. Discount for cash, $7.50.
No. 4, Grain Seeder Box, 10 feet, for sowing all kinds of grain. This box fits on to No. 5 Seeder, and with both boxes all kinds of grain and grass seeds can be sown. List price, $5.00. Discount for cash, $3.00.
No. 4 Seeder and No. 4 Grain Box. List price, $15.00. Discount for cash, $10.00.

The Cyclone Broadcast Seeder.

This is the cheapest and best of the hand seed sowers on the market, and every one sowing one acre or more of grass seed or grain cannot afford to be without it. Will sow Timothy, Clover, Wheat, Oats, Rye, Buckwheat, Hungarian, Red Top, Millet and all other grains and seeds perfectly even, and any desired amount to the acre, and from 40 to 60 acres a day. The machine is first-class in every respect. We guarantee the seeder to give satisfaction, or money refunded. Net price, $1.50.

Steel Frame Cultivator, No. 123.

This series of Cultivators meets the demand for a good cultivator at a low price. The points and standards are of the same stock as used in No. 101, but the frame is somewhat shorter and a little lighter. The standards are adjustable for pitch.
List price, $6.00. Discount for cash, 50 cents.

PLANET JR. HORSE HOE, No. 5.
HORSE HOE AND CULTIVATOR.

This is similar to No. 9, without the handle brace, and has a cheaper, but good substantial adjusting lever, and is furnished with five steel plates and tiller attachment as shown in cut.
List price, $7.50. Discount for cash, 50.

Steel Frame Cultivator, No. 124.
(With Long Steel Hilter.)

This tool is similar to the No. 123, but in place of the short steel tiller wing we use the long hilter, same as on No. 101. This makes a lighter tool and one that can be used for furrowing as well as hilting, and it is sold at a very low price.
List price, $7.00. Discount for cash, 50 cents.

Ornamental Iron Garden Roller.

These Rollers are designed to meet the wants of those who desire a first-class, easy running, handsome and efficient roller. They all have polished machinery steel shafts, lathe bored bearings.

THE PLANET JR. FAMILY.

No. 19:
'Single Wheel Hoe.
Price $3.75.

THE PLANET JR. No. 8.
This is the latest pattern Horse Hoe and Cultivator and as shown in cut, it has a lever for raising and lowering the wheel; also one for expanding and contracting. The wheel lever also governs the depth of the rear end by means of a shoe, which is a great advantage in sandy ground.

List price, $9.00.
Discount for cash, 50c.

THE PLANET JR. No. 7.
Horse Hoe and Cultivator.
This Horse Hoe is No. 8, without depth regulator, and a slightly different lever wheel.

List price, $8.50.
Discount for cash, 50c.

No. 9 HORSE HOE AND CULTIVATOR.

This admirable tool is identical with the No. 8, except that it has a plain instead of a lever wheel. It has the high frame, patented hollow steel standards, patent lever Star wheel, new lever expander, and new hollow steel wheel arms.

List price, $7.75.
Discount for cash, 50c.

No. 4 HORSE SHOE AND CULTIVATOR.

This tool is low in price, strong and simple; it has the old favorite stirrup clamp and plain expanders; they cost a trifle less than the lever.

List price, $6.60.
Discount for cash, 50c.

The Planet Jr. 12-Tooth Harrow, Cultivator and Pulverizer.

This thorough working and convenient tool has grown in favor among strawberry growers, market gardeners, truckers and farmers. This is because the twelve chisel-shaped teeth do such capital work, without throwing earth on small plants.

List price, with pulverizer as shown, $9.00. Less pulverizer, $7.46. Discount for cash, 50c.
The Planet Jr. Celery Hiller.

This tool is used largely by celery growers for banking celery in the fall. We can furnish both single or double. The single is used mostly, and will do the work of five men.

List price, double, $15.00
List price, single, $12.00
Discount for cash, 50 cents.

The "Fire-Fly" Plow.

This tool is invaluable for those who have small gardens. The moldboard is tempered and polished steel. The depth may be changed very quickly. The low price brings it within the reach of all. Very useful to plow up the chicken yards.

Price, $2.35.

Sunnyside Hoe.

The above cut shows the Sunnyside or Strawberry Hoe, invented several years ago by one of our largest strawberry growers and since then used by several of the leading fruit growers in the state. It is especially adapted for small fruits and close cultivation.

Price, each, 40 cents.

Keyes Forged Steel Harrow.

List price, $10.00. Discount for cash, $1.00.
Flat Tooth $1.00 extra.

The Hitchcock Potato Digger.

For digging and hilling potatoes.

Price complete, $10.50. Without hiller, $8.00.

SHOVEL PLOW.

Price, $3.00.
Discount for cash, 25 cents.

New Model Horse Hoe.

Cheapest and best two-horse hoe on the market. Can be used for furrowing out, covering and hilling up. Price $8.00. Discount for cash, $1.00.

The Sheldon Wheel Hoe.

A low-priced, but very efficient little implement for flat or scuffle hoeing.

Price, $1.50.

SPRING TOOTH CULTIVATOR.

This Cultivator is especially adapted for use in stony ground. The teeth are fine, oiled-tempered springs and are alike and interchangeable; they are adjustable for angle and depth. Expanding lever, five spring teeth and Wheel.

List price $6.50. Discount for cash, 50 cents.

SHERWOOD STEEL HARNESS

With Latest Improvements.

List price, $13.00. Discount for cash, $1.00.

The Goslee Improved Marker.

Adjustable Tooth. Spreads 2 to 4 Feet.

This machine is designed to mark out rows of any width, and in doing so it makes a furrow suitable for planting.

Price, $7.50. Discount for cash, 50 cents.
THE IDEAL DEERING MOWER.

This machine runs on ball and roller bearings and is without doubt the lightest and stillest running machine ever made. We will gladly mail catalogue describing it fully.

DEERING CORN HARVESTER.
Price, $125.00.

DEERING IDEAL HAY RAKE, STEEL FRAME.

This rake is made to supply the demand for an all steel rake. We believe this is the best of the entire lot. It is a horse dump rake. Strength and simplicity are two features in its construction, and we recommend it to anyone in want of a steel rake.
Price, $22.00. Discount for cash, $1.00.

NEW YORK CHAMPION RAKE.

It is impossible to find all the good points in any one tool, but this rake will properly rake green hay and aftermath better than any other rake. It has the sled runner tooth, is a self-dumping rake, and is easily operated by any one capable of driving a horse. There are several imitations on the market be sure and get the GENUINE. List price, $20.00. Discount for cash, $1.00.

THE MONARCH STEEL HAY TENDER with Center Chain Drive.

The Monarch Steel Hay Tender shown above is the latest thing out for a Chain Driven Tedder. It is made of first-class steel by skilled workmen. The Wheels are extra heavy channel tire with staggered steel spokes. The Frame is made of continuous steel angle bars in one solid piece, no spliced corners, no bolts, or rivets to get loose. It has great strength at all points. The Crank shaft is made of the very best tool steel with turned bearings, and broad journal boxes. The Fork Arms are made of boiler tube, and relief coil crucible steel spring is provided for each tooth. It has a double seat support and separate levers for throwing in and out of gear and for raising and lowering the teeth, both within easy reach of the driver. Has six forks, combined pole and shafts to be used with one or two horses. Price, $32.00. Discount for cash, $2.00.

THE BAY STATE WOOD AND STEEL FRAME HAY TENDER.

The Bay State Wood Tedder, shown above, is, in construction, similar to the Bay State Steel Frame, only wood is used in place of steel. On stony ground, we would recommend this tedder as we believe the wood wheel will wear longer than the steel. The Forks of the Tedder are made of crucible steel and the Fork Arms are made of the best hard wood. It has two levers the same as the steel frame. Also has combined pole and shafts, so it can be used for one or two horses. It is the best wood hay tedder there is on the market, and we do not see how we could improve on it. If we charged double the price, they would be sold.
Price, 6 Fork Wood, $25.00; 6 Fork Steel, $35.00. Discount for cash, $5.00.

THE YANKEE RAKE.

This is the old reliable Yankee, which needs no introduction. It is a very easy rake to operate, each tooth being independent; it will pass over large stones without breaking the teeth. It is so easy to operate that a child can handle it.
List price, $21.00.
Discount for cash, $1.00.
Reversible Steel Track Hay Carriers.

No Barn Is Complete Without One of These Rigs.

Our carriers for rod, wood, or steel track are the most durable and easiest rigs to operate of any on the market. Any one with a hammer and wrench can rig his barn as well as an expert carpenter. We furnish everything necessary for rigging any style of barn. If you will send us the length and height of your barn and style of ridge pole, we will name you price for complete job.

The De Laval "Baby" Cream Separator and other Dairy Goods.

Used by all the Leading Agricultural Colleges and Experiment Stations.

The purpose of the Cream Separator is the expeditious and complete separation of cream from milk in the most practicable manner possible. This Separator consists of a cylinder-shaped steel bowl or vessel, enclosed within and mounted upon a frame provided with a suitable gearing to acquire a high speed with a minimum expenditure of operating power. The whole milk is fed into this bowl, the separation effected within it, and the cream and skim-milk are separately discharged from it, the discharge following within half a minute after the in-flow, while the machine may be used at a few minutes or as many hours—at a time— as may be necessary, according to the amount of work to be done.

**Improved "Baby" No. 1.**

Iron Stool Style.

*De Laval Cream Separator.*

Capacity, 450 lbs. per hour.

"Alpha" or "Disc" Bowl Type. **Price, $100.00.**

**Crank Humming Bird.**

New Style No. 0.

*De Laval Cream Separator.*

Capacity, 250 lbs. per hour.

"Alpha" or "Disc" Bowl Type. **Price, $70.00.**

**Improved "Baby" No. 2.**

High-Frame Style.

*De Laval Cream Separator.*

Capacity, 600 lbs. per hour.

"Alpha" or "Disc" Bowl Type. **Price, $125.00.**

We can furnish either style of stool on Nos. 1 and 2. Send for large catalogue.

The Health Milk Bottle Caps.

All caps, other than the Health Cap, must be removed with a fork. Knife or some sharp instrument. They cannot be removed with the thumb and finger. When once released the old-style cap is almost invariably thrown away, leaving the contents of the bottle exposed to odors, and in no way meeting the objectionable features of an open receptacle. It costs no more than the ordinary cap. It will fit any standard milk bottle. It makes sealing and opening of bottles easy. Bottles can be kept sealed at all times. Keeps milk free from all odors. It is the most convenient cap on the market.

No knife or fork is needed to remove the Health Cap. **Price per 1000, 20 cents; 9000, 35 cents; 25,000, 22 cents.**

Common Round Caps, 1000, 30 cents; 5000, 25 cents.

The Stoddard "Churn."

The "Stoddard" Churn is made by hand in the most thorough manner of kiln-dried white oak. It will last for years. The principle is concussion, not friction— has no float nor paddle inside. It is easily operated, easily cleaned.

**PRICES--DAIRY SIZE.**

Waters Butter Worker.

The purpose of working butter is to free it from buttermilk and distribute the salt evenly through it. The Waters differs from most butter workers principally in the point that the tray, with the butter, moves under a stationary roller instead of the roller travelling over the butter in the tray.

THE ACME ATOMIZER.

Used largely for spraying cattle, with the different mixtures on the market, to keep off the flies; spraying Parsnips Green and other Insecticides on Potato Vines, Shrubs, Small Trees, House Plants, Live Stock and Poultry. A great labor saver on the farm and in every Larden, barn, greenhouse, orchard and henery. It will apply the finest possible spray on any object desired and exterminate any kind of insect life. Weighs only one pound. Can hold one pinte and one-half pints. Well and simply made of tin or brass, combined into the strongest possible shape, it cannot come apart, and easily cleans itself when turned upside down. Indispensable on every farm.

Price, Tin, 50c.; Tin, with Brass Cup, 75c.

The "Boston" Spray Nozzle.

Will throw a coarse or a fine spray, a large or a small solid stream. The spray can be closely contracted or made to cover a large area. These results are obtained by revolving it part way round.

Price, 35 cents.

Improved Vermorel Nozzle WITH DEGORGER.

Arranged with stuffing box, so that the liquid will not wet the operator while being used. Fitted for 1-2 inch male end or 1-4 inch pipe. Each nozzle is furnished with two caps, with different sized openings, for coarse or fine spray.

Price, 85 cents.

ACME POWDER GUN.

A simple, practical implement for the extermination of potato bugs and all kinds of insects, flies, etc., the pests of every house and garden. It will handle all insecticides in their dry state—Pure Paris Green, Bordeaux, Persian Insect Powder, etc. It is very effective in the destruction of Potato Bugs, Currit Werms, and all like pests. Is well made, with a hardwood head block, hardwood handles, brass leather for the bellow, (an extra bellow is furnished to fill the funnel for getting under the leaves of plants and shrubs) and is well finished throughout. Every farmer should have one.

Net Price—Single, $1.00; Double, $1.50.

Price, 45 CENTS.

MYERS' BRASS SPRAY PUMP.

This Pump has More Real Advantages than are contained in any other Pump on the market.

This pump is constructed of material that is not affected by the poisonous arsenites used in the different formulae for spraying fruit trees, vines and shrubbery. The cylinder and all working parts are brass; has rubber ball valves, and is equipped with Graduating Spray Nozzle, which will throw a spray as fine as mist. A great many pumps advertised for spraying are only sprinklers. Fig. 305 is furnished with 8 foot extension pipe, 6 feet of hose, graduating spray nozzle and barrel. This outfit is large enough for an orchard.

Price, $1.00.

The Tennent Glass Pot Atomizer, with Mixer.

The Barrel of this Atomizer is made of the best tin obtainable; ordinary length; plunger, washers, etc., all of good material.

The receptacle is a new special design of extra heavy glass, well protected with a spring steel lantern wire guard. Holds about a quart of liquid; easily filled and washed out.

Price, 75 cents.

The Faultless Atomizer.

Used for same purpose as the Acme, only has a larger capacity. In these respects it is better than the Acme; in other parts just the same. Made in tin only. Next to the Tennent this is the best hand atomizer on the market.
IMPROVED LITTLE GIANT DUSTER.

LITTLE GIANT DUSTER

Distributes Paris Green, London Purple, Hellebore, Sulphur, Lime, "Fungicide," Tobacco Dust, etc. Weighs only five pounds complete. Full length with tubes, 4 feet 8 inches. 

Price, $5.50.

CHAMPION PARIS GREEN OR DRY POWDER GUN.

LEGETTS CHAMPION DUSTER

For distributing dry insecticides and fungicides such as Paris Green, London Purple, Hellebore, Sulphur, Lime, "Fungicide," Tobacco Dust, etc. Destroys potato bugs and all other insects, and prevents blight. The standard machine for applying insecticides dry. Sure, Rapid, Safe, Strong and Cheap.

Retail price, $7.00.

THE BROWNIE DUSTER

Particularly useful for In-Door as well as Out-Door Work. Wherever a Dry Powder is Required.

Price, $3.50.

KNAPSACK SPRAY PUMP, No. 331. THE O.K. SPRAY PUMP.

For Orchard, Vineyard or General Use.

The tank of this pump holds five gallons, is fitted with strain which can be removed. The pump is our regular Copper Tank Sprayer Pump, with large chamber, ball valves, solid plunger and agitator. The pump can be removed easily. Operator can use it the same as a tank with bucket pump, viz.: set the knapsack on the ground and work pump with handle. Can be carried by hooking strap on the opposite side provided for that purpose, making a neat handle as shown by the dotted lines. The handle lever can be shifted from right to left shoulder at will.

Net price, $10.00.

RUBBER ATOMIZERS.

Triple Vermorel Nozzle.

Can be used in connection with either pump.

Useful for sprinkling house plants and also for spraying hellebore and bug death. Small Size, 50 cents, Large Size, $1.00. Either style of neck.

Triple Vermorel Nozzle. Price, $1.50.

Double Vermorel Nozzle.

Same as triple only two holes.

Double Vermorel Nozzle. Price, $1.25.

HECHKISS DRY POWDER GUN.

For applying clear Paris Green and other dry insecticides. It does away with the slow, laborious process of applying mixtures in water or plaster. The process is quick and effective. 

Price, $5.00.

THE ROCHESTER SELF-OPERATING SPRAYER.

The air enters the sprayer through the valve at bottom of pump, thoroughly agitating and mixing the contents of sprayer. The compressed air, being powerful, forces the liquid out through the outlet pipe, making either a fine spray or a solid continuous stream as desired. This size machine holds from 3 to 4 gallons. Made of Galvanized iron or brass.

PRICE.

Galvanized Iron, style 6, $5.00; Brass, $6.50.

Discount for cash, 30 cents.
FURBER Wood Pumps.

This is the best wood out-door pump that we can buy. It has the patent closed handle bracket, so that stones or any rubbish cannot get into the box; patent let-off to prevent freezing: iron top: lined or unlined.

6 x 6 for house use.

RUBBER BUCKET CHAIN PUMPS.

They are one of the best cheap pumps.

This is the old reliable Rubber Bucket Chain Pump, and until the BUCKET PUMP (shown above) came into the market, it was used largely in wells where the water was impure, as the constant motion of the chain and buckets kept the water in motion and prevented sediment.

PRICES.

Dickey's Bug Death Shaker.

Dickey's Bug Death Shaker, shown in cut, is designed for applying any kind of dry powder, and is the best as well as the cheapest shaker on the market. It is provided with a scoop for filling. Order out with your Bug Death. Price, 25 cents.
ARSENATE OF LEAD

It is the best Insecticide known for leaf eating insects because it kills quickly. Trees or plants sprayed with Arsenate of Lead and water are quickly freed from these insect pests. It cannot injure the most delicate foliage. One pound to ten gallons of water has been used on young, tender leaves without injurious effects. It is absolutely free of boracic or burning the leaves. It adheres to the foliage for weeks. Respraying after rains is the bane of the fruit-grower's life. Arsenate of Lead dries on the leaves into a varnish-like film which is not affected by rain. One thorough spraying will protect the foliage for an entire season.

PRICE LIST

1 lb. Tin Cans, at 10c. per lb. 2 lb. Wooden Pails, at 75c. per lb.
3 lb. Wooden Pails, at 10c. 5 lb. Wooden Pails, at 12c.

Gall-Cure ........ $0.25 & 0.50

MORRILL'S CANKER WORM EXTERMINATOR.

A sure protection for fruit trees and ornamental trees from the ravages of the grub and canker worms. As easily applied as paint or whitewash by first placing a band of tarred paper six inches in width, securely fastened around the tree four feet above the ground, then covering the paper thoroughly with the exterminator, using a common paint brush. For 2 lb. cans, 10 lb. cans, 45c., 5 lb. cans, 60c., 10 lb. cans, $1.10, 20 lb. cans, $5.00.

COAL TAR. In quart tin boxes. For tarring corn to prevent crows from pulling it. Per can, 25c.

LONDON PURPLE. Used by some in place of Paris Green. Per lb. 25c.

HELLEBORE. Sure death to the currant worm. Per lb. 25c.; 1/2 lb. 12½c.; ¼ lb. 10c.

TOBACCO AND WHALE OIL SOAP. Something new to prevent scale, green and black fly, mealy bug and red spider on greenhouse plants, and killslice on dogs and poultry. Price, 25c.

TOBACCO STEMS. Indispensable for fumigating greenhouses and conservatories; for destroying aphids, should be dampened before using, and also a small handful on some dry shavings, and light it. Price per 100 lbs., $1.50.

TOBACCO DUST. Kills green and black fly, etc., if dusted on when the plants are moist. Also good mix in the soil to destroy ground insects. Small size, 10c., 100 lbs., $2.50.

CONKEW'S ROPY CURE is the only remedy that will positively cure roe in all its forms. It is simply put in drinking water and the chicken takes its own medicine. It prevents colds and is unequalled for canker, especially in pigeons. Price, 50 cents.

GREETLEY'S ROPY CURE. The result of twenty-five years' experience. A sure cure if used in season. Price, 25 cents.

LAMBERT'S DEATH TO LICE. As its name implies it is sure death to lice on hens and chickens. It is harmless to human and animal life. Should be used on setting hens; it will not injure the eggs or harm the youngest chick. 15 oz. size 25c., 45 oz. size 50c., 100 oz. size $1.00.

L.T's LICE KILLER is a liquid preparation; comes in tin cans; highly recommended. Quart, 25c., half quart, 50c., 4 quart, $1.00.

DR. HESS' HEALING POWDER. A great antiseptic powder. Cures galls and open wounds. 4 oz. box 25c.

DR. HESS' INSTANT LOUSE KILLER. KILLS LICE.

Put up in round can with perforated top ready for use in one and three pound packages. The large size is the cheaper. You get three pounds for 60 cents and with the handle it is just as convenient as the smaller size. Large size, 60c., small size 25c.

PRATTS' LOUSE KILLER.

Put up in one pound size. (it kills the lice.) 25c.

THE EUREKA FLY KILLER.

Protects cattle and horses from fly pest and vermin. Sure preventive, perfectly harmless, easily applied, inexpensive. Eureka Fly Killer is a sure preventive that kills and drives away the worst of all pests, the Texas, Buffalo and horn flies. It was with a necessity: It meets an existing demand for an article of this kind, and it has been so well and perfectly satisfactorily is attested by the numerous and grateful testimonial from farmers who have used it.

Price per gallon, 75c.
WYANDOTTE CHICK FOOD has stood the test of another year and comes out far ahead of all other brands. While nearly all the materials used in the manufacture of this food advanced from 10 to 20% in the past season, we maintained the same quality throughout the year and also retailed it at the same price.

WYANDOTTE Chick Food, of which we are the sole manufacturers, has become a standard article and is known the world over as a great life preserver for young chicks. Our trade the past season amounted to 100 tons more than the previous year and is now being fed in several different countries and giving excellent satisfaction.

To those who are not familiar with Wyandotte Chick Food we wish to say that it is made out of the choicest materials that money will buy. It is not loaded down with grit and oyster shell so as to sell it at a low price, but quality is first in our minds. It is the safest food to give young chicks. Feeding it regularly will prevent all the ailments to which chicks are liable, and having a good start for the first few months, they will mature much earlier and in better condition for laying or for market than they would if fed in the ordinary way.

Poultry is more profitable than beef. There is always a market for both poultry and eggs. Wyandotte Food is not an experiment. It is not put up in fancy packages or sold at drug store prices. It is something that has been carefully tested. There is nothing used that cannot be fed alone with perfect satisfaction and much less when put together.

In preparing the food our aim has been to get a safe and nutritious food that would be a balanced ration without the use of any other kind of feed. Wyandotte Food contains the choicest imported millets, is free from dust, thoroughly dried and selected grains, fine cracked charcoal, all of which combine to make a food just fitted to produce strong and vigorous chickens. No oat hulls or other coarse matter used.

The outlook for raising poultry in the future is very promising. Both poultry and eggs are bringing higher prices than ever before, but the secret of success is proper feeding. We furnish these materials at honest prices.

Sample mailed free.

Price, 100 lbs., $2.50; 50 lbs., $1.35; 25 lbs., $.75. Grain and Feed Dealers ask for Wholesale Prices.

---

Every Morning Poultry Mash.

This is a highly nutritious, balanced ration, ready to mix for the morning or evening mash for laying hens. This food is sold under a guarantee to contain not less than 12% protein and 3.50 fat. It is different from most mashes on the market in that it contains medicinal properties as well as those for producing eggs. It contains those grains that are high in egg making qualities, and feeding this mash once each day will keep the flock in a healthy condition.

Laying hens should never be over fed with warm mash for it has a tendency to make them stupid and inactive, but just enough should be fed so they will eat it up clean and crave for more. It should be followed with a little of our Every Day Scratch Food for exercise. While this is equal to many of the patent foods on the market, it is sold at the price of common grain and should be fed during the winter and spring months when eggs are required.

Put up in 100 lb. bags only.

Price per 100 lbs., $2.00; 500 lbs. or over, $1.55 per hundred.

As its name signifies, this is a mixture of mostly whole grains such as wheat, oats, corn, buckwheat, barley, sunflower, kaflir corn, millet, charcoal, scraps, etc. It contains everything necessary to produce bone and muscle, but has no grit or oyster shell, and fowls will always find something tempting to make them scratch for it. A small amount of this thrown in the litter after they have gone to roost at night will set them at work early in the morning. Hens standing around with nothing to do will never lay eggs, and there is no one kind of feed that will make them. They must have clean, dry quarters, fresh water, plenty of exercise. Fresh cabbage or mangels for green food and then our Scratch and Mash food properly fed will produce eggs when they are wanted the most. We have tested this feed with excellent results.

Price, 10 lbs., 25c.; 50 lbs., $1.10; 100 lbs., $2.00. Special price per ton.
REX FLINTKOTE ROOFING.

Is less affected by changes in temperature, and is more durable than other roofings, due to the use of high-grade and perfect non-conducting materials in its manufacture. As a roofing and siding for poultry buildings Rex Flintkote Roofing is especially adapted. It keeps the poultry warm and dry in winter and cool in summer, and protects them from draughts and dampness, making them less liable to cold and disease. We also call attention to its value as a roofing and siding for all kinds of farm buildings, outbuildings, allos, etc. Cheaper than shingles, more easily laid and more durable. Flintkote Roofing is made from perfect non-conducting materials and is water, acid and alkali proof. It is therefore unaffected by heat and cold or fumes of any kind, and can be laid in all climates. Coming in four sizes—1, 2, and 3 ply—it is suitable for any roof, provided there is a pitch of 3/4 inch to the foot or over, and can be quickly and cheaply laid.

Each roll contains 316 square feet. Two squares (200 square feet) and 16 square feet for laps and butts. Inside each roll is packed sufficient nails, caps and cement for laying. The above are included in price quoted.

---

**The Stearns Bone Cutter, No. 7.**

This mill runs on ball bearings, and is the easiest running bone mill on the market. The bearings are dust-proof, and it has an automatic feed.

Price, $20.00.

Cash with order, 5 per cent. discount.

**Prices.**

Lots of 10 Dozen per roll...

- 1-PLY: $2.50 per Dozen
- 2-PLY: $1.25 per Dozen
- 3-PLY: $1.50 per Dozen
- 4-PLY: $2.00 per Dozen

---

**The Humphrey Green Bone and Vegetable Cutter.**

The Humphrey Bone Cutter is entirely different from other makes, but we have found that it gives good satisfaction, and our increased sale prompts us to show it in our catalogue, and warrant every machine to do perfect work. We carry but one size in stock, but can furnish any size from the factory.

No. 1 Hand Power, $12.00.

5 per cent discount for Cash.

---

**Stearns Clover Cutter.**

A very handy but cheap cutter for small poultry keepers. Fastens to any table or bench.

Price, $3.00.

---

**Union Lock Poultry Fence.**

For Poultry, Rabbits, Orchards, Gardens, etc.

All main strands are two wires twisted together.

In comparing prices with ordinary poultry netting remember these bales are 15 feet longer. We don't sell less than full rolls.

---

**Net Retail Price List.**

10 Red Rolls (165 feet).

- 24 in. wide: $2.50
- 36 in. wide: $3.50
- 48 in. wide: $4.00
- 60 in. wide: $4.75
- 72 in. wide: $5.40
Houghton's Wire Egg Turner.

This turner is made for the use of all Poultry Breeders, large and small, to hold and turn eggs which are to be used for hatching, as it is a well-known fact that all eggs used for that purpose should be turned every day or two so that the yolk will not settle to one side and destroy the fertility of the egg. They are just the thing to hold and turn eggs which are kept in storage for higher prices. If turned every day or two they will keep fresh for weeks.

Prices List of Wire Egg Turners:

- 1008 Egg Size, $8.50
- 504 Egg Size, 5.50
- 192 Egg Size, 4.25

Mann's New Open Cylinder Bone Cutters.

Practical Poultrymen are for the most part concerned with facts. They want eggs when eggs are worth most. The fowl demands raw animal food. When hens get such food in abundance they lay in abundance. When they are deprived of such food they do not lay so abundantly. Properly cut Green Bone, with meat and gristle attached, supplies this food in the most available manner.

Milk makes the Money, but Dr. Hess' Stock Food makes the Milk.

Like a magic purse the farmer's money bag fills itself.

We Guarantee Dr. Hess' Stock Food to increase the bone, muscle and milk producing value of your hay, grain, etc., sufficient to cover its cost many times over, besides keeping animals free from disease.

It is the prescription of Dr. Hess (M. D., D. V. S.) and contains the bitter tonics long known in medicine for improving the appetite and the flow of juices necessary to assimilation; this preparation also contains the salts of iron, which are the greatest blood and tissue builders, together with the nitrates of sodium and potassium, and sufficient laxatives to regulate the bowels. These medicinal tonics, etc., are blended with nature's roots, herbs, barks, seeds, etc., and we want every stockman to test Dr. Hess' Stock Food with the understanding that if it isn't thoroughly satisfactory, their money is to be refunded.

Dr. Hess' Poultry Pan-a-ce-a is the guaranteed egg producer. The high price of poultry and eggs in the market today, renders this preparation indispensable to poultry raising. It not only insures an increase in the egg yield, but cures gapes, cholera, roup, indigestion, leg weakness and the like. It is a tonic to the young, makes them grow fast, healthy and strong.

FOLLOWING ARE THE PRICES OF DR. HESS' SCIENTIFIC COMPOUNDS:

Dr. Hess' Healing Powder.

Kow Kure. Prevents and cures abortion and barreness. Increases the flow of milk. It is for cows only. 50c. and $1.00.

Cow Tone. For same purpose as Kow Kure. Considered by some as preferable to it, 50c. and $1.00.

Cow Relief. Cures caged bag and sore teats. Should be in every stable. 50c. and $1.00.

Coal Cereal. Sure cure for scours and other similar complaints, 50c.

Parrot Food. A mixture of whole seeds, especially designed for parrots. Lb. 10c.; 3 lbs. 25c.

Pigeon Food. A mixture of Kaffir Corn, Vetch; Peas, etc., Lb. 10b.; 20 lbs. $1.00.

Hemp Seed. For birds or chickens. Lb. 10c.; 10 lbs. 75c.

Canary Seed. Lb. 10c.; 10 lbs. 75c.

Paddy, or Unhulled Rice. Lb. 10c.; 3 lbs. 25c.

Canada Peas. For pigeons and parrots. Lb. 5c.; 100 lbs. $4.00.

Alfalfa Clover Meal. This is the latest and best food for all kinds of poultry. It is alfalfa pure as can be had, finely ground, and should be mixed with other kinds of feed, and being light, it makes a very nutritious food and is also an egg producer. Per 100 lbs., $2.00.

Common Second Crop Cut Clover. Can be fed dry or mixed with other feed. Per 100 lbs., $2.00.

Granulated Charcoal. Fine for small chicks. Per lb. 8c.; 20 lbs. $1.00.

Cracked Charcoal. For poultry. Per lb. 5c.; 30 lbs. $1.00.

Sea Shells. This is similar to common oyster shells, only they are very small shell and are fed whole, and as they contain a large amount of meat, are a grand egg producer. Per barrel of about 150 lbs., $1.75.

Sheridan's Condition Powders. These goods are known in every town and need no recommendation from us. Large size, regular $1.00 size, our price 80 cents.; small, 20 cents.

Dole's Horse, Cattle and Poultry Food. This is one of the best foods for milch cows to increase the flow and keep the animal in condition. Once tried, always used. Large box, 75 cents.

Meat Meal. Is finely ground meat and blood, and is preferred by many to Beef Scraps, as it may be mixed with wet feed and prevents waste. Per 100 lbs., $2.00.

Desiccated, or Dry Ground Fish. For poultry. This is a great egg producer and takes the place of beef scraps, which are so hard to get at the present time. The price is also much lower than scraps. Per 100 lbs., $2.25.

Glass Nest Eggs. Each, 5 cents. Dozen, 30 cents.

Kaffir Corn. This is probably one of the best, as well as the cheapest, food for hens, chickens or pigeons. It is about the size of a very small pea, and is fast taking the place of other grains for poultry food. Try it. Per 100 lbs., $1.75.

Mico-Spar Cubical Grit. Cracked in three sizes. No. 2, for Poultry. No. 3, for Pigeons. No. 4, for Small Chicks. Price per 100 lbs., 75 cents.

Milford Granite Grit. Two sizes, for Poultry and Chicks. Per 100 lbs., 75 cents.

Green Cut Bone in season. We can furnish this in 50 and 100 lb. lots at $3.00 per 100 lbs.

Old Fashioned Beef Scraps. These Scraps are ground fresh for us, and do not contain any oyster shell or tankage, but are good fresh bone and meat. Per 100 lbs., $2.50.

Cracked Bone. Fresh cracked bone, without any meat, will keep for any length of time. Should always be kept in a box where the hens can get to it. Per 100 lbs., $2.00.

Ground Oyster Shells. For Poultry or Chicks. Per 100 lbs., 60 cents.

Wyandotte Chick Food. 100 lbs., $2.50.

Every Day Scratch Food. 100 lbs., $2.00.
LATHROP'S
Poultry Fountain,
Grit and Shell
Feeder.

Pat. March 4, 1902.

Can be used for water or
grain. Always clean and ready
for use. You will like it when
you see it. This is one of the
best chick feeders for Wyandotte Feed.

Price, only $1.00.

WATER IN THE STABLE IS A NECESSITY.
It has come to be regarded as a necessity for the proper caring of stock,
while in the stable, that they should have constant access to the water of suitable
temperature. The Buckley process shown above is the most practical method of having it.

Plain, each, $1.00; doz., $11.00. With valve, $1.25; doz., $14.00.

Warriner's Patent Chain Cattle Stanchions.

These Fasteners are
in use in a large
number of stables and
give universal satisfaction. The cut
shows the device: a
short chain secures
the fastener to the
top beam so that it
perpendicularly clears
of the bottom sill. It
is also fastened to
the bottom sill by a
chain to allow it a
free and easy motion
and rotation, giving the
cattle freedom yet
be securely fastened.
It keeps them clean
and gives liberty
of action.

Price, each, $1.25
Doz. lots, $1.15 each.
**VETERINARY INSTRUMENTS**

**EVERYTHING SHOWN ON THIS PAGE WILL BE SENT POSTPAID ON RECEIPT OF PRINTED PRICE**

---

**PILLING'S CAPONIZING TOOLS.**

Poultrymen can double their profits by Caponizing their hens. The operation is very simple—the instruction so full and explicit that anyone will be able to perform the operation. The demand for Capons far exceeds the supply, the price per pound being twice as much as for ordinary hens. The object of Caponizing is to largely increase the weight of the fowl, causing them, in many cases, to grow as large as turkeys and weighing from 10 to 15 pounds, to make the meat a finer and sweeter flavor and very juicy and tender. Again, Capons are worth about $6.00 to $8.00 more than hens not Caponized. They are very much quieter in disposition.

---

**MILKING TUBES for Sore and Obstructed Teats and Hard Milk Cows.**

DIRECTIONS—the long rounded end of the tube is inserted in the office of teat, when the milk will flow without the use of the hands. It is best to wet the tube with a drop of milk or water before using. Remove tube when milk ceases to flow. In some cases, the obstruction is further up the teat than can be passed by the regular tube; and, if no obstruction, the milk is more likely to flow from the teat hole with the regular tube than can be made any length, answers for all purposes. German Silver plated, 3½ in., 2½ in., 3 in., 3½ in., 3¾ in., 4 in.

**Pilling's Improved Instrument for Opening Obstructed Teats.**

The above instrument for opening obstructed (cows) teats. There has been a demand for some simple remedy for this purpose, which we think is now filled by this little instrument, being highly endorsed by the best veterinary surgeons of the country for its very success, and at the same time harmless and simple use, so that any person of average intelligence can use it with perfect safety. We send it securely packed in neat box, with full instructions, postpaid, on receipt of price, 75 cents.

---

**LEAD PROBE OR SOUND.**

For the treatment of stricture and obstructed teats of cows, also for enlarging the opening in cow's teats. Made in three sizes: small, medium and large, postpaid 25 cents each. Directions for using Lead Probe mailed with each one.

**Do Your Cattle and Horses Always Get Salt?**

This method of feeding pure salt to stock has been adopted in the largest stables and grows in favor daily. All first-class stables should have it.

**Fruit Pickers.**

The Peerless. Very handy for gathering apples, pears or plums.

Price, Peerless.............. 25 cts.

**Strawberry Baskets.**

Fruit put up in a neat package always commands a better price than that shipped in cheap baskets.

Order early; do not delay until the goods are wanted, and then expect them the next day.

Prices—No. 1, all White Stock, wire tacked. 100, 50c.; 1000, 25–50.

Closed Corner, or Huckleberry baskets, 100, 60c.; 1000, $1.00.

Special price on lots of 5000 or over.

**Mowing Machine Sections.**

Deering, Wood, Buckeye, McCormick, Champion, Osborne.

Each, 5c.; per 100, 50c.

Give size of section, or send old one for pattern.

**Deering Binder Twine.**

Manila or Sisal Binder Twine, for grain reapers or corn harvesters. This is also used for tying vegetables for the market; is much cheaper than raffia, and not as much work to tie. It is put up in 5 pound balls, a very convenient size.

Price per pound........... 15 cents.
**Frank Miller's Stable Goods.**

These are reliable and should be in every well regulated stable.

**To Farmers and other Patrons of Rural Free Delivery.**

- Burnham Signal Mail Box.
  - Please consider carefully the following facts claimed for the Burnham Automatic Rural Mail Box.
  - It is strictly automatic and is the only self-locker and flag-raiser on the market.
  - The contents of the box are absolutely protected from rain, snow and dust, and the lock cannot be affected by the weather in any way, as it is well protected from rain, snow or dust nor can the opening of the box be prevented by ice.
  - It saves the carrier and patron alike, the time and trouble of getting out the key to lock the box when depositing mail, as the box cannot be locked except when there is something in it, and the act of placing mail in the box locks the same upon dropping lid or cover of box without the use of a key, and at the same time raises the flag.

- Burnham Automatic Signal Mail Box with flag up, shows carrier and patron alike that there is mail to collect and that the box is therefore locked, hence the key is used to unlock and open box to get the mail left. Removing the mail matter automatically lowers the flag when lid is closed preventing locking of box.

- **This box is approved by the Postmaster General.**

**ANNUAL CATALOGUE OF ROSS BROS. CO.**
## Cornell Incubators and Peep-o'Day Brooders.

The Best Line of Machines for Hatching and Raising Chicks Ever Invented.

It is impossible for us in the small space at our disposal to give anything like a complete description of this line of goods, but will mail free a complete catalogue describing them fully. We will mention a few of the good points. First, the table top.

**THE TABLE TOP.** This, to our mind, is one of the most important improvements on any incubator made, and is alone worth the difference in price that you have to pay on other makes. The regulator, as will be seen by the cut, is inside, and out of danger, and leaves the top free to use in turning and testing eggs. Many hatches have been spoiled by a cat, or possibly a rat getting or lying against the regulator during the night when the machine is left to itself. With the Cornell such accidents are impossible.

**THE DOOR** on the Cornell Incubator is entirely original, and is found on no other make. It is practically two doors in one without that inconvenience; it being opened as one door. Each section is insulated with felt, making it a positive fit and practically air tight.

**THE CORNELL INCUBATOR.** This machine with its improvements, we believe, and the manufacturers guarantee, to be the best incubator on the market for the coming season. The walls and all partitions are all packed with cotton and can be run successfully in a room with a lower temperature than any other machine. The lamp contains a water or moisture tank at the top, which solves the moisture question beyond any doubt. The bulb of the lamp is also far superior to any used in any other machine. The machine is made of asbestos with an iron top, which makes it practically fire proof. It is the best furnished machine on the market. After six months' careful trial at the Pan-American Exposition it took the Gold Medal as being the best incubator there.

We buy Cornell Incubators and Peep-o'Day Brooders in car load lots and can sell at factory prices.

### Cornell Dry Food Hopper.

This Hopper is made on an entirely new principle. It feeds equally well slippery grains like oats, oily cayenne material like beef scraps, also mash, grit or charcoal.

Look for the Concave Metal Hopper front. One of the most successful breeders of Exhibition Mediterranean of America, who equipped his Plant with this original Hopper, wrote us recently:

> "It is built so as to even sift the large combs of my birds. I am a warm advocate of dry feeding, yet before seeing your new invention I was on the point of discarding Hoppers as a bad job, because two of my best show birds ruined their combs by brushing against the straight front."

> "Your Hopper is not only perfect in this very important detail, but it feeds absolutely without waste."

Is there any other Hopper that will do this?

Built with three compartments. — Single and double.

**PRICE.**

| Single Hopper, three compartments, to hang on wall or stand on ground: | $1.60 |
| Double Hopper, six compartments, to stand on ground | $2.20 |

Peep-o'Day Brooder and Colony House Combined, Built with Wire Runs.

Poultrymen have been very much in need of a larger out-door brooder that can be readily converted into a colony house after the chicks are of sufficient size. Home-made poultry houses built of dry goods boxes are not satisfactory, and it is oftentimes difficult to procure boxes at any reasonable price, and then they have to be rebuilt before they can be used. This brooder and colony house is divided into equal compartments — nursery and sun parlor. The nursery end has doubled walled sides and sides forming an isolated air space, lined with felt paper. It has the Peep-o'Day over and lamp. The sun parlor occupies the other end and is connected with the nursery by an inside door and run. It has both closed door and wire doors for warm nights.

Price for Brooder and Colony House Combined, $1.60. Six feet long, three feet wide.

### No. 5 Indoor Brooder.

**DESCRIPTION.**

The construction of this brooder is somewhat similar to the No. 4, except that it has a flat cover, and is not intended for outdoor use. It may be run in a building where the temperature falls below freezing.

Dimensions: Three feet square by 20 inches high. The cover is 24 inches in diameter, and has a special thermometer and improved lamp, which will burn thirty to forty hours. A wooden bridge from the cover to the floor is furnished with this brooder and may be used when the chicks are of a size for laying outside the brooder.

It is provided with all chick enemies and made of white pine and neatly painted.

**Weight, 100 lbs. Price, $8.50.**

### Cornell Feed Saver.

An invaluable device for feeding wet mash or whole grain. As shown by the illustration only the heads of the birds are admitted to the trough; after they are satisfied, the feed remains clean and sweet, not soiled or wasted as when fed from a pan.

The feed saver gives all the birds a fair show, as the greedy ones cannot occupy the whole space, crowding away the weaker ones.

It is made in two sizes and shipped "knocked down."

**PRICE.**

Trough with space for 20 birds. $0.75

| No. 5 | Coop or Poultry House with run | 7.00 |
| New Homestead | 16.50 |

Discount, 5 per cent. cash with order.

Catalogue giving complete list prices mailed on application.
No matter how good an incubator you have, it is important that you have a safe and reliable brooder of some make. The Peep-o'-Day is so well known that it needs no word of praise from us. When buying a brooder, be sure and get one large enough, or better still, have a greater number of small ones to give the chicks plenty of room. There is nothing gained, only a few dollars saved in the first cost, in crowding the chicks into too close quarters. Peep-o'-Day Brooders are made for all conditions and all kinds of work. They are the best brooders on the market at the present time. If you use one of these brooders and feed Wyandotte Chicken Food with fresh water or milk, with plenty of room, the results will be satisfactory in the end.

**Peep-o'-Day Brooder No. 1.**

This is one of the best all-around brooders for both indoor and out-of-doors, and one used extensively in brooder houses. It is the original Peep-o'-Day Brooder that has been on the market for the past thirteen years.

**DIMENSIONS:** Three square feet by 27 inches high. Hov-er, 2 feet in diameter. A double-grooved roof, that is absolutely waterproof. The Peep-o'-Day lamp, which burns from 30 to 40 hours. A brooder of this size is rated by other manufacturers from 150 to 200 chick size; but we do not recommend over 50 to 75 chicks in any brooder. Weight, 100 lbs. **Price, $10.50.**

**Peep-o'-Day Brooder No. 2.**

This is the most popular brooder on the market and is our largest seller. It can be used either in or out-of-doors and is sure to give satisfaction.

**DIMENSIONS:** Five feet long, three feet wide and two feet high. Hov-er, two feet in diameter, with a special brooder thermometer, and the latest improved lamp, which will burn from 30 to 40 hours. This brooder is absolutely storm proof, made of white pine and handsomely painted. Weight, 150 lbs. **Price, $11.00.**

**Peep-o'-Day Junior Brooder.**

In this brooder are embodied many of the superior qualities found in the regular Peep-o'-Day, and is unquestionably the best $8.00 brooder on the market. We do not pretend to say that it is equal to the best Peep-o'-Day goods, or that a more substantial style will prove more satisfactory in the end, but for a beginner who does not care to pay over $5.00 for a brooder he will find that this one will meet his requirements.

Weight, 75 lbs. **Price, $5.00.**

**Coolidge's Roost Support.**

Coolidge's Sanitary Roost Support.

The best support made. Has oil cup at top which prevents lice from getting on to the roosts. Fastened down with screws and roosts may be lifted off to clean.

**Price, each 25 cents.**

**Peep-o'-Day Brooder No. 4.**

*For Indoor Use only.*

**DESCRIPTION:** The construction of this brooder is somewhat similar to the No. 1, except that it has a flat cover, and is not intended for outdoor use. It may be run in a building where the temperature falls below freezing.

**DIMENSIONS:** Three feet square by 20 inches high. Cover hinged on any side desired. Large glass slides on three sides of the chick chamber for light and ventilation. The hover is 24 inches in diameter, and has a special thermometer and improved lamp, which will burn 30 to 40 hours. A wooden bridge from the hover level to the ground is furnished with this brooder and may be used when the chicks are given range outside the brooder. It is proof against all chick enemies and is made of white pine and neatly painted.

Weight, 100 lbs. **Price, $8.80.**

**THE NEW HOMESTEAD BROODER. For Indoor and Outdoor Use.**

One valuable feature of this brooder is its freedom from pipes, registers or other obstructions, for every inch of the inside space is available. The heater or radiator is one of the principal features of this brooder and is protected by patents, and cannot be found on any other make. It is simple in construction and inexpensive to run. The lamp is attached to the side of the brooder and has a distinct apartment of its own. The heat generated by the lamp passes upward through the pipe and enters the radiator overhead, where it is diffused by a system of flues, and finally finds its way out through the open air through an exhaust pipe in the center. Smoke or fumes from this lamp cannot possibly enter the brooder. This new system of top heat with bottom ventilation does away with the stumbling block to chicken raising.

The New Homestead, as now built with the Peep-o'-Day lamp, is the best brooder on the market.

**Price, $12.00.**
The Hecla Oak Frame Grindstone

This stone we have made for us, and it is as good a stone as money will buy. It is furnished with a best Nova Scotia stone, the frame is very strong and made of oak, has both crank and foot treadle, with trough and protector.

ANNUAL TO 10

THE KNOLLWOOD BALL BEARING HIGH WHEEL SPADE HANDLE LAWN MOWER.

A MACHINE THAT POSSESSES ALL THE GOOD QUALITIES OF OTHER STYLES.

A 20-inch Machine of this make runs as easy as a 12-inch of the old style, and a handle made to fit your hands.

We offer our customers this machine not as an experiment, but as a guaranteed article, one that we have tested ourselves during the past 5 years, and know what we are talking about. This machine runs on ball bearings (and all first-class machines ought to). The balls used are of the very best quality and will last for years. They are enclosed in steel cups, which protect them from wear. The main axle is steel and lathe fitted and is adjusted as nice as any high priced piece of machinery. The end of the axle where it comes in contact with the balls is cone-shaped, and any possible wear can be easily taken up. The machine has a nine-inch wheel, four knives of the best quality of steel and, last but not least, a handle that is made to fit your hand. (See the spade handle in cut.) After giving you the best mower it is possible for us to get, we have put on to it a handle we have all been looking for. With this Spade Handle the operator has perfect control over the machine and can handle it perfectly on a side hill or on narrow borders. We shall make this our leading machine, and therefore shall offer it at a popular price, which is within the reach of all. We guarantee to take back every machine that is not satisfactory, after a fair trial. While this machine is the best one on the market for private homes, it is especially adapted for parks, cemeteries and large lawns, and to that class of buyers we will make special prices in quantities.

14-inch.... $6.85
16-inch.... 7.10
20-inch.... 7.60

The Royal Golf Mower.

Since golf was introduced into this country, there has been a great demand for a mower that will cut grass close and even and one that will run easily and be durable. It was this machine that made the English golf grounds famous, and as the machine has been thoroughly tested on some of the largest golf links in the world, we offer it to our customers with perfect confidence. It has five revolving knives running at high speed and cuts very close to the ground. If you are desirous of obtaining a really high class Mower at a reasonable price, which will give you every satisfaction, then buy the Royal. The Revolving Cutters, five in number, as well as the Stationary Knife, are made of best hardened steel, and will retain their cutting edges for an extremely long time, as they are practically self-sharpening if the revolving knives are allowed to touch the stationary knife slightly, but not so close as to prevent working. This Lawn Mower is so arranged that a Grass Box can be attached. All parts are interchangeable.

PRICES, TWO SIZES ONLY.

15 in. ......... $7.60
16 in. ......... $7.80

The Columbia Revolving Lawn Sprinkler

This is one of the most durable as well as one of the best Lawn Sprinklers on the market. The base is heavy cast iron, which prevents it from tipping over, and the legs may be unscrewed and the arms removed, and all come packed in a very small box. This is a first-class article at a low price.

Price, $1.00.

RUBBER AND COTTON HOSE.

Our Hose is all made expressly for us by the most reliable manufacturer in the state and every piece is warranted, but it is economy to buy the best grade, as it will last several years.

**Rossmoyne**

*Style C. Lawn Mower. NINE INCH WHEELS.*

This machine has four knives, high wheels. It runs on ball bearings of the same quality as those used on other machines. It is a first-class, medium-price mower. All the parts are fitted on a lathe, and we warrant every machine we sell. For a medium-price machine, you will make no mistake in having this one.

*The Eclipse Hose Reel.*

This is a very handy and well-made Hose Reel and as it is mounted on wheels can be easily moved from one place to another. Hose should always be wound on a reel instead of lying about, thus preventing it from rotting.

**Price:** 75 Cts.

**BIEDER ADJUSTABLE GRASS CATCHER.**

Gathers grass without the use of a rake, and without time or labor. Made of bright striped canvas on a galvanized frame. They are adjustable in height and width to fit all sizes and makes of mowers.

**No. 7. Fits all Low Wheel Mowers, 18 inches and smaller. Price, 25 cents.**

**No. 13. Fits all High Wheel Mowers, 24 inches and smaller. Net price, $1.00.**

**Flower Bed Guards.**

All made up ready to use. The only guard of its kind. Can be shaped to any bed. Keeps out cats and dogs. Ends of wickets are forced in the ground, making it rigid. The handsomest and most durable guard made. Also used for Corners of Lawns and Cemetery Lots.

**Common Sense Hose Reel.**

No kinks in the hose if you use this reel. Holds 100 feet.

**Price:** $1.85

**THE LITTLE GIANT LAWN MOWER.**

For the benefit of those who want a low-priced mower or those who have but a small amount of grass to cut, we offer this machine, and we think we are safe when we state that it is as good as one-half of the mowers sold as a high-grade machine, and, being a light-running mower, is preferred by many to the higher grade styles. We warrant every machine and have never had to replace one. $11 wheel.

**New Excelsior Horse Lawn Mower.**

It is quite essential to those having extensive lawns who desire to keep them in fine order that the grass should be evenly cut in order to produce a beautiful appearance. The New Excelsior Horse Lawn Mower is especially built for this purpose. We furnish the Mower with side-draft attachment that permits the horse to walk only on the cut grass. We use the sectional caster wheels which do not roll down the standing grass nor leave unsightly marks upon the lawn. We fully guarantee them in every particular. The Horse Lawn Mower is made in Four Styles, viz.: 26-inch cut, without Seat or Shaft, $15.00; 30-inch cut, with Seat and Shaft, $75.00; 34-inch cut, with Seat and Shaft, $115.00. Discount, 40 per cent. Cash with order, 5 per cent extra.

**ARCTIC LAWN SWING.**

The Arctic Lawn Swing and Hammock with or without Awning.

As a swing this affords the most comfortable lounging place you can think of. The backs of the chairs are adjustable and can be set up straight or inclined, as great angles as you wish. Price, with awning, $35.00, without awning, $30.00. If set up in the city, 30 cents extra.
ROSS POLE AND WOOD SAWS AND FRAMES

All wood saws are made to drop the wood on the right hand side, unless otherwise ordered. We carry only the best selling sizes in stock; other sizes will be shipped direct from the factory. Discount on sizes in stock, 40 per cent; when shipped from factory, 40 and 5 per cent. The extra 5 per cent, will nearly pay freight.

TILTING TABLE WOOD SAW.
The above will give you an excellent idea of the high type of these saws. They are made of good material, thoroughly and are built in a thoroughly workmanlike manner in every respect. The arbors are of steel, the bearings 1 1/2 and well lubricated. The balance wheels are heavy and well balanced. This machine is finished in an attractive manner. It has a tilting table pivoted so that it balances perfectly, and is therefore a great favorite with the sawyer.

Prices, Tilting Table Wood Saws: 20 in. $55.00; 24 in. $57.50; 28 in. $60.00; 32 in. $62.50; 36 in. $65.00. Discount 40 per cent; 5 per cent. cash with order.

FOR STOCK OR TOWERS, SEND FOR COMPLETE PRICE LIST.

Goshen Round and Square End Steel Tanks.

Goshen Tanks are made of No. 20 Galvanized Steel. The workmanship is first class in every way. The measurements are outside. Covers can be furnished at about 20 cents per square foot. There are so many sizes made, and as all tanks are shipped set up, we do not carry all sizes in stock, but can guarantee prompt shipment from factory, and we offer a liberal discount which will cover freight charges to nearly any freight station east of the Mississippi River. We can also furnish any size or style of tank either set up or flat. Send for complete list with discount.

Tilting Table Wood Saw

SLIDING TABLE POLE SAW.
This machine has been carefully designed and all parts are well made. The above clearly illustrates it. It is built with a sliding table and the balance wheel is on a separate shaft entirely out of the way. Long poles can be sawed as well as wood. Power is taken in the same manner as tilting table pole saw. All our wood saws are made right hand unless otherwise ordered.

Prices, Sliding Table Pole Saws: 20 in. $50.00; 24 in. $52.50; 28 in. $55.00; 32 in. $57.50; 36 in. $60.00. Discount 40 per cent; 5 per cent. cash with order.

"Ohio" Self-Feed Ensilage Cutter,
And New Metal Strip Swivel Carrier.

This is the "Ohio" Ensilage cutter with travelling feed table. It is a perfect machine for cutting ensilage and dry feed. Cutting ensilage with this machine requires one man to throw off the wagon, one man to help throw off and attend to the machine. One or two men constantly pushing to get the fodder started is not necessary. The only point is to get it to the machine—it goes through itself. It will cut 24 1/2 per cent, more than the regular machine and saves 75 per cent of the fodder's time and labor.

The feed table is supplied with a continuous travelling chain or belt apron which converts the machine into a self-feeder. The travelling apron is driven by chain and sprocket wheels and is under control of the feeder by means of the throw-out lever located just in the rear of the lever that controls the feed rollers. The apron travels on five pairs of sprocket wheels, which is a guarantee against wear.

The throw-out levers are strong points of advantage, as it is well known to parties familiar in the use of such machines, that occasionally a pitchfork, horseshoe, or some other foreign substance mysteriously strays into the machine, and about the time it reaches the knives the feeder has only to catch the levers and throw the feed out.

The Centennial Fanning Mill.

The Most Perfect Cleaner, Grader and Separator of all Grain and Seeds.

The Centennial is an excellent chaffer, having plenty of wind and shake. Having two shoes it carries more screens than any other mill in the market. It will separate oats and all seeds, such as pigeon grass, wild buckwheat, cockle, cheat and other wild seeds from wheat at one operation. The best mill for all purposes in the market.

List Price, $20; discount for cash, $4.

Greendale Gasolene Engine.

Since Gas Engines have been on the market we have been looking for one that we could recommend with perfect confidence to our customers as being a first-class machine. The Greendale is made here in Worcester and the manufacturers are thoroughly reliable parties, and it has been tested by several of our leading farmers in this county. It may be economy in some lines of tools and under certain circumstances to buy cheap or low priced goods, but on an engine the best is none too good. Where your life is endangered, never take any chances by buying simply because you can save a few dollars. You may be able to save $50.00 or $75.00 in buying some other make, but it is liable to prove expensive and perhaps dangerous in the end.

This engine has the simplest and most effective self starter of any Gasolene Engine made. It starts instantly without any exertion on the part of the operator. No mechanical parts to wear out and always ready for use. It also has an automatic friction pulley very simply and substantially made. With this pulley, the engine is free to start, but takes up the load gradually. List price, $12 horse power. $175. Discount for cash, $175.50; 5 horse $260. Discount for cash $25; 7 horse, list $300 or discount for cash $30; 11 horse, $445, discount for cash $45. At these prices, we furnish a man to set up and start.

ST. ALBANS
Horse Powers.

We claim for this Horse Power an adaptability for farmers' use never equalled by any other power in the market. The study has been to so construct that they should meet all their wants, and be easily adjusted to any and every use.

One-Horse Power, with Speed Regulator, $70.00. Two-Horse Power, with Speed Regulator, $90.00. Discount for cash, 5 per cent.

The Rich Lever Cutter.

The best lever cutter made. Knife always up to its place.

No. A. each $4.25
No. B. each 4.50
No. C. each 5.00

STUMP PULLER
AND
ROCK LIFTER.

Simplest and most efficient device ever invented for pulling stumps and lifting stones or handling heavy bodies.

Price complete with Tripod, $28.00.
Without Tripod, $25.00.

The Kelly Duplex Grinding Mills.

The Kelly Duplex Grinding or Feed Mill is in very general use throughout the whole country. The one reason why the Kelly Duplex is so popular, and why it attracted such a large number of buyers, is that it is superior to any other mill. By superior, we mean that it is capable, in the hands of ordinary operators, of doing a great deal more than any other mill, and doing it better and easier, requiring less power and producing a better grade of feed.

Why This Is The Best Iron Mill Made.

Because it is provided with a double set of grinders or burrs, for which reason it is called the "Duplex." It is the only mill manufactured which has double or duplex grinders. It can do as much work as any other mill of double its size. It will grind any kind of grain, or corn and cob, equally well, and will produce meal of any desired quality, course or medium or fine.

Send for Circular.
The Majestic Rotary Washers

This is, without doubt, the lightest running washing machine on the market. The ball bearings and balance fly wheel almost make it run itself. The tub is made of well seasoned Virginia white cedar with a flat hoop at the top and electric welded wire hoops in the middle and at the bottom sunk in a groove so that they cannot come off. There is nothing on the inside to catch and tear the clothes. This is a household necessity.

Price, $7.00.

Discount for cash, 50c.

ECONOMY BOILERS.

No Farmer can afford to be without a farm boiler or large kettle of same kind. The Economy, shown in cut, is the cheapest of any on the market. For out-door use only.

PRICES.

65 Gal. list $20.00 net cash price $13.00.

Other sizes furnished if desired.

"GRANITE STATE" WATER HEATER.

FOR BUTCHERS AND MILKMEN.

"Boilers of galvanized steel; furnace of gray iron castings and sheet steel; sides of double thickness of steel with hot air space between.

PRICES.

NATIONAL CIDER MILL. FAMILY SIZE.

This mill is especially adapted for family use, being light, strong and convenient. It is exactly the same in principle as the farmers' mill shown below, only of smaller size and sold at a less price. This mill will pay for itself in one season by gathering the windfalls and making them into cider for vinegar and for the market; this is just the size for that purpose.

List Price, $28.00. Net Price, $23.00.

CONTRACTORS' PLOWS.

Road Plow, No. 99.

List price $35.00. Discount, 20 per cent.

Pavement Plow, No. 98.

List price, $30.00. Discount, 20 per cent.
American Field and Hog Fences.

MADE OF GALVANIZED WOVEN STEEL WIRE.

This is the strongest and most durable made fence on the market and should take the place of every rod of barb wire. It makes a far more durable fence than barb wire, and does not injure the stock. It is harmless, and will stop cattle, horses, sheep, dogs and pigs. It makes practically an everlasting fence if properly put up.

It is made in a large number of styles, but we carry in stock those listed below, as we have found them to be the most practical, but we can furnish any style. Our prices are net, and have been figured at a very liberal discount from the manufacturer’s list as we placed our order in the fall for a large quantity and in that way got the very lowest price.

HE presence of a select library of standard agricultural books in the home of a farmer lends a certain air of distinction and refinement and at once stamps the owner as alert, active, progressive, and abreast with the times.

We present, herewith, a partial list of the best books treating on every phase of agricultural and rural life. They have been prepared by the most eminent authorities on their respective specialties, and are thoroughly practical, while at the same time scientifically accurate. To the progressive farmer who desires to keep posted upon the latest investigations of his chosen business these books are invaluable, and there is no investment that will pay such big returns as a few books that will give you the information you need just when you want it.

The prices are exceptionally low when you consider their high character and the excellent manner in which they are printed, bound and illustrated. We will furnish any of these at the advertised price, postage prepaid.

**EXPLANATION.**—Whenever an asterisk (*) is used it cautions against spraying with poisons while the plant is in blossom; a dagger (†) indicates that there is danger of making an application within three weeks of the time the fruit is to be used as food. While the number of applications recommended will be found desirable, in seasons when the fungi are less troublesome a smaller number may often suffice.

**FUNGICIDES.**

**COPPER SULPHATE SOLUTION.**

- Water: 28 gals. For use only before the buds open. It is ready for use as soon as dissolved in water.

**Bordeaux mixture.**

- Copper sulphate: 1 lb.
- Quick lime: 2 lbs.
- Paris green (for leaf-eating insects): 4 oz.
- Water (1 barrel): 40 to 50 gals.

To prevent potato rot, 6 lbs. of copper sulphate is used instead of four.

**AMMONIACAL COPPER CARBONATE.**

- Copper carbonate: 5 oz.
- Ammonia: 2 qts.

**INSECTICIDES.**

**KEROSENE EMULSION.**

- Kerosene (coal oil): 2 gals.
- Rain water: 1 gal.
- Soap: 1 lb.

To be diluted before use with 9 parts of water. For sucking insects.

**PARIS GREEN AND WATER.**

- Paris green: 1 lb.
- Lime (litharge): 5 lbs.
- Water: 100 gals.

For insects which eat foliage.

Eggs from Thoroughbred Poultry

There is no one branch of Farming that pays a better profit or gives more satisfaction than Poultry.

With the increased price of poultry, caused by the beef combine, no farmer can afford to neglect this most important branch of farming, for with the present demand for both poultry and eggs and the better facilities for producing both, the outlook was never better than at the present time. With the use of an Incubator and Brooder and our Wyandotte Chick Food the cost of raising a flock of chicks is reduced about one-half, and thoroughbred poultry can be had at the present time about as low as common mixed breeds. We have as good a stock as it is possible to get, and we are in a position to furnish

Eggs either by the hundred or in smaller lots of the following breeds:

Prices of Eggs.

Send for Free Sample of Wyandotte Chick Food.

Valuable Poultry Books

Cheap.

We believe that everyone interested in Poultry should have some reliable book for reference, and we have therefore made arrangements with the publishers to furnish the following books, all sent postpaid at price quoted.

Artificial Incubating and Brooding.

A practical work contributed by the most experienced operator of incubators in America. 140 pp., 7 x 10; 100 illustrations; 8 full page designs. It contains full and complete instructions on the use and abuse of incubators.

Price, only 50 cents.

Eggs and Egg Farms.

The mainstay of the poultry business. The book you have been looking for. Contains a large collection of facts. Covers the ground you will have to travel if you are starting in the poultry business. Eighty pages. Price, only 50 cents.

Poultry Houses and Fixtures.

32 pages, 9 x 12. Contains up-to-date designs of practical poultry building and special fixtures. Shows you how to build a cheap or a good house or coop. Beginners should have this book. Price, 50 cents.

Other books that we have not room to describe:

- Ducks and Geese. Price, 50 cents
- Plymouth Rocks—Barred, White and Buff. Price, 50 cents
- Wyandottes—White, Buff, Golden, Silver and Black. Price, 50 cents
- The Leghorns—Brown, White, Black and Buff. Price, 50 cents
- The Bantam Fowl. Price, 50 cents
- Turkeys—All Varieties. Price, 50 cents
- The American Standard of Perfection. Price, $1.00

All of the above postpaid, and money refunded if not satisfactory.
